Proposed General Permit (GP-021B), Outdoor Fumigation Operations of Containerized

Commodities

Take notice that the Department of Environmental Protection (Department) is seeking public comment on a proposed general permit GP-021B for outdoor fumigation operations of containerized commodities at minor air facilities.

This new general permit would allow for the construction, installation, reconstruction, modification, and operation at a single industrial complex, limited to outdoor containers for methyl bromide, phosphine, and/or sulfuryl fluoride for fumigation of various commodities.

A general permit is a pre-approved permit to construct and certificate to operate, issued pursuant to N.J.A.C. 7:27-8.8, for one or more types of similar sources at a minor facility. A minor facility with a qualifying source may register for and operate under the conditions of the general permit, rather than submit a case-by-case permit application.

The proposed general permit is available for review at the Department's website: <https://dep.nj.gov/boss/public-notices/>. Copies of the proposed general permit may also be requested by contacting:
