General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

**NOTICE OF PUBLIC COMMENT PERIOD
ON THE PROPOSED ISSUANCE OF A PERMIT MODIFICATION UNDER THE
RESOURCE CONSERVATION AND RECOVERY ACT**

The State of New Jersey, Department of Environmental Protection (NJDEP) has reviewed an application for the modification of a hazardous waste facility (HWF) permit submitted by:

E.I. du Pont de Nemours and Company, Inc. (Dupont Chambers Works)
RT 130
Block 185, Lot 1
Carneys Point Twp., Salem County
EPA ID No. NJD002385730

for the authorization of construction and subsequent operation of an additional land disposal unit at the existing hazardous waste landfill.

FACILITY DESCRIPTION

DuPont Chambers Works is authorized to operate a hazardous waste disposal facility, Secure C Landfill, at the Chambers Works site. Secure C Landfill is used to dispose of sludge filter cake generated by the onsite wastewater treatment plant and other various types of bulk hazardous and non-hazardous waste from onsite and offsite DuPont sources as specified by the operating permit. Operating areas consist of landfill cells 2, 3, 4, and 5A.

THE DRAFT PERMIT MODIFICATION

The NJDEP issues HWF permits to regulate ongoing activities involving treatment, storage, and/or disposal of hazardous waste. The NJDEP has prepared a draft HWF permit modification and is accepting comments on the draft. This draft permit modification will serve to authorize the construction and subsequent operation of landfill cell 5B within Area V of Secure C Landfill. Area V is designed as a state of the art double composite liner system equipped with leachate collection and leachate leak detection systems. Cell 5B has been designed to tie into existing landfill components of Cell 5A to maintain a continuous barrier between disposed materials and native soils and groundwater.

The permit modification application also includes details of a modified stormwater management system intended to be implemented on the landfill site. This system will provide additional capacity to control stormwater within the landfill during severe weather events by providing a separate conveyance piping system for generated rainwater to keep it isolated from landfill leachate.

This permit modification also serves to memorialize a Class 1 permit modification notification submitted by the permittee by letter dated November 19, 2002, which substituted the use of high density polypropylene in place of Hypalon geomembrane in the side slope cover system for Area IV of Secure C Landfill and provided an updated contingency plan for the landfill site.

The permit modifications are being made to the permittee's HWF permit as per request made by the permittee by letter dated May 9, 2003.

WHERE TO OBTAIN ADDITIONAL INFORMATION

Copies of the application for the modification and the draft permit modification are available at the NJDEP's offices in Trenton and at Dupont Chambers Works. Anyone wishing to obtain a copy of a fact sheet on the facility, the draft permit modification, and/or further information, or to arrange to review the administrative record should first contact:
