Permit Descriptions

CAFRA - A Coastal Area Facility Act permit is required to construct residential, commercial, public, transportation, utility and energy-related facilities in the coastal area as defined by the Act.

Federal Consistency Activity: Certain federal permits, not limited to the U.S. Army Corps of Engineers Dredge and Fill Permits, require certification by the DEP prior to the issuance of the permit by the federal agency.

Freshwater Wetlands: A Permit (Letters of Exemption, Letters of Interpretation, Statewide General Permit, Open Water Fill, Individual, Transition Area Waiver, Water Quality Certificate) is needed prior to engaging in a regulated activity in or around freshwater wetlands and associated transition areas. A Stream Encroachment Permit, a U.S. Army Corps of Engineers Dredge and Fill Permit, and a Water Quality Certification may also be required.

General Groundwater Petroleum Products Cleanup: This general permit authorizes the surface water discharge of treated groundwater previously contaminated with petroleum products.

NJPDES permits: A permit is required for the discharge of pollutants to surface and groundwaters, a discharge from an indirect user or the land application of municipal and/or industrial residuals. (A more comprehensive definition of activities which require a permit may be found at N.J.A.C. 7:14A-2.4)

Solid Waste Facility: A permit is required to conduct or operate any solid waste facility as defined under the Solid Waste Management Act, N.J.S.A. 13:1E-1 et seq., and N.J.A.C. 7:26-1 et seq.

Stream Encroachment: Under the Flood Control Act DEP is empowered to require a permit to control construction within and proximate to flood hazard areas to reduce flood damage to and from new development and to protect the flood storage capacity and ecology of flood plains.

Tidal Wetlands: A Coastal Wetlands Permit is needed to excavate, dredge, fill or erect structures on coastal wetlands.

Treatment Works Approval: A TWA permit is required for the construction, modification or operation of a treatment works, including sanitary/industrial sewage pretreatment or treatment systems, sewage conveyance systems, sewer extensions and subsurface sewage disposal systems.

Waterfront Development: A permit is required for any project involving the development of waterfront near or upon any tidal or navigable waterway in the State.

General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed does not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed inside the back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

PUBLIC NOTICE

Notice is hereby given that the New Jersey Department of Environmental Protection (Department), Site Remediation Program, proposes to issue the following New Jersey Pollutant Discharge Elimination System permit actions in accordance with N.J.S.A. 58:10A-1 et seq. and N.J.A.C. 7:14A-1 et seq.

The permit action prepared by the Department is based on the administrative record which is on file at the offices of the Department, Site Remediation Program, located at 401 East State Street in the City of Trenton, Mercer County, New Jersey. It is available for inspection, by appointment, Monday through Friday, between 8:30 A.M. and 4:00 P.M. Appointment for inspection may be requested in writing to the Bureau of Federal Case Management or by fax at (609) 777-4285. Requests should be made to the attention of the file custodians. Appointments for inspection of the NJPDES file only or requests for a copy of the draft document (at a nominal charge) may be made by calling Central File at (609) 292-0400.

Comments on the draft document or a request that the Department hold a nonadversarial public hearing must be submitted in writing to the person specified below and shall be postmarked within 30 days of the date of this public notice. All persons, including the applicant, who believe that any condition set forth in this document is inappropriate, must raise all reasonable issues and submit all arguments and factual materials supporting their position by the close of the public comment period. Any request for a hearing shall state the nature of the issues to be raised. A public hearing will be conducted whenever the Department determines that there is a significant degree of public interest in the permit decision. If a public hearing is held, the public comment period shall automatically be extended to the close of the public hearing.

The Department will consider and respond to all significant and timely comments. The applicant and each person who has submitted written comments will receive notice of Department's final decision.

Written comments should be submitted to the appropriate permitting bureau:

The treatment system consists of a collection trench at the downgradient (west) side of the site. The trench consists of an impermeable barrier wall and three collection sumps which pump the contaminated ground water to the filtering system which consists of two carbon filtration units. Upon conclusion of the filtering process, the ground water is discharged to two infiltration galleries on the site. The northern gallery discharge water is being injected into the contaminated ground plume and captured by the downgradient trench, however, the southern gallery discharge water is not being injected into the plume and the reinjected water is not being captured by the collection trench.

PUBLIC NOTICE

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP) proposes to issue the following New Jersey Pollutant Discharge Elimination System (NJPDES) permit actions in accordance with N.J.A.C. 7:14A-1 et seq. and by authority of N.J.S.A. 58:10A-1 et seq. The description of each proposed permit action is contained in the accompanying table.

