General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
GREEN ACRES PROGRAM**

**NOTICE OF PUBLIC HEARINGS ON PROPOSED LAND EXCHANGE WITH THE
CTY. OF PASSAIC OF PROPERTY LOCATED IN THE TOWNSHIP OF WEST MILFORD, PASSAIC CTY.**

Take Notice that in accordance with N.J.S.A. 13:1D-51 through -58, the State of New Jersey, Department of Environmental Protection, Green Acres Program, will hold two public hearings to seek comments on a proposed land exchange between the State of New Jersey and the County of Passaic of property located in the Township of West Milford, Passaic County.

The Department of Environmental Protection, Division of Parks and Forestry wishes to obtain State House Commission approval to convey portions of Block 3801, Lots 1 and 10 and Block 6002, Lots 33 and 38, in the Township of West Milford to the County of Passaic in order to allow the County to realign and improve approximately one mile of Greenwood Lake Turnpike (County Route 511) from Marshall Hill Road to Awosting Road. The conveyance of State property is required for the improvement of roadway safety, incorporation of water quality facilities and wetlands mitigation. This road project will require approximately 3.15 acres of State land to be transferred to Passaic County in fee and approximately 9.06 acres of slope, drainage, wall, sign, and construction easements. The State properties proposed for exchange were acquired in 1998 by the Department of Environmental Protection for administration by the Division of Parks and Forestry as part of Long Pond Ironworks State Park and Norvin Green State Forest.

Greenwood Lake Turnpike is a two-lane winding road that fails to meet current County and State design standards. The roadway deficiencies have contributed to a number of serious accidents on this section of the Turnpike. Improvements to this one-mile stretch of roadway will include widening of travel lanes and shoulder widths, new guardrail construction, construction of a left turn lane at Awosting and Marshall Hill Roads and reduction of horizontal and vertical roadway curvatures.

As compensation for the proposed taking of State property, Passaic County proposes to abandon a portion of the existing right of way and to acquire a private residence (Block 3801, Lot 11) that will be cut off from the road once the Turnpike is realigned. The areas to be turned over to the State consist of approximately 2.668 acres and will be added to Long Pond Ironworks State Park and/or Norvin Green State Forest. In addition, the County has agreed to make various improvements to the proposed replacement land at its expense. Upon completion of the road realignment, the old roadbed will be excavated by the County, restored to grade and reforested with native shrubs and trees. All overhead utilities will be moved from the abandoned portion of the Turnpike to the new right of way. The County will also demolish the private residence on Block 3801, Lot 11 and construct a gravel parking lot and driveway for fishing access to the Hewitt Brook.

The **first public hearing** on the proposed land exchange will be held on:

Thursday, May 22, 2003 at 6:00PM at the
Township of West Milford Town Hall located at
1480 Union Valley Road
West Milford, New Jersey 07480-1303
(973) 728-7000

The hearing record for the first public hearing will close on May 29, 2003. Interested persons may obtain information from David Smith in the Green Acres Program at the address below and may submit written comments to Mr. Smith until the close of business on May 29, 2003.

The **second public hearing** will be held on:

Thursday, June 5, 2003 at 4 PM at the
Department of Environmental Protection
1st floor Public Hearing Room
401 E. State Street
Trenton, New Jersey 08625

The hearing record for the second public hearing will close on June 12, 2003. Interested persons may obtain information from David Smith in the Green Acres Program at the address below and may submit written comments to Mr. Smith until the close of business on June 12, 2003.

