**PUBLIC HEARING NOTICE
DEPARTMENT OF ENVIRONMENTAL PROTECTION**

**GREEN ACRES PROGRAM
NOTICE OF PUBLIC HEARINGS ON PROPOSED LAND EXCHANGE WITH THE
COUNTY OF PASSAIC OF PROPERTY LOCATED IN THE TOWNSHIP OF WEST
MILFORD, PASSAIC COUNTY**

Take Notice that in accordance with N.J.S.A. 13:1D-51 through -58, the State of New Jersey, Department of Environmental Protection, Green Acres Program, will hold two public hearings to seek comments on a proposed land exchange between the State of New Jersey and the County of Passaic of property located in the Township of West Milford, Passaic County.

The Department of Environmental Protection, Division of Parks and Forestry wishes to obtain State House Commission approval to convey portions of Block 3801, Lots 1 and 10 and Block 6002, Lots 33 and 38, in the Township of West Milford to the County of Passaic in order to allow the County to realign and improve approximately one mile of Greenwood Lake Turnpike (County Route 511) from Marshall Hill Road to Awosting Road. The conveyance of State property is required for the improvement of roadway safety, incorporation of water quality facilities and wetlands mitigation. This road project will require approximately 3.15 acres of State land to be transferred to Passaic County in fee and approximately 9.06 acres of slope, drainage, wall, sign, and construction easements. The State properties proposed for exchange were acquired in 1998 by the Department of Environmental Protection for administration by the Division of Parks and Forestry as part of Long Pond Ironworks State Park and Norvin Green State Forest.

Greenwood Lake Turnpike is a two-lane winding road that fails to meet current County and State design standards. The roadway deficiencies have contributed to a number of serious accidents on this section of the Turnpike. Improvements to this one-mile stretch of roadway will include widening of travel lanes and shoulder widths, new guardrail construction, construction of a left turn lane at Awosting and Marshall Hill Roads and reduction of horizontal and vertical roadway curvatures.

As compensation for the proposed taking of State property, Passaic County proposes to abandon a portion of the existing right of way and to acquire a private residence (Block 3801, Lot 11) that will be cut off from the road once the Turnpike is realigned. The areas to be turned over to the State consist of approximately 2.668 acres and will be added to Long Pond Ironworks State Park and/or Norvin Green State Forest. In addition, the County has agreed to make various improvements to the proposed replacement land at its expense. Upon completion of the road realignment, the old roadbed will be excavated by the County, restored to grade and reforested with native shrubs and trees. All overhead utilities will be moved from the abandoned portion of the Turnpike to the new right of way. The County will also demolish the private residence on Block 3801, Lot 11 and construct a gravel parking lot and driveway for fishing access to the Hewitt Brook.

The **first public hearing** on the proposed land exchange will be held on:

Thursday, May 22, 2003 at 6:00PM at the
Township of West Milford Town Hall located at
1480 Union Valley Road
West Milford, New Jersey 07480-1303
(973) 728-7000

The hearing record for the first public hearing will close on May 29, 2003. Interested persons may obtain information from David Smith in the Green Acres Program at the address below and may submit written comments to Mr. Smith until the close of business on May 29, 2003.

The **second public hearing** will be held on:

Thursday, June 5, 2003 at 4 PM at the
Department of Environmental Protection
1st floor Public Hearing Room
401 E. State Street
Trenton, New Jersey 08625

ADMINISTRATIVE CONSENT ORDER

FLOOD HAZARD AREA CONTROL ACT

TAKE NOTICE THAT THE DEPARTMENT OF ENVIRONMENTAL PROTECTION intends to execute an Administrative Consent Order to settle enforcement claims as to specific violations of the FLOOD HAZARD AREA CONTROL ACT, N.J.S.A. 58:16A-50 et seq., and the rules promulgated pursuant thereto, N.J.A.C. 7:13-1.1 et seq.

IN THE MATTER OF: Robert and Tammy Mondgock
SUBJECT PROPERTY: Block 10, Lot 12
 Mansfield Township, Burlington County

Robert and Tammy Mondgock are the owners of the subject property. Robert Mondgock constructed a pond and placed the excavated soils within the floodway and flood plain of Bacon's Run. These activities are regulated by the Flood Hazard Area Control Act and Robert Mondgock did not obtain the required authorization from the Department to conduct these activities. To resolve the violation Robert and Tammy Mondgock will record a permanent declaration of conservation restrictions /easement on the approximately one acre portion of the property affected by the violation. The Department has determined that restoration of the pond and soil placement areas would be more environmentally disruptive than continuing to allow the natural progression of these areas. The conservation restrictions / easement will restrict any activities which would change the character of these areas. The ACO also requires that Robert and Tammy Mondgock pay a penalty of \$1,500.

Comments regarding this proposed Administrative Consent Order, or requests for a copy of the proposed Administrative Consent Order, may be sent to:

Bureau of Coastal and Land Use Compliance and Enforcement

The landfill has a double composite synthetic liner and leachate collection system. Approximately 15,000 gallons per day of the leachate generated is stored in two 62,000 gallon equalization tanks. The leachate is pumped from the equalization tanks to Atlantic County Utilities Authority's wastewater treatment plant for treatment and disposal.</p> <p>A New Jersey Pollutant Discharge Elimination System/Significant Indirect User (NJPDES/SIU) permit was issued on May 31, 1995 for the said discharge. The current permit has a daily maximum flow limitation of 75,000 gallons per day. Due to unforeseen weather conditions and equipment failure, the landfill is facing overflowing of untreated leachate to the groundwater. Hence, the Department, with consent of the wastewater treatment plant, is issuing an emergency permit which will allow the permittee to discharge up to 125,000 gallons per day. The emergency permit will expire 180 days from the effective date of the emergency permit. The rest of the permit limitations and conditions will remain unchanged.</p> <p>Comment period ends 30 days after publication in the Atlantic City Press.</p>

