MEMORANDUM

To: Air Quality Permitting Staff

From: Kenneth Ratzman, Assistant Director
Air Quality Regulation and Planning 

Date: September 24, 2018

Subject: Major Sources – Title V Stack Test Extensions

N.J.A.C. 7:27-22.18(k) provides conditions under which a Title V permittee may seek approval for a delay in testing required pursuant to its Operating Permit. Section (k)3 describes conditions under which the Department shall review each request for delay (up to 90 days each). Stack tests extension requests shall be processed as follows:

1. For stack test extensions due to reasons outlined in N.J.A.C. 7-22.18 (k)(3), the Permittee may submit an extension request for Department review and approval as long as the Permittee's operating permit specifically allows for it in the General Provisions. Such requests shall be submitted to the appropriate Regional Enforcement Office consistent with N.J.A.C. 7:27-22.18 (k)(1) and (2).
2. For stack test extension requests due to reasons other than those outlined in N.J.A.C. 22.18 (k)(3), the Permittee shall submit a significant permit modification to the Department for review. Such requests will be reviewed and decided on a case-by-case basis.
