REVOCATION OF CLOSURE OF SHELLFISH BEDS

ENVIRONMENTAL PROTECTION WATER MONITORING AND STANDARDS

Public Notice of the Revocation of Condemnation of Shellfish Beds

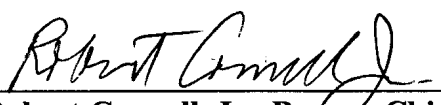

Pursuant to statutory authority granted the Department of Environmental Protection appearing at N.J.S.A. 13:1B-4 and 58:24-1 et seq., and to assure that the public health is not imperiled by the consumption of shellfish that may be subject to pollution resulting from the release of sewage from a malfunction in a sewer line into the waters of Claypit Creek and the Navesink River, Monmouth County, the Department condemned and prohibited the harvesting of all shellfish from those State waters previously classified as Special Restricted in Claypit Creek, Seasonally Approved in the Navesink River and portions of the Special Restricted waters of the Navesink River, specifically:

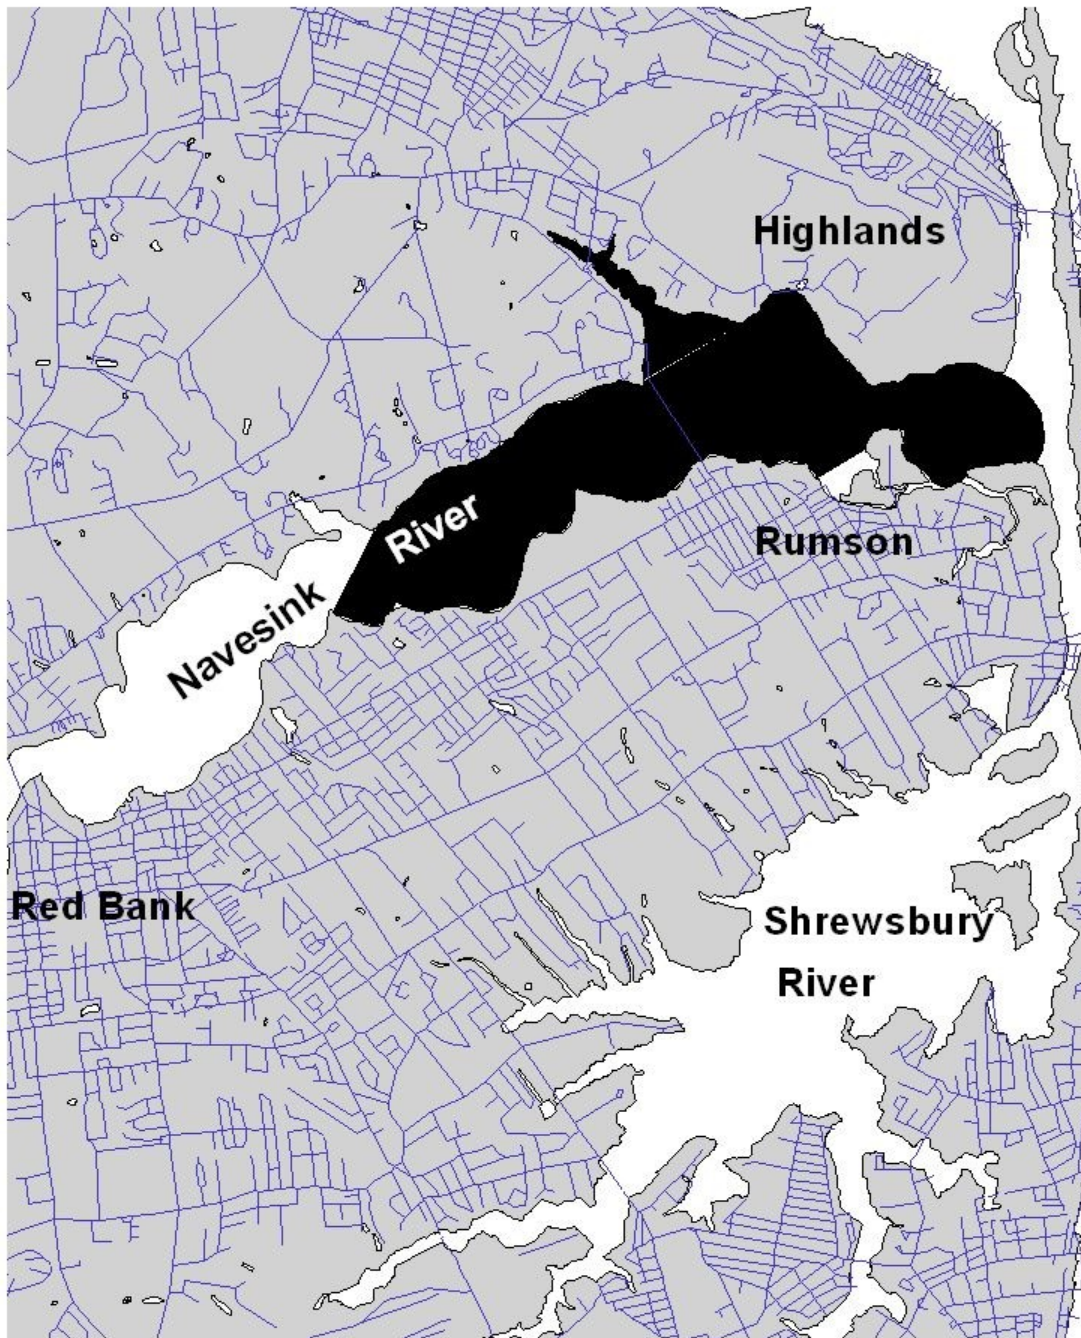

All of the Seasonally Approved waters of the Navesink River, and the Special Restricted waters of Claypit Creek and depuration program sections 5a and 5b of the Navesink River.

As provided in the aforementioned prohibition, having determined through sample monitoring that the waters described above are now safe for the harvesting of shellfish, I hereby revoke the prohibition, returning these waters to their prior classification effective on April 12, 2009.

DATE:

April 11, 2009

Robert Connell, Jr., Bureau Chief