This public notice has been prepared for these facilities as part of the administrative record to be filed at NJDEP, 401 East State Street, Trenton. Copies of the draft document are obtainable, for a nominal charge, and the administrative record is available for inspection by appointment only, Monday through Friday, by contacting the NJDEP file room at (609) 292-0400. Additional information regarding the draft document may be obtained from the contact person listed in the accompanying table.

Comments on the draft document or a request that NJDEP hold a non-adversarial public hearing on the document must be submitted, in writing, to the individual specified below (refer to the accompanying table for the appropriate permitting bureau) during the public comment period, which closes 30 calendar days after publication of this notice. All persons, including permittees who believe that any condition of NJDEP's tentative decision to issue these permit actions is inappropriate must raise all reasonable issues of concern and submit all arguments and factual materials supporting their position during the public comment period. Any request for a public hearing shall state the nature of the proposed issues to be raised in the hearing. A public hearing will be conducted if NJDEP determines there is a significant degree of public interest. If a public hearing is held, the public comment period is automatically extended through the close of the hearing.

NJDEP will consider and respond to all significant and timely submitted comments. The permittee and each person who submitted written comments, will receive notice of NJDEP's final decision to issue, revoke or redraft the document.

Written comments should be submitted to the appropriate permitting bureau:

General Non-Contact Cooling Water Permit NJPDES Permit No. NJ0070203 DSW – Major	Facilities located through-out the State of New Jersey	Ben Manhas Bureau of Point Source Permitting – Region 1 (609) 633-3869	All surface water bodies except those within the Pinelands area and those classified as FW1 or category one (C1) waters.	Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP) proposes to renew a General Permit pursuant to N.J.A.C. 7:14A-6.13 of the New Jersey Pollutant Discharge Elimination System (NJPDES) Regulations. This General Permit is issued in order to authorize the discharge of non-contact cooling water into surface waters of the State or separate storm sewers, except those waters classified as FW-1. The NJDEP has determined that these types of point sources require the same effluent limitations or operating conditions, require the same or similar monitoring conditions, and are more appropriately controlled under a general permit authorization than under individual permits. This permit is issued to allow discharges of non-contact cooling water, cooling tower blowdown and air conditioning condensate water at temperatures not exceeding 86° F (30°C), to State surface waters, except those within the Pinelands area and those classified as FW1 or category one (C1) waters. Discharges of contact cooling and non-contact cooling water with certain biocides such as chlorine or corrosion inhibitors such as Copper, Chromium and Zinc are not covered by this General Permit. These facilities must apply for an individual permit covered by discharge category “B” – Industrial/Commercial Surface Water Discharge and/or category “C” – Thermal Surface Water Discharge. The NJDEP has determined that this category of point sources involves the same or substantially similar types of operations, discharges the same type of wastes, requires the same effluent limitations or operations conditions, requires the same or similar monitoring, and is more appropriately controlled under a general permit than under individual permits. However, discharges of non-contact cooling water which use ground water or surface water as their water source must analyze this water to show that no contamination, other than those pollutants regulated by this permit exists in their cooling water. For potentially contaminated water sources, an analysis to cause an excursion above a water quality standard will be performed by the Department to determine if the pollutant must be regulated. If the analysis indicates that regulation is warranted, the discharger will be deemed not to qualify for this general permit and an individual permit would have to be issued by the Department. The existing NCCW permit expired on July 31, 1999. Therefore, provided that the applicant has filed a timely request for authorization, the conditions of the expired general NCCW permit are continued in force until the effective date of authorization under a general permit renewal, in accordance with N.J.A.C. 7:14A-2.8(a). The Department has prepared a list of facilities that are renewing their authorization or request to be covered by the proposed general NCCW permit. The Department intends to issue individual authorizations for these facilities, upon finalization of this master general NCCW permit.
Shorelands Water Treatment Plant No. 2 NJPDES Permit No. NJ0025461 DSW - Minor	Hunters Lane Holmdel, N.J. Monmouth County	Margaret Elsishans Bureau of Point Source Permitting Region 1 (609) 633-3869	East Creek FW2-NT Raritan Bay	This application is for a renewal of a NJPDES permit to discharge a long term average of 0.03 MGD from DSN001B and 0.002 MGD from DSN002B of treated industrial wastewater.
