Permit Descriptions

CAFRA - A Coastal Area Facility Act permit is required to construct residential, commercial, public, transportation, utility and energy-related facilities in the coastal area as defined by the Act.

Federal Consistency Activity: Certain federal permits, not limited to the U.S. Army Corps of Engineers Dredge and Fill Permits, require certification by the DEP prior to the issuance of the permit by the federal agency.

Freshwater Wetlands: A Permit (Letters of Exemption, Letters of Interpretation, Statewide General Permit, Open Water Fill, Individual, Transition Area Waiver, Water Quality Certificate) is needed prior to engaging in a regulated activity in or around freshwater wetlands and associated transition areas. A Stream Encroachment Permit, a U.S. Army Corps of Engineers Dredge and Fill Permit, and a Water Quality Certification may also be required.

General Groundwater Petroleum Products Cleanup: This general permit authorizes the surface water discharge of treated groundwater previously contaminated with petroleum products.

NJPDES permits: A permit is required for the discharge of pollutants to surface and groundwaters, a discharge from an indirect user or the land application of municipal and/or industrial residuals. (A more comprehensive definition of activities which require a permit may be found at N.J.A.C. 7:14A-2.4)

Solid Waste Facility: A permit is required to conduct or operate any solid waste facility as defined under the Solid Waste Management Act, N.J.S.A. 13:1E-1 et seq., and N.J.A.C. 7:26-1 et seq.

Stream Encroachment: Under the Flood Control Act DEP is empowered to require a permit to control construction within and proximate to flood hazard areas to reduce flood damage to and from new development and to protect the flood storage capacity and ecology of flood plains.

Tidal Wetlands: A Coastal Wetlands Permit is needed to excavate, dredge, fill or erect structures on coastal wetlands.

Treatment Works Approval: A TWA permit is required for the construction, modification or operation of a treatment works, including sanitary/industrial sewage pretreatment or treatment systems, sewage conveyance systems, sewer extensions and subsurface sewage disposal systems.

Waterfront Development: A permit is required for any project involving the development of waterfront near or upon any tidal or navigable waterway in the State.

General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed does not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed inside the back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

Appeals on Applications

Any individual who would like to appeal a decision on an application should direct their remarks to:

Event Public Interest***

Take notice that the Department of Environmental Protection (Department), in conjunction with the New Jersey Water Supply Advisory Council (WSAC) and the New Jersey Institute of Technology (NJIT), will hold a public forum on the proposed utilization of water supply reservoirs in New Jersey for flood control purposes. Employment of the water supply reservoirs as dual use reservoirs for both storing water supplies and to retain flood waters has been proposed in past years and has recently been considered by the State Legislature. While the use of reservoirs for these dual initiatives may provide some measure of flood control, it may result in a reduction in water supply that would otherwise be available during periods of low rainfall. As such, the Department, WSAC and NJIT will hold a public forum where technical and other experts will present the advantages and disadvantages of the dual use of reservoirs, and to accept comments in this regard.

The Department, WSAC and NJIT will hold an all day public forum on the dual use of reservoirs for water supply storage and flood control on the date and at the location below. Presentations will be made during the morning on the advantages and disadvantages of the dual use of reservoirs. Written and oral comments and testimony will be accepted during the afternoon.

New Jersey Institute of Technology
Martin Luther King Boulevard
Alumni Seminar Room
Newark, New Jersey
April 30, 1999
9:30 AM to 12:00 PM (Presentations)
1:00 to 3:30 PM (Testimony)

If testimony concludes before 3:30, the forum will be adjourned early. Pre-registration for the public forum is requested. Pre-registration is required in order to obtain parking passes. To pre-register or for further information on these meetings, please contact Robert Kecskes of the Department's Division of Watershed Management at (609) 777-1053 or rkecskes@dep.state.nj.us, or Professor Eugene Golub of the New Jersey Institute of Technology at (732) 431-4494 or e.golub@worldnet.att.net.

