In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

Based on Discharge Monitoring Report (DMR) data taken from March 2001 to April 2003, approximately 0.58 MGD of wastewater was discharged to Hammonton Creek. The Department and the Town of Hammonton (Hammonton) executed an Amended Administrative Consent Order (AACO) on February 3, 1998, which was executed as a Judicial Consent Order (JCO) that was approved by the Superior Court of New Jersey on May 15, 1998. Based on the Pinelands Comprehensive Management Plan, N.J.A.C. 7:50-6.81 requiring Hammonton to cease the surface water discharge, the AACO mandated Hammonton to re-route their treated effluent to discharge to groundwater. Currently, a portion of the plant effluent is directed to a lined surface impoundment and slit trench land application system which discharges to ground water. As part of the AACO, a schedule to eliminate the Hammonton STP's surface water discharge by fully implementing the use of the groundwater disposal facility is planned. However, since effluent continues to be discharged to Hammonton Creek the Department is proposing to renew the discharge to surface water permit, which expired on November 30, 1991, to bring the permit conditions up to date with current rules and regulations. It is the intent that plant effluent will eventually be solely discharged to ground water (DGW) and shall be regulated under the existing NJPDES permit number NJ0104990. If there are any questions regarding the NJPDES/DGW permit, contact the Bureau of Nonpoint Pollution Control at (609) 633-7021.
