In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

GREEN ACRES PROGRAM

NOTICE OF PUBLIC HEARINGS

Take Notice that in accordance with *N.J.S.A. 13:1D-51* through *-58*, the State of New Jersey, Department of Environmental Protection, Green Acres Program, will hold two **public hearings** to seek comments on a proposed sale of property in located in the Town of Hackettstown, Warren County.

The Department of Environmental Protection, Division of Fish and Wildlife wishes to obtain State House Commission approval to convey up to a 42-acre portion of Block 107, Lot 37 in the Town of Hackettstown, Warren County to Centenary College. The conveyance was requested by the college in order to alleviate a dire shortage of athletic facilities for students at the college. If the proposed sale is concluded, Centenary College will construct on the property three multipurpose athletic fields, including lighting, bleachers, a gravel parking area and a small building to house equipment storage, offices and rest room facilities. The property will be conveyed to Centenary College with development restrictions.

The property proposed for sale was acquired by the State in 1914 as part of a larger 167-acre parcel acquired with proceeds of the Hunters and Anglers License Fund. It is currently administered by the Department of Environmental Protection, Division of Fish and Wildlife as part of the Charles O. Hayford State Fish Hatchery. Of the 42 acres that may be conveyed, 25 are currently farmed and the remainder are wooded. If more than 25 acres are sold, the wooded portions of the property will be restricted as buffer areas to the athletic fields. The Department of Environmental Protection has no current plans to expand hatchery operations onto this property.

The compensation for the proposed sale is currently under negotiation. However, Centenary College will pay the State at least the fair market value of the property as determined by two appraisals to be commissioned by the State.

The **first public hearing** on the proposed sale will be held on:

Wednesday, August 20, 2003 at 6:00 PM at the

Landfill Site 1e NJPDES Permit No. NJ0056146 Ground Water	Boro of North Arlington and Town of Kearny Bergen County	Fritz Wise Bureau of Nonpoint Pollution Control (609) 633-7021	II- A	Site 1E is a 400 acre closed landfill located in the Borough of North Arlington, Bergen County and a small part of the town of Kearny in Hudson County. Historically the surrounding area received unregulated random deposits of solid waste through the 1950's and early 60's. Much of this waste remains today. The landfill contains nonhazardous Type 10 - household, commercial, and industrial waste; Type 13 - bulky waste; Type 23 - vegetative waste; Type 25 - animal and food processing waste; and Type 27 - dry industrial waste. The landfill is designed so that no leachate migrates into the surrounding natural ground or surface waters. A 3-foot thick subsurface retaining wall surrounds the landfill and a very thick, naturally impermeable formation of clay underlies the entire site making vertical or lateral migration of leachate below the bottom very unlikely. All leachate produced by rainfall on the site is to be collected by a perimeter drain system from within this bowl-like structure. Collected leachate is pumped to the Passaic Valley Sewerage Commissioner's sewage treatment plant in Newark for treatment and disposal. In the unlikely event any leachate leaks through the containment structure, ground water in the Brunswick formation could be impacted as well as the Hackensack River.

Building 2 will consist of 40,000 sq. ft. of warehouse and 10,000 sq. ft. of office space and will employ 50 persons. Building 3 will consist of 80,000 sq. ft. of warehouse and 20,000 sq. ft. of office space and will employ 58 persons. Building 4 will consist of 64,000 sq. ft. of warehouse and 16,000 sq. ft. of office space and will employ 47 persons. The design flow did not include restaurants or food services, therefore, no restaurants or food services are permitted at the facility. The proposed facility has a sanitary wastewater design flow of 19,900 GPD. The wastewater will be directed to an on-site wastewater treatment and disposal system employing a bioreactor, microfiltration and ultraviolet disinfection. Wastewater disposal is facilitated through two subsurface disposal beds with a total area of 9,600 sq. ft. The effluent discharged to the disposal beds will meet the Ground Water Quality Standards (GWQS) for all parameters of concern. The facility intends to use treated effluent for fire protection and landscape purposes and will follow the guidelines and limitations outlined in the Reclaimed Water for Beneficial Reuse (RWBR) Technical Manual. Approximately 500,000 gallons of on-line storage is proposed for fire protection (Industrial systems, maintenance operations and construction) and landscape irrigation. The wastewater will meet the fire protection and spray irrigation (public access) quality limits required by the NJDEP's Effluent Reuse Treatment Guidelines within the RWBR manual.
