## General Information

---

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

**Notice of Rule Proposal**

**PUBLIC NOTICE**

Proposed New Rules: N.J.A.C. 7:1M-2

Proposed Amendment: N.J.A.C. 7:27-8 & 22

Take notice that the NJ Department of Environmental Protection is proposing regulations for participation in the Gold Track tier of the Silver and Gold Track Program for Environmental Performance and amendments to N.J.A.C. 7:27-8, Permits and Certificates for Minor Facilities (and Major Facilities Without an Operating Permit) and N.J.A.C. 7:27-22, Operating Permits. A statement of the substance of the proposal follows: The proposed rules establish the requirements and procedures for participation in the Gold Track tier of the Silver and Gold Track Program for Environmental Performance. This Program is based on achieving environmental excellence through commitments and accountability beyond standard regulatory requirements. The Silver and Gold Track Program consists of three tiers: Silver Track, Silver Track II, and Gold Track. The goal of Gold Track is to foster the continued development and implementation of creative approaches to achieving more efficient and effective environmental performance. Gold Track, once implemented, would be the top performance tier of NJDEP's Silver and Gold Track Program for Environmental Performance. New Jersey's goal in creating this tiered system is to encourage environmentally progressive companies to commit to further reductions in emissions and to adopt environmentally sustainable practices beyond those currently required by federal or State law. In initiating the Gold Track program, NJDEP is pursuing environmental improvements, including but not limited to: reductions of releases of criteria and hazardous air pollutants, carbon dioxide and other greenhouse gases; promoting enhanced management of hazardous wastes; utilization of environmental management systems; water conservation, stormwater management, and an increase in a facility's accountability and communication with the general public and local communities. In return for meeting the stringent entry requirements and environmental commitments of Gold Track, participating facilities would receive certain air pollution control, hazardous waste and water regulatory flexibilities. The Gold Track Program will be limited to no more than nine participants.

The proposal is scheduled to be published in the New Jersey Register dated February 4, 2002. A copy of the proposal is available from the Office of Pollution Prevention and Permit Coordination's web site, <http://www.state.nj.us/dep/opppc/> or by contacting the rule manager, Michael DiGiore at 609-292-3600. Be advised that there may be a fee for obtaining a copy of the proposal from some sources.

A public hearing concerning this proposal will be held at 9:00 a.m. on:

**NOTICE OF PUBLIC COMMENT PERIOD**  
**ON THE PROPOSED ISSUANCE OF A PERMIT MODIFICATION UNDER THE**  
**RESOURCE CONSERVATION AND RECOVERY ACT**

The State of New Jersey, Department of Environmental Protection (NJDEP) has reviewed an application by:

EPA ID NO. NJR 000 035 477

Green Tree Chemical Technologies, Inc.  
50 South Minisink Avenue  
Parlin, N.J. 08858

for the operation of a open pit burner to burn waste nitrocellulose. The open burning unit is regulated as a miscellaneous unit under 40 CFR 264 Subpart X. The application was originally submitted by the previous owner/operator of the facility, Hercules, Inc., to the USEPA Region II.

**THE DRAFT PERMIT MODIFICATION**

The NJDEP issues HWF permits to regulate ongoing activities involving treatment, storage, and/or disposal of hazardous waste. The NJDEP has prepared a draft HWF permit modification and is accepting comments on the draft. The modification involves inclusion of open burning of waste nitrocellulose as an authorized activity under Condition 1 of Section III of this permit and revision of various conditions of the permit to reference related documents and specify appropriate requirements of 40 CFR Part 264 Subpart X (Miscellaneous Units).