Persons wishing to make oral presentations at either of the public hearings are asked to bring a written copy of their comments to the hearing for use by the Department. For further information on the proposed land exchange, please contact:

The Department is proposing to issue a Surface Water Major Modification Permit Action to modify the Phosphorus Effluent limits in the existing NJPDES permit.
Lined Surface Impoundment General Permit NJPDES Permit No. NJ0142051 Ground Water	Statewide All Municipalities Statewide	Greg Chin Bureau of Nonpoint Pollution Control (609) 633-7021	II-A	This is a draft general permit which will regulate lined surface impoundments. The lined impoundment must have an outlet structure with a discharge to a surface water body or sanitary sewer or incorporate a closed-loop recycling system that allows for reuse of accumulated pollutants. The outlet must have a NJPDES permit, or not be required to have a permit (example – storm water that does not come into contact with source material, is not a significant contributor and is not a regulated SIC code). If the impoundment has an outlet structure with a discharge to the ground via a ditch, swale or other regulated structure that relies entirely on percolation for disposal, an individual NJPDES-DGW permit is required. This permit is available to facilities that also hold other NJPDES permits (such as surface water, stormwater, residuals or SIU NJPDES permits) Examples of wastes that are eligible to be authorized under the lined impoundment general permit are storm water that comes into contact with source material, non contact cooling water, treated sanitary wastewater, boiler blow down, backwash, car/bus/truck wash water (no engine cleaning, etc).
Herman's Trucking Inc NJPDES Permit No. NJ0137448	181 Jacobstown-Cookstown Rd Wrightstown Boro, NJ Burlington County	Eric Sussman Bureau of Nonpoint Pollution Control (609) 633-7021		This permit action is to revoke the permittee's General Permit Authorization under the General Permit NJ0088315 and issue an individual permit for its existing operations and planned expansion. The expansion is to include a Recycling Center for NJDEP Class B recyclable material including concrete, pavement, wood stumps/shrubs and leaf/yard waste (vegetative compost). The above named applicant has applied for a New Jersey Pollutant Discharge Elimination System (NJPDES) permit Revocation and Reissuance to the New Jersey Department of Environmental Protection (NJDEP), Bureau Nonpoint Pollution Control. A location map of the facility is included. The applicant is engaged in composting and is regulated under the Standard Industrial Classification (SIC) 2875. The proposed permit regulates discharges to surface water (DSW), specifically stormwater discharges to the North Run tributary of Crosswicks Creek, classified as FW2-NT and ground water discharges (DGW) to the Kirkwood Formation classified as II-A.

Econo Lodge Motel NJPDES Permit No. NJ0074977 Ground Water	5309 Highway 33&34 Wall Twp., NJ Monmouth County	John Gray Bureau of Nonpoint Pollution Control (609) 633-7021	II- A	This is a permit renewal action for a NJPDES Discharge to Groundwater Individual permit. Econo Lodge is a thirty (30) room motel that includes a manager's apartment and laundry facilities. The design flow of the facility is 5,900 gpd. Sanitary wastewater generated by the facility is treated to Groundwater Quality Standards (GWQS) for Nitrate-Nitrogen by the onsite treatment system. Treated effluent is then discharged to groundwater via a 3,933 square foot disposal field. The GWQS compliance point for Fecal Coliform shall be at downgradient monitoring well, MW-1.

The Schundler Company was unable to comply with the conditions of the general permit, by the failure to eliminate all source material exposure to stormwater. The individual permit allows for minimal exposure of source materials to stormwater, as well as monitoring requirements for the receiving water, Mill Brook (FW2-NT), and the development of a Stormwater Pollution Prevention Plan designed to minimize source material exposure.
Brass Castle Estates NJPDES Permit No. NJ0068829 Ground Water	Country Route 579 Union Twp., NJ Hunterdon County	Keith Howell Bureau of Nonpoint Pollution Control (609) 633-7021	II- A	This is a draft renewal permit for Brass Castle Estates which is a residential community consisting of 72 single-family dwellings. An on-site sewage treatment and disposal system manages the sanitary effluent from all 72 homes. The treatment system has been designed to meet the Ground Water Quality Standards for all associated parameters except for fecal coliform. Although disinfection will be provided at the treatment plant, the Ground Water Quality Standards (GWQS) for fecal coliform will be achieved by utilizing the unsaturated, native soils beneath the disposal area. Disposal to the ground waters of the state will be achieved via the subsurface disposal beds.
U.S. Pipe & Foundry Co. NJPDES Permit No. NJ0081931 Ground Water	East Pearl Street Burlington City, NJ Burlington County	Judy Majoras Bureau of Nonpoint Pollution Control (609) 633-7021	II- A	Units regulated under the NJPDES-DGW Permit No. NJ0081931 renewal are the industrial landfill, and potential discharges to ground water from a "blackening pond" and a cement recycling basin which serves as a settling pond through which stormwater and industrial wastewater is routed prior to discharge to the Burlington City Sewage Treatment Plant. U.S. Pipe casts ductile pipe in centrifugal molds. Following casting, the pipe is lined with cement and painted in separate buildings, and stored outdoors prior to shipping.

