A Stream Encroachment Permit, a U.S. Army Corps of Engineers Dredge and Fill Permit, and a Water Quality Certification may also be required.

General Groundwater Petroleum Products Cleanup: This general permit authorizes the surface water discharge of treated groundwater previously contaminated with petroleum products.

NJPDES permits: A permit is required for the discharge of pollutants to surface and groundwaters, a discharge from an indirect user or the land application of municipal and/or industrial residuals. (A more comprehensive definition of activities which require a permit may be found at N.J.A.C. 7:14A-2.4)

General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed does not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed inside the back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

Event Public Interest***

Take notice that the Department of Environmental Protection (Department), in conjunction with the New Jersey Water Supply Advisory Council (WSAC) and the New Jersey Institute of Technology (NJIT), will hold a public forum on the proposed utilization of water supply reservoirs in New Jersey for flood control purposes. Employment of the water supply reservoirs as dual use reservoirs for both storing water supplies and to retain flood waters has been proposed in past years and has recently been considered by the State Legislature. While the use of reservoirs for these dual initiatives may provide some measure of flood control, it may result in a reduction in water supply that would otherwise be available during periods of low rainfall. As such, the Department, WSAC and NJIT will hold a public forum where technical and other experts will present the advantages and disadvantages of the dual use of reservoirs, and to accept comments in this regard.

The Department, WSAC and NJIT will hold an all day public forum on the dual use of reservoirs for water supply storage and flood control on the date and at the location below. Presentations will be made during the morning on the advantages and disadvantages of the dual use of reservoirs. Written and oral comments and testimony will be accepted during the afternoon.

If testimony concludes before 3:30, the forum will be adjourned early. Pre-registration for the public forum is requested. Pre-registration is required in order to obtain parking passes. To pre-register or for further information on these meetings, please contact Robert Kecskes of the Department's Division of Watershed Management at (609) 777-1053 or rkecskes@dep.state.nj.us, or Professor Eugene Golub of the New Jersey Institute of Technology at (732) 431-4494 or e.golub@worldnet.att.net.

PUBLIC NOTICE

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP) proposes to issue the following New Jersey Pollutant Discharge Elimination System (NJPDDES) permit actions in accordance with N.J.A.C. 7:14A-1 et seq. and by authority of N.J.S.A. 58:10A-1 et seq. The description of each proposed permit action is contained in the accompanying table.

This public notice has been prepared for these facilities as part of the administrative record to be filed at NJDEP, 401 East State Street, Trenton. Copies of the draft document are obtainable, for a nominal charge, and the administrative record is available for inspection by appointment only, Monday through Friday, by contacting the NJDEP file room at (609) 292-0400. Additional information regarding the draft document may be obtained from the contact person listed in the accompanying table.

Comments on the draft document or a request that NJDEP hold a non-adversarial public hearing on the document must be submitted, in writing, to the individual specified below (refer to the accompanying table for the appropriate permitting bureau) during the public comment period, which closes 30 calendar days after publication of this notice. All persons, including permittees who believe that any condition of NJDEP's tentative decision to issue these permit actions is inappropriate must raise all reasonable issues of concern and submit all arguments and factual materials supporting their position during the public comment period. Any request for a public hearing shall state the nature of the proposed issues to be raised in the hearing. A public hearing will be conducted if NJDEP determines there is a significant degree of public interest. If a public hearing is held, the public comment period is automatically extended through the close of the hearing.

NJDEP will consider and respond to all significant and timely submitted comments. The permittee and each person who submitted written comments, will receive notice of NJDEP's final decision to issue, revoke or redraft the document.

Written comments should be submitted to the appropriate permitting bureau:

An average of 2.9 million gallons per day (MGD) of combined process wastewater, sanitary wastewater, cooling tower blowdown, contaminated ground water, contaminated stormwater and intermittent ballast water discharges are collected and treated at the wastewater treatment plant prior to discharge through DSN 001. The discharge from DSN 003 and 004 consists of hydrostatic testing water, untreated stormwater and steam condensate water.

Penn Metal Finishing Co., Inc. NJPDES Permit No. NJ0079251 SIU	700 Jacksonville Rd. Burlington Burlington County	Nilesh Naik Bureau of Pretreatment and Residuals (609) 633-3823	City of Burlington's sewage treatment plant	This application is for an existing discharge of approximately 1000 gallons per day of wastewater from surface preparation operations at the facility in support of architectural finishes on aluminum parts, SIC 3479. The untreated wastewater is discharged to City of Burlington's sewage treatment plant. The permittee is defined as a "job shop" (facility which in a calendar year owns <50% of the material undergoing metal finishing). Hence the operations at this facility are subject to the Federal Electroplating Pretreatment Standards for existing sources (40 CFR 413).

General Permit – Residuals Transfer Facilities NJPDES Permit No. NJ0132519 Residuals Permit – Category ZG	NJDEP Division of Water Quality	James Lunski Bureau of Pretreatment and Residuals (609) 633-3823	State of New Jersey	This general permit is a re-draft of the March 31, 1999 draft general permit which was issued for certain residuals transfer facilities which will temporarily store liquid sewage sludge (which includes domestic septage) prior to transfer to duly permitted or approved residuals management operations for ultimate management, and has been expanded to include the storage and transportation of grease. Grease, which meets the definition of a domestic pollutant, may also be stored and transported under this general permit. The Department has determined that this category requires the same or similar monitoring and/or operating conditions, and is more effectively controlled under a general permit than under individual permits. If finalized, the general permit will not supercede any existing permits that a residuals transfer facility may currently possess. All residuals transfer facilities with existing NJPDES permits will be encouraged to apply for and obtain the general permit, but will have the right to retain their individual permit until permit expiration. Residuals transfer facilities which would be precluded from eligibility for coverage under the final general permit include, but are not limited to, facilities which have a total on-site storage capacity which exceeds 50,000 gallons, facilities which accept dewatered sewage sludge, facilities which perform any type of treatment (including dewatering, but excluding storage) and/or facilities which store and transfer industrial residuals.

Consistent with The Stipulation of Settlement executed on March 30, 1999, this modification extends the schedule of compliance for Chlorine Produced Oxidants (CPO) and Chloroform at Part IV-A.III.D.2. of the permit from “EDP + 36 months” to “EDP + 46 months”.