**FACILITY DESCRIPTION**

Green Tree Chemical Technologies, Inc. (Green Tree) and its predecessor, Hercules, Inc., have manufactured nitrocellulose, a product resulting from the reaction of cellulose with a mixture of nitric and sulfuric acid, at the Parlin site since 1916. The type of nitrocellulose manufactured at the site is used as an ingredient to produce lacquers and coatings. Waste nitrocellulose is generated at the facility when it is not salable because of failure to meet manufacturing specifications or expired shelf life and not reworkable because of contamination with dirt, wood, or other non-hazardous materials. Waste nitrocellulose is classified as hazardous waste due to its characteristics of ignitability and reactivity. The current hazardous waste facility (HWF) permit issued to Green Tree authorizes storage of waste nitrocellulose in a three-sided concrete containment structure. The proposed modification of the HWF permit would authorize the operation of an existing open pit burner, which is currently operated as an interim status unit, to thermally treat waste nitrocellulose in accordance with applicable hazardous waste regulations found at Parts 260-266, 268 and 270, Title 40 of the Code of Federal Regulations (CFR).

Copper Hill Country Club  NJPDES Permit No. NJ0074128  Ground Water	Copper Hill Road Raritan Twp.  Hunterdon County	John Gray  Bureau of Nonpoint Pollution Control  (609) 633-7021		This is a permit revoke/reissue action. The facility currently operates with a Category T Individual Permit, and this action will replace it with a Category T1 General Permit. Copper Hill Country Club is an existing recreational facility that includes an eighteen (18) hole golf course, swimming pool, restaurant, bar, laundry and locker room. Discharged sanitary wastewater is generated from normal daily operations into a single septic system. The average flow of the facility is 5,400 gallons per day (gpd). The septic system includes a 2,000 gallon grease trap, one (1) 2,000 gallon septic tank, one (1) 1,000 gallon septic tanks, a discharge box and two (2) disposal beds.
Millstone Elementary School  NJPDES Permit No. NJ0103268  Ground Water	Schoolhouse Lane & Millstone Road Clarksburg, NJ  Monmouth County	Keith Howell  Bureau of Nonpoint Pollution Control  (609) 633-7021	II-A	This is a Renewal Permit Action for Millstone Elementary and Middle School. Millstone School serves approximately 875 elementary school students from grades K through 5. The Middle School has an enrollment of approximately 678 middle school students serving grades 6 through 8 for a total enrollment for both schools of 1,553 students. The facility discharges their wastewater through subsurface disposal beds.  Wastewater generated from lavatories and a cafeteria will be managed by an on-site wastewater disposal system. Sanitary wastewater will be discharged to the ground waters of the State via subsurface disposal bed. Flow limitations to the disposal bed are restricted to 18,000 gpd for this facility.
Prudent Publishing Company  NJPDES Permit No. NJ0067482  Ground Water	65 Challenger Road Roxbury Twp., NJ  Morris County	Wayne Froehlich  Bureau of Nonpoint Pollution Control  (609) 633-7021	II-A	This is a renewal permit action. Prudent Publishing Company assembles pre-printed greeting cards and operates under the Standard Industrial Classification (SIC) 2771. The wastewater facility currently serves between 94 to 163 employees on a seasonally varying basis. An expansion project is planned which will increase the employee population to 170. Treated sanitary waste from the facility is discharged to the ground water via a subsurface disposal system. The design wastewater volume of the facility is 6,250 gpd. However, the permittee has demonstrated through actual flow data that the wastewater flows from the facility are less than 2,000 gpd. Therefore, Part III of this permit requires a daily maximum flow limitation of 2,000 gpd.

Such activities include clearing, grading, and excavation. Permit authorization is also necessary for facilities engaged in certain kinds of mining or quarrying. The general permit is being reissued by the Department of Environmental Protection, but authorizations under the permit are issued by Soil Conservation Districts.</p> <p>Permit requirements are based on Stormwater Pollution Prevention Plans (SPPPs), rather than numerical effluent or surface water standards to eliminate or minimize the discharge of pollutants to the environment. The SPPP required by this permit consists solely of a soil erosion and sediment control plan. The Department of Transportation is authorized to certify its own construction projects.</p>

Mr. Reed further explained that Bromicide (Bromtabs) and C-409A were identified in the March 1999 renewal permit application as cooling tower chemicals but they were not included in the final permit. After further review of the renewal application approved by the Department on April 8, 1999, it appears that the renewal process failed to address these cooling water additives. Therefore, the Department proposes to modify the existing permit to include conditions related to the addition of these two additives into the facility's processes.</p>