For those interested persons who are unable to attend the above forum, written comments are welcome and may be submitted by May 15, 1999 to:

PUBLIC NOTICE

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP) proposes to issue the following New Jersey Pollutant Discharge Elimination System (NJPDDES) permit actions in accordance with N.J.A.C. 7:14A-1 et seq. and by authority of N.J.S.A. 58:10A-1 et seq. The description of each proposed permit action is contained in the accompanying table.

This public notice has been prepared for these facilities as part of the administrative record to be filed at NJDEP, 401 East State Street, Trenton. Copies of the draft document are obtainable, for a nominal charge, and the administrative record is available for inspection by appointment only, Monday through Friday, by contacting the NJDEP file room at (609) 292-0400. Additional information regarding the draft document may be obtained from the contact person listed in the accompanying table.

Comments on the draft document or a request that NJDEP hold a non-adversarial public hearing on the document must be submitted, in writing, to the individual specified below (refer to the accompanying table for the appropriate permitting bureau) during the public comment period, which closes 30 calendar days after publication of this notice. All persons, including permittees who believe that any condition of NJDEP's tentative decision to issue these permit actions is inappropriate must raise all reasonable issues of concern and submit all arguments and factual materials supporting their position during the public comment period. Any request for a public hearing shall state the nature of the proposed issues to be raised in the hearing. A public hearing will be conducted if NJDEP determines there is a significant degree of public interest. If a public hearing is held, the public comment period is automatically extended through the close of the hearing.

NJDEP will consider and respond to all significant and timely submitted comments. The permittee and each person who submitted written comments, will receive notice of NJDEP's final decision to issue, revoke or redraft the document.

Written comments should be submitted to the appropriate permitting bureau:

The Department has determined that this category requires the same or similar monitoring and/or operating conditions, and is more effectively controlled under a general permit than under individual permits. If finalized, the general permit will not supercede any existing permits that a residuals transfer facility may currently possess. All residuals transfer facilities with existing NJPDES permits will be encouraged to apply for and obtain the general permit, but will have the right to retain their individual permit until permit expiration. Residuals transfer facilities which would be precluded from eligibility for coverage under the final general permit include, but are not limited to, facilities which have a total on-site storage capacity which exceeds 50,000 gallons, facilities which accept dewatered sewage sludge, facilities which perform any type of treatment (including dewatering, but excluding storage) and/or facilities which store and transfer industrial residuals.</p> |

The Vanatta Street well is a 12-inch diameter, 345-foot-deep well which was found to be contaminated with organic compounds in 1978. The discharge at the facility consists of backwash water from the water treatment system. Previously this backwash water was allowed to infiltrate back to ground water through cracks in the base of two concrete basins which had deteriorated. These two basins have been rehabilitated and lined with Watersaver Polypropylene Geomembranes (PPE) 4,500 45-mil. reinforced liners on top of Watersaver Geotextiles. | Chester Outlet Mall NJPDES Permit No. NJ0134058 Ground Water | Route 206 South Chester Borough Morris County | Greg Chin Bureau of Nonpoint Pollution Control (609) 633-7021 | II-A | The Chester Outlet Mall will consist of 110,000 square feet of retail, food service, and banking facilities contained in four buildings. The proposed 11,000 gpd of sanitary wastewater generated at the facility will be processed by a wastewater treatment plant to meet limits of 10 mg/l total nitrogen and 200 colonies/100ml for fecal coliform. The treated sanitary wastewater will be discharged to groundwaters of the State via two subsurface disposal beds. |
| Sahara Sand of Eagleswood NJPDES Permit No. NJ0133744 Ground Water | Route 9 South Eagleswood Township Ocean County | Brian Sage Bureau of Nonpoint Pollution Control (609) 633-7021 | II-A | Sahara Sand of Eagleswood is a sand and gravel mining operation. The facility has an unlined surface impoundment which is part of the sand and gravel mining operation. The unlined surface impoundment receives silt and clay laden wash water from the processing plant. The silt and clay particles settle out in the surface impoundment and the water is reused in the sand and gravel washing operation. |