Erie Landfill NJPDES Permit No. NJ0141453 Ground Water	North Arlington Boro, NJ Bergen County	Fritz Wise Bureau of Nonpoint Pollution Control (609) 633-7021		Erie Landfill is a new 37-acre site located in the Borough of North Arlington, Bergen County. This permit action is for a new NJPDES-DGW permit. Historically the site received unregulated random deposits of solid waste through the 1950's and early 60's. Much of this waste remains today. The landfill receives nonhazardous Type 13-bulky waste and Type 27-dry industrial waste. The landfill is expected to be full by 2006. The landfill is designed so that no leachate migrates into the surrounding natural ground or surface waters. A 3-foot thick subsurface retaining wall surrounds the landfill and a very thick, naturally impermeable formation of clay underlies the entire site making vertical or lateral migration of leachate below the bottom very unlikely. All leachate produced by rainfall on the site is to be collected by an underdrain system from within this bowl-like structure. Collected leachate is pumped to the Passaic Valley Sewerage Commissioner's sewage treatment plant in Newark for treatment and disposal. In the unlikely event any leachate leaks through the containment structure, ground water in the Brunswick formation could be impacted as well as the South River.
Valero Refining Company NJPDES Permit No. NJ0085502 Ground Water	800 Billingsport Rd. Paulsboro Boro, NJ Gloucester County	Judy Majoras Bureau of Nonpoint Pollution Control (609) 633-7021	II- A	NJPDES-DGW Renewal Permit No. NJ0085502 regulates possible discharges to ground water from an unlined landfill and from stormwater basins at the Valero oil refinery. The facility is undergoing corrective action of ground water contamination, including floating product, under the guidance of the Department's Site Remediation Program. Because of the floating product at the water table, and the ongoing corrective action which maintains hydraulic control of the contaminant plume, this permit does not require sampling of ground water until such time as there is no measurable product. At that time, the permittee will be required to follow a Ground Water Protection Program (GWPP). The submission of a GWPP plan is a requirement of this permit.
Valero Refining Company NJPDES Permit No. NJ0005029 DSW Major	800 Billingsport Road Greenwich Township, Gloucester County, NJ 08060 Burlington County	Susan Rosenwinkel Bureau of Point Source Permitting Region 2 (609) 292-4860	Delaware River Zone 2 Delaware River Basin	The proposed permit action is a modification to an existing permit which authorizes the discharge of process wastewater and stormwater. The proposed permit modification serves to modify the effluent limitation for total dissolved solids (TDS) for process wastewater at discharge serial number 001A. The permittee has requested this modification since the amount of TDS in the effluent discharged via discharge serial number 001A will be affected by the installation of a new air pollution control device.

