In addition, this draft permit renewal incorporates NJDEP's determination regarding Section 316(b) of the Federal Clean Water Act, namely the best technology available for the cooling water intake structure to minimize environmental impacts from the withdrawal of Delaware River water. NJDEP contracted outside technical services for assistance with the Section 316(b) review. The waters withdrawn from the Delaware River are limited to 3024 million gallons per day as a monthly average where these waters are used in the permittee's once-through cooling water operations. Numerous Section 316 "Special Conditions" have been retained and/or imposed in this renewal permit in an effort to minimize the environmental impacts associated with this water withdrawal.
