**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
GREEN ACRES PROGRAM**

**NOTICE OF PUBLIC HEARINGS
PROPOSED LAND EXCHANGE WITH THE DAISY GARDEN CENTER
HOWELL TOWNSHIP, MONMOUTH COUNTY**

Take Notice that in accordance with *N.J.S.A. 13:1D-51* through *-58*, the State of New Jersey, Department of Environmental Protection, Green Acres Program, will hold two **public hearings** to seek comments on a proposed land exchange between the State of New Jersey and the Daisy Garden Center, a commercial nursery establishment located at 219 Squankum Road in Farmingdale (Howell Township), Monmouth County.

In 1989, the Green Acres Program acquired Block 49, Lot 20.02, a 2.8-acre parcel located along Lakewood-Farmingdale Road in Howell Township, Monmouth County. This property was acquired on behalf of the New Jersey Water Supply Authority (NJWSA) for the operation and maintenance of the Manasquan Reservoir. Although Block 49, Lot 20.02 was never legally conveyed by the Department to the NJWSA, it will be at some point in the future. The NJWSA operates and maintains a 66-inch high-pressure reservoir force main pipeline that runs through the property.

In order to resolve ongoing litigation between the State and the owners of the adjacent Daisy Garden Center concerning the use by the nursery of a portion of Block 49, Lot 20.02, the Department and the NJWSA wish to secure State House Commission approval for the conveyance in fee of 1.3 acres of Block 49, Lot 20.02 in exchange for a 1.6-acre portion of Block 49, Lot 20.01 (currently owned by the Daisy Garden Center). The property to be conveyed by the State to the Daisy Garden Center is currently and will continue to be used as part of the commercial nursery operation. The property to be conveyed by the Daisy Garden Center to the State will be managed by the Department and the NJWSA as part of the Manasquan Reservoir.

The owners of the Daisy Garden Center have also requested an approximately 20-foot wide by 227.5-foot long (approximately 4550 s.f.) easement to allow access by pedestrians, horses and sheep to Block 49, Lot 20.01 from Block 49, Lot 21.01. Restrictions on the access easement will protect the integrity of the underground utilities in this location. As a condition of the land exchange, the Daisy Garden Center has also agreed to place a fence along the new property boundary at its own expense to deter future encroachment.

The **first public hearing** on the proposed land exchange will be held on:

Wednesday, March 5, 2003 at 4:00PM at the
Monmouth County Library Headquarters located at
125 Symmes Drive
Manalapan, New Jersey 07726
(732) 431-7220

The hearing record for the first public hearing will close on March 12, 2003. Interested persons may obtain information from Leilani Hershey in the Green Acres Program at the address below and may submit written comments to Ms. Hershey until the close of business on March 12, 2003.

The **second public hearing** will be held on:

Wednesday, March 19, 2003 at 4 PM at the
Department of Environmental Protection
3rd floor large conference room
501 E. State Street
Trenton, New Jersey 08625

The hearing record for the second public hearing will close on March 26, 2003. Interested persons may obtain information from Leilani Hershey in the Green Acres Program at the address below and may submit written comments to Ms. Hershey until the close of business on March 26, 2003.

Persons wishing to make oral presentations at either of the public hearings are asked to bring a written copy of their comments to the hearing for use by the Department. For further information on the proposed land exchange, please contact:

| Ocean County Landfill NJPDES Permit No. NJ0080021 Ground Water | 2498 Route 70 Manchester Twp., NJ Ocean County | Dwayne Kobesky Bureau of Nonpoint Pollution Control (609) 633-7021 | | The Ocean County Landfill Corporation has applied for the renewal of the New Jersey Pollutant Discharge Elimination System (NJPDES) Discharge to Ground Water permit NJ0080021, which regulates the ground water monitoring program for the landfill cells. The Ocean County Landfill (OCLF) is the only active landfill disposal facility in Ocean County. The Ocean County Landfill Corporation operates the 700-acre land area of which approximately 300 acres are dedicated to waste disposal. The facility accepts municipal; bulky; vegetative; animal and food processing; and dry industrial wastes generated within Ocean County. The OCLF is designed to serve the solid waste disposal needs of Ocean County until the year 2016. The Original Landfill area that was constructed without a liner system is no longer active and has been capped with a final cover system. Cells 1B/2B, 3, 4, 5, 6, and 7 have double composite liners, while Cells 1A and 2A have baseliner systems of clay or clay plus membrane. A primary and secondary leachate collection system has been constructed around the facility encompassing Cells 1-7. Leachate that is collected by the liner system is conveyed to storage facilities and a leachate treatment facility prior to discharge to a local POTW. The storage lagoon is equipped with a liner system consisting of two layers of 80 mil HDPE geomembrane, separated by an HDPE geonet and a secondary monitoring system. A new solid waste facility permit expanded the capacity of the OCLF by increasing the final elevations of the existing landfill by 10 feet and by adding 3 new disposal areas: Cell 8, Cell 9, and a Valley Fill between Cells 6 and 7. These will be constructed with double composite liner systems. |

The Burlington County Board of Chosen Freeholders owns and operates the 522 acre Burlington County Resource Recovery Complex (BCRRC) which is the site of all solid waste management activities undertaken by the county. Landfill No. 1 is a 54-acre clay-lined landfill that commenced operation in February 1989 and reached its permitted design elevation in December 1999. Landfill No. 1 was designed in a series of ten 5.5-acre sections, with systems for leachate containment, collection and treatment. In November 1997, construction of an impermeable landfill cap was completed on 26 of the 54 acres. A final cap on the remainder of the closed landfill will be completed in 2003. Landfill No. 2 is adjacent to, but distinct from, Landfill No. 1. The 69.8-acre Landfill No. 2 will consist of 26 sections ranging in size from 2 to 4.2 acres. It is contemplated that Landfill No. 2 will be constructed in five phases. Landfill No. 2 has been designed with a single composite liner, a leachate collection system, an intermediate and high level leachate recirculation system and an intermediate gas collection system. Landfill No. 2 is expected to provide capacity for the disposal of Burlington County's waste until 2016.</p> |

Administrative offices and a garage/maintenance area will be provided in the existing 2-story frame house and barn respectively. The Willow School 20-year projected maximum occupancy will be 216 students and 35 faculty and staff. The proposed facility has a sanitary wastewater design flow of 4,670 GPD. The wastewater will be discharged to ground water via a on-site wastewater treatment and disposal system employing primary settlement with anaerobic digestion, constructed subsurface flow wetlands with recirculation, recirculating sand bed filtration and subsurface discharge via pressure-dosed disposal beds. The effluent will meet the Ground Water Quality Standards (GWQS) for all parameters of concern except fecal coliform prior to discharge. The applicant contends that the proposed treatment system will provide partial removal of fecal coliform. Unsaturated native soils beneath the disposal area will be utilized to achieve GWQS for fecal coliform.</p> |
