The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

The prepared MRP is intended to conform to a Program 1 residual (N.J.A.C. 7:14A-20.7(h)1) based on the level of pollutant concentration, pathogen reduction and vector attraction reduction achieved. Program 1 MRP is suitable for distribution and marketing as a soil amendment or fertilizer. In accordance with the Administrative Consent Agreement (ACA) executed between the Middlesex County Utilities Authority and the Department on April 4, 2000, this permit requires the permittee to cease the application of MRP generated under this permit to farmland within the State of New Jersey effective October 1, 2002. The conditions of the ACA are reflected in this draft NJPDES permit, including conditions necessary to address the nuisance potential of the prepared MRP, especially the potential to emit objectionable odors upon distribution and application to the land.

3M COMPANY NJ0003255 Storm Water	MONTGOMERY TWP. SOMERSET COUNTY	Brian McLendon Bureau of Nonpoint Pollution Control 609 633 7021	Roaring Brook FW2-NT 02030105110	This is a renewal of an existing permit. The facility is classified as a minor discharger by the Department of Environmental Protection (NJDEP) in accordance with the United States Environmental Protection Agency (EPA) rating criteria. The facility's estimated flow for non-contact cooling water is approximately 11,500 gallons per day (GPD). The facility is located on Sourland Mountain and encompasses approximately 1600 acres. The Hillsborough-Montgomery Township lines bisect the property. The facility primarily produces ceramically coated colored granules that are used for decoration and protection of asphalt roofing products and other surface furnishing. Other quarry products include ballast stone for railroad beds and large rock for seawall and jetty construction. Approximately 250 acres are used for rock quarry and processing operations. The quarry, which has been active since 1961, encompasses approximately 90 acres at the present time. 3M has proposed major modifications to achieve hydraulic control for the stormwater runoff from the site. The facility will construct a series of 6 detention/sedimentation basins to capture the 10-year, 24-hr. precipitation with a minimum seven (7) day settling period. Drainage channels, culverts, and basin overflow structures have been designed to handle a 100-year, 24-hour storm. The proposed stormwater management system will not result in an increase in peak stormwater flow off-site compared to current conditions. The facility operates under Standard Industrial Classification Code (SIC) 3295, Roofing granule manufacturer. The facility also falls under EPA's Effluent Limitation Guideline, Mineral Mining and Processing Point Source Category, Subpart B, Crushed Stone Subcategory, found at 40 CFR Part 436.20.
