## General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed does not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed inside the back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

RESPONSIBLE PARTY CLEANUP ELEMENT  
PO BOX 028  
TRENTON, N.J. 08625

**PUBLIC NOTICE AND STATEMENT OF BASIS**

Notice is hereby given that the New Jersey Department of Environmental Protection (Department), Site Remediation Program, proposes to restrict and control the discharge of water from the United Water Toms River Parkway Wells Numbers 26, 28 and Interceptor Well #26B. The water from these wells are treated by an air stripper and pumped via a 12 inch main to two sets of Granulated Activated Carbon (GAC) Contactors which can be operated in parallel or series mode. The treated water from the GAC Treatment System is conveyed to the Garden State Parkway (GSP) storm sewer headwall structure via approximately 2,200 feet of 12-inch diameter ductile iron pipe. The treated water is piped into a pipeline under the Garden State Parkway on the East Side and discharges to the ground once it exits the pipeline on the West Side of the Parkway. The system design flow is 1,400 gallons per minute. In addition to this continuous flow, a small amount of ground water associated with periodic monitoring related to the Reich Farm plume will be treated and discharged under this permit.

This notice is being given to inform the public that the Department has prepared a draft NEW JERSEY POLLUTANT DISCHARGE ELIMINATION SYSTEM / DISCHARGE TO GROUND WATER (NJPDES/DGW) permit NJPDES NO. NJ7002114 in accordance with the provisions of the New Jersey "Water Pollution Control Act" (N.J.S.A. 58:10A-1 et seq.), its implementing regulations (N.J.A.C. 7:14A-1 et seq.), and the Ground Water Quality Standards (N.J.A.C. 7:9-6 et seq.).

The implementation of the New Jersey Pollutant Discharge Elimination System requirements are the enforcement mechanism by which pollutant discharges are brought into conformance and compliance with laws, regulations and standards. The pollution control requirements are those conditions necessary to restrict the discharge of pollutants and protect the public health and the environment. This particular discharge has no exceedances above standards mandated by the Safe Drinking Water Act, the Ground Water Quality Standards or any Federal Maximum Contaminant Levels. This discharge is being performed as a precautionary measure, since the toxicity of the group of substances found, referred to as "SAN trimer", is unknown. It should be noted that the "SAN trimer" has not been detected in the discharge.

The draft document prepared by the Department is based on the administrative record which is on file at the offices of the Department, Site Remediation Program, located at 401 East State Street in the City of Trenton, Mercer County, New Jersey. It is available for inspection, by appointment, between 8:30 A.M. and 4:00 P.M., Monday through Friday. Information regarding appointments for inspection may be scheduled by calling Richard Yarsinsky at (609)-633-0763.

Interested persons may submit written comments on the draft permit to the Assistant Director, Responsible Party Cleanup Element, PO Box 028, 401 East State Street, Trenton, New Jersey, 08625. All comments shall be submitted within 30 days of the date of this public notice. All persons, including the owner or operator, who believe that any condition set forth in this document is inappropriate, must raise all reasonably ascertainable issues and submit in writing to the Department all reasonably available arguments and factual grounds supporting their position, including all supporting material, by the close of the public comment period. All comments submitted by interested persons in response to this notice, within the public comment period, will be considered by the Department with respect to the requirements being applied to this facility. After the close of the public comment period, the Department will make a final decision. The Department will respond to all significant and timely comments when a final decision is made. The owner or operator and each person who has submitted written comments will receive notice of Department's final decision.

Any interested person may request in writing that the Department hold a nonadversarial public hearing on the draft document. This request shall state the nature of the issues to be raised in the proposed hearing and shall be submitted within 30 days of the date of this public notice to the Assistant Director, Responsible Party Cleanup Element, at the address cited above. A public hearing will be conducted whenever the Department determines that there is a significant degree of public interest in the permit decision. If a public hearing is held, the public comment period in this notice shall automatically be extended to the close of the public hearing.

Additional information concerning the draft NJPDES Permit may be obtained between the hours of 8 A.M. and 4 P.M., Monday through Friday from Bob Marcolina of the Bureau of Case Management at 609-633-7237.

***PUBLIC NOTICE***

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP) proposes to issue the following New Jersey Pollutant Discharge Elimination System (NJPDES) permit actions in accordance with N.J.A.C. 7:14A-1 et seq. and by authority of N.J.S.A. 58:10A-1 et seq. The description of each proposed permit action is contained in the accompanying table.

This public notice has been prepared for these facilities as part of the administrative record to be filed at NJDEP, 401 East State Street, Trenton. Copies of the draft document are obtainable, for a nominal charge, and the administrative record is available for inspection by appointment only, Monday through Friday, by contacting the NJDEP file room at (609) 292-0400. Additional information regarding the draft document may be obtained from the contact person listed in the accompanying table.

Comments on the draft document or a request that NJDEP hold a non-adversarial public hearing on the document must be submitted, in writing, to the individual specified below (refer to the accompanying table for the appropriate permitting bureau) during the public comment period, which closes 30 calendar days after publication of this notice. All persons, including permittees who believe that any condition of NJDEP's tentative decision to issue these permit actions is inappropriate must raise all reasonable issues of concern and submit all arguments and factual materials supporting their position during the public comment period. Any request for a public hearing shall state the nature of the proposed issues to be raised in the hearing. A public hearing will be conducted if NJDEP determines there is a significant degree of public interest. If a public hearing is held, the public comment period is automatically extended through the close of the hearing.

NJDEP will consider and respond to all significant and timely submitted comments. The permittee and each person who submitted written comments, will receive notice of NJDEP's final decision to issue, revoke or redraft the document.

Although several improvements have been made at the facility, the Department has determined that these improvements do not qualify them to obtain the Basic General Stormwater Permit as they requested. However, this draft permit does reflect a significant change in format from the previous permit issued to them by the Department in 1984. The applicant operates a yard for servicing and fueling locomotives. Wastewater generated from the servicing of locomotives in the covered engine terminal is treated through a filtration system and then discharged into a 750,000 gallon retention basin. Run-off from different sections of the facility is also channeled to the retention basin from which it passes through an oil/water separator to a sampling point and is discharged to Gaston Brook. The discharge pipe from the former fueling area to the basin has been sealed due to the construction of a new fueling operation which includes double-walled above ground tanks and a covered fueling structure. The Standard Industrial Classification code for this facility is 4111.</p>
