NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
GREEN ACRES PROGRAM
NOTICE OF PUBLIC HEARING ON PROPOSED CONVEYANCE TO
SOUTH JERSEY GAS OF NATURAL GAS PIPELINE EASEMENT THROUGH DEP
PROPERTY
LOCATED IN THE TOWNSHIP OF WEYMOUTH, ATLANTIC COUNTY

Take Notice that in accordance with *N.J.S.A. 13:1D-51 through –58*, the State of New Jersey, Department of Environmental Protection (Department), Green Acres Program, will hold a **public hearing** to seek comments on a proposed conveyance of a natural gas pipeline easement through property owned by the State of New Jersey and located in the Township of Weymouth, Atlantic County.

The Department's Division of Fish and Wildlife (Division) wishes to obtain State House Commission approval to convey a 15-foot wide permanent natural gas pipeline easement through Block 120, Lots 1, 1.01, 1.02 and 1.04 in the Township of Weymouth, Atlantic County to South Jersey Gas Company. The properties in question were purchased by the State in 2000 and are administered by the Division as part of the Great Egg Harbor River Wildlife Management Area. South Jersey Gas has requested the easement to allow the installation of a new 24-inch natural gas transmission pipeline as part of the extension of its major feed line from west to east. Extension of the line is necessary to ensure continuing reliable natural gas service and to serve increasing residential, commercial and industrial demand in Atlantic County. The proposed easement will cover a linear distance of 6500 feet (1.2 miles), resulting in a total proposed easement area of 2.24 acres.

The entire South Jersey Gas project corridor is 12 miles long and extends from the terminus of the company's transmission system in Estell Manor, eastwardly through the municipalities of Weymouth, Hamilton and Egg Harbor Townships. Phase I of the project (5 miles) is now complete; the proposed easement is part of Phase II of the project (7 miles). On the State properties in the project corridor, South Jersey Gas proposes to install the new pipeline entirely within the 100-foot cleared portion of an existing 200-foot wide overhead electric transmission line right of way owned by Connectiv. This portion of the Connectiv right of way has been occupied for several decades by electric transmission towers and lines. South Jersey Gas also seeks permission to use a 60-foot wide area parallel to the proposed easement as temporary work space. During construction, South Jersey Gas will utilize directional boring and other techniques as necessary and appropriate to avoid wetlands areas within the project corridor and minimize disturbance.

As compensation for the proposed easement and temporary work space, South Jersey Gas proposes to pay the State of New Jersey \$50,000 to be used for acquisition of open space in Atlantic County. As a condition of approval of the proposed easement and of various Department permits required for the pipeline project, South Jersey Gas would also undertake substantial mitigation and restoration activities on the State properties.

The **public hearing** on the proposed easement will be held on:

Thursday, June 3, 2004 at 7:00 PM
(to 9:00 PM or close of testimony, whichever comes first) at the
Weymouth Township Municipal Building located at
45 South Jersey Avenue
Dorothy, New Jersey 08317
(609) 476-2633

The hearing record for the public hearing will close on June 17, 2004. Interested persons may obtain information from Michael E. Heenehan in the Green Acres Program at the address below and may submit written comments to Mr. Heenehan until the close of business on June 17, 2004.

Persons wishing to make oral presentations at the public hearing are asked to bring a written copy of their comments (if available) to the hearing for use by the Department. For further information on the proposed easement, please contact:

The middle school accommodates approximately 800 students and faculty. Delsea High School accomodates approximately 1325 students and faculty. The combined wastewater from the schools is processed by an on-site wastewater treatment plant located on the Delsea Middle School property and discharged to a subsurface disposal bed.
Brass Castle Satellite Stores NJPDES Permit No. NJ0065196 Ground Water	Washington Twp., NJ Warren County	Mike Pigliacelli Bureau of Nonpoint Pollution Control (609) 633-7021	II-A	This is a renewal permit for Brass Castle Satellite Stores which consists of four retail units occupying 19,350 ft2. Presently, the stores are unoccupied. Previously the units were occupied by a pharmacy, a sporting goods store, and a video rental store. The discharge to ground water via a subsurface disposal system.

Verducci's Specialty Market Plaza NJPDES Permit No. NJ0108294 Ground Water	176 US Highway 202 Raritan Twp., NJ Hunterdon County	Keith Howell Bureau of Nonpoint Pollution Control (609) 633-7021	II- A	Verducci's Specialty Market Plaza formerly known as Dutch Country Farmers Market is an existing retail stores, offices and grocery store located on a 5.09 acre site. Verducci's Specialty Market Plaza has applied for a New Jersey Pollutant Discharge Elimination System - Discharge to Ground Water (NJPDES-DGW) permit. The area for the facility is 40,133 square feet retail and 1,107 square feet office space for a total of 41,240 square feet. Sanitary wastewater generated from this facility is treated by an on-site recycling wastewater treatment plant (WTP) and discharged to the ground waters of the state via two (2) subsurface disposal beds totaling 1980 square feet. (2 disposal beds x 990 square feet each = 1980 square feet) The WTP is a treatment and a recycling system that reuses treated water as toilet flush water. The design capacity of the WTP was based on the design criteria for flows when the TWA was issued in 1987. However the disposal capacity of the facility is 1250 gal/day. There are two 990 square foot disposal beds. One of the disposal beds is used for the primary disposal. The second disposal bed is strictly a reserve disposal bed as stated in the "Engineer's Report" dated December 21, 1994. The wastewater travels from the stores/offices to a primary treatment area, which includes a grease trap and equalization tank. The treated wastewater then enters the WTP where it under goes primary treatment, polishing and disinfection. The treated wastewater is then recycled to be used as toilet flush water in the store/office complex. The excess wastewater not used in recycling is treated and sent to the subsurface disposal beds. Residuals are removed on a periodic basis and managed off-site by an approved management facility.