The Department is proposing modification to permit NJ0103721 to likewise delete the limitations and monitoring requirements with regard to methyl Cellosolve incorporated into the existing permit.</p> <p>The facility is engaged in Bulk Medicinal Manufacturing, SIC Code 2833, and is subject to Subpart C of 40 CFR 439. Currently, an average of about 43,620 gallons of process wastewater daily is discharged to the PSA through one outfall, DSN002L. The facility sometimes uses cyanide as a reagent, in which instances the wastewater is treated in place to remove cyanide, and is analyzed for cyanide after treatment but prior to discharge. The measurement location for cyanide inside the plant is known as DSN004L. Wastewater from DSN004L and other plant locations combines and flows into a pretreatment system where it undergoes neutralization, biological treatment, flocculation, sedimentation, sand filtration and, when necessary, carbon adsorption. Domestic wastewater, stormwater from storage areas, demineralizer backwash and non-contact cooling water and boiler blowdown (about 40,914 gallons daily) combine with treated wastewater, which is then pumped to PSA via outfall DSN002L. Monitoring is at the pump station sump to which all these wastewater streams flow.</p> <p>Only the changes being proposed in this draft document are open to comment. All conditions of the existing permit remain in full effect. The comment period ends 30 days after publication in <i>Today's Sunbeam</i> newspaper.</p>

<p>Pfizer, Inc.</p> <p>NJPDES Permit No. NJ0103713</p> <p>SIU</p>	<p>100 Jefferson Rd. Parsippany, NJ 07054</p> <p>Morris County</p>	<p>Gary Torres</p> <p>Bureau of Pretreatment and Residuals</p> <p>(609) 633-3823</p>	<p>Parsippany-Troy Hills Sewerage Utility Sewage Treatment Plant (PTHSU)</p>	<p>This application is for a Major Modification of an existing NJPDES permit to discharge industrial wastewater. The facility is engaged in manufacture of pharmaceutical, cosmetic and health care items, SIC Codes 2834 and 2844. Currently, an average of about 14,100 gallons daily of process wastewater pretreated by chemical addition and dissolved air flotation, and about 10,200 gallons daily of sanitary sewage, is discharged to PTHSU through one discharge location designated 002L. Process wastewater is monitored at the discharge from the pretreatment system (called discharge location 003L) prior to combination with sanitary wastewater. Except for intermittent discharges from battery charging area neutralization and an oil-water separator receiving wastewater from fork truck cleaning (a combined total of less than 100 gallons any one day), process wastewater was entirely subject to 40 CFR 439, the Federal Categorical Pretreatment Standards for the Pharmaceutical Manufacturing Point Source Category.</p> <p>The permittee is proposing a plant expansion and discharge of additional wastewater to PTHSU. The existing and proposed flows through discharge location point 002L would increase to a monthly average of about 70,865 gallons daily, of which about 10,200 gallons daily would be sanitary sewage, about 14,100 gallons daily would be non-contact cooling and utility wastewaters, about 4,000 gallons daily would be from cafeteria operations, and about 42,565 gallons daily would be process wastewater. All of the process wastewater (pretreated by equalization, pH adjustment, chemical precipitation, coagulation/flocculation, and dissolved air flotation), plus the cafeteria wastewater, and 9,600 gallons daily of non-contact cooling and utility wastewaters, would flow through discharge location point 003L. A second equalization process (and possibly other treatment) is expected to be added upstream of discharge location point 003L in 2004, and some or all dilute flows entering the dissolved air floatation operation may be rerouted to this second equalization process, consistent with improving efficiency of the dissolved air floatation operation and overall pretreatment process.</p> <p>In order to address this plants expansion, the Department is proposing to (1) increase the permit limitations for flow at 003L from a monthly average of 0.07 MGD to 0.0793 MGD and from a daily maximum of 0.1 MGD to 0.2314 MGD; and (2) reduce the allowable concentrations of organic chemicals at 003L to compensate for the proposed mixture with wastewaters not subject to 40 CFR 439. The Department also proposes to remove monitoring requirements for cyanide and zinc at 002L, because historical data indicate that concentration of these pollutants are less than 0.2% of the concentrations which - - if present simultaneously in all industrial wastewater discharged to PTHSU - - would hypothetically prevent existing residuals management practices. Only the permit conditions proposed to be modified are open for comment. All pre-existing permit conditions continue in effect and are not proposed to be modified unless noted in this paragraph.</p> <p>Comment period ends 30 days after publication in the <i>Morristown Daily Record</i> newspaper.</p>

Fabricated steel and aluminum products are silk screened and painted, after surface preparation. An average of about 5,060 gallons per day of process wastewater is discharged to CGSTP through one sewer connection, Discharge Location Point (DLP) 001L. The sampling point receives wastewater from parts washing, pretreated by pH adjustment if necessary; and from automatic hoist Iridite and Bonderize operations, pretreated by pH adjustment if necessary and by ion exchange. Because wastewaters have become subject to the Federal Categorical Pretreatment Standard for the Metal Finishing Category (40 CFR 433), the facility is required to obtain a permit. An additional estimated 1000 gallons daily of sanitary wastewater also flows through DLP 001L.</p> <p>A second sewer connection, Discharge Location Point (DLP) 002L, allows discharge of sanitary wastewater (about 140 gallons daily) from the building's office section.