Arthur Stanlick School NJPDES Permit NJ0021105 DSW Minor	East Shawnee Trail Lake Shawnee Jefferson Twp, NJ 07885 Morris County	Jason Lonardo Bureau of Point Source Permitting Region 1 (609) 633-3869	Lake Shawnee via an Unnamed Tributary FW2-NT (C2) 02040105150020	This application is for the renewal of a NJPDES permit to discharge an average of 0.004 MGD of treated domestic wastewater.
Musconetcong SA W.P.C.P. NJPDES Permit No. NJ0027821 DSW Major	Continental Drive Mount Olive, NJ 07828 Morris County	Jason Lonardo Bureau of Point Source Permitting Region 1 (609) 633-3869	Musconetcong River FW2-TM (C2) 02040105150030	This application is for a modification of a NJPDES permit to grant a six (6) month extension to the permittee for completion of the Industrial Pretreatment Program requirement under Part IV Section F.3.b. of the permit. This Section of the permit requires that the permittee conduct a local limits evaluation within one (1) year of the effective date of the March 2002 renewal permit. This modification proposes to allow the permittee eighteen (18) months from the effective date of the renewal permit in order to complete the noted activity.
Gloucester Co Solid Waste NJPDES Permit No. NJ0103420 Ground Water	493 Monroeville Road Swedesboro Boro, NJ Gloucester County	Doug Carroll Bureau of Nonpoint Pollution Control (609) 633-7021	II- A	Gloucester County Solid Waste Complex has applied for the renewal of the New Jersey Pollutant Discharge Elimination System (NJPDES) Discharge to Ground Water permit NJ0103420, which regulates the monitoring wells of the landfill cells. The Gloucester County Improvement Authority began the operation of their 54 acre sanitary landfill in 1987. Since that time, the site has served Gloucester County, providing a disposal area for waste generated by the county and from other areas. The actual complex consists of the landfill proper and other structures that support the operation including the scale house, a three-bay maintenance garage, two leachate storage tanks in concrete basins, a landfill gas recovery system, an administrative building, stormwater basins, a fire pond and an equipment storage shed, which is currently under construction. The facility accepts waste types 10, 13, 13C, 23, 25, 27, 27A, 27I and treated regulated medical wastes. The total estimated capacity of the sanitary landfill, upon completion of the final phases, is 3.6 million cubic yards. The landfill is expected to reach capacity in the year 2011. Final elevation of the landfill is scheduled to be 229 feet above mean sea level (msl). Landscaping at the landfill is done as needed when grass and plants grow around the monitoring wells.
Bristol-Myers Squibb Company NJPDES Permit No. NJ0000795 DSW Major	311 Pennington-Rocky Hill Rd Hopewell Twp, NJ 08534-2130 Mercer County	Robert Hall Bureau of Point Source Permitting Region 2 (609) 92-4860	Stony Brook via Unnamed Tributary FW2-NT Stony Brook	This application is for a modification of a NJPDES permit to discharge an average flow of 0.07 million gallons per day (MGD) of treated commingled industrial, sanitary wastewater, and some wastewater. This modification is to authorize the facility to reuse its treated effluent for make-up water in its on-site cooling towers. This type of reuse activity would be classified as Category IV – RWBR-Industrial Systems in accordance with the January 2003 Draft Technical Manual for Reclaimed Water for Beneficial Reuse. No changes to limitations are being made during this permit action.

Armotek Industries NJPDES Permit No. NJ0053171 SIU	1 Roto Ave Palmyra NJ 08065 Burlington County	Gary Torres Bureau of Pretreatment and Residuals (609) 633-3823	Borough of Palmyra Sewage Treatment Plant (PSTP)	The existing facility is engaged in engraving and electroplating printing cylinders, SIC Codes 2796 and 3471. Approximately 2300 gpd of wastewater from these operations is discharged to the PSTP through Discharge Location Point (DLP) 001L after pretreatment by chemical addition, neutralization, flocculation, settling and skimming. About 100 gpd of untreated non-contact cooling water is discharged to PSTP through DLP 002L. Domestic sewage goes to DLP 003L. The Department is proposing to delete the existing limitation (but not the monitoring requirement) for total chromium discharged through DLP 001L. The existing limitation was based upon a rescinded limitation for chromium in the sludge of the receiving sewage treatment plant. Only the proposed change is open to comment. All conditions of the existing permit remain in full effect. Comment period June 12, 2003.
