NJPDES Master General Permit NJPDES Permit No. NJ0132519 Residuals Transfer Facility General Permit Renewal (Category ZG)	NJDEP-Division of Water Quality 401 East State St. Trenton, NJ 08625 Mercer County	Jim Lunski Bureau of Pretreatment and Residuals (609) 633-3823	N/A	Notice is hereby given that the New Jersey Department of Environmental Protection (Department/NJDEP) proposes to Renew a New Jersey Pollutant Discharge Elimination System (NJPDES) Residuals General Permit (NJPDES Permit No. NJ0132519) in accordance with N.J.A.C. 7:14A, and by the authority of the Water Pollution Control Act at N.J.S.A. 58:10A-1 <u>et seq.</u>, for Residuals Transfer Facilities. The general permit applies specifically to residuals transfer facilities which will temporarily store liquid sewage sludge (which includes domestic septage) and grease (which meets the definition of a domestic pollutant) prior to transfer to duly permitted or approved residuals management operations for ultimate management, and will establish minimum conditions for temporarily storing liquid sewage sludge and grease prior to transfer to duly permitted or approved residuals management operations for ultimate management. A residuals transfer facility can be any operation, device or system at which liquid sewage sludge is transferred from collection vehicles to any type of permanent/fixed on-site storage unit (this includes fixed frac tanks) and then to haulage vehicles. It is not the intention of the Department to permit facilities/operations which convey sewage sludge directly to a licensed and registered haulage vehicle from a collection vehicle without making use of a permanent/fixed on-site storage unit. The general permit, through a letter of authorization, will also restrict the quantity of liquid sewage sludge which can be stored on-site to that quantity approved for each storage unit by the Department through a Treatment Works Approval. However, to qualify for the general permit, the quantity of on-site storage shall not exceed fifty thousand (50,000) gallons. The draft general permit prepared by the Department is based on the administrative record which is on file at the offices of the Department, located at 401 East State Street, Trenton, Mercer County, New Jersey. It is available for inspection, by appointment only, between 8:00 A.M. and 4:30 P.M., Monday through Friday. Appointments for inspection may be scheduled by calling (609) 633-3823. This draft general permit can also be viewed or downloaded on the Division of Water Quality website at http://www.state.nj.us/dep/dwq/gp_residuals.htm. Comments must be submitted in writing by certified mail (return receipt requested), or by other means which provides verification of the date of delivery to the Department, to Attention: Comments on Public Notice NJ0059986, Bureau of Pretreatment and Residuals, P.O. Box 029, Trenton, NJ 08625 by the close of the public comment period, which closes thirty calendar days after publication of this notice in the last newspaper. All persons, including the permittee, who believe that any condition of this draft document is inappropriate or that the Department's decision to issue this draft document is inappropriate, must raise all reasonable arguments and factual grounds supporting their position, including all supporting materials, during the public comment period. Additional information concerning the conditions of the general permit (NJPDES permit No. NJ0132519) may be obtained between the hours of 8:00 A.M. and 4:30 P.M., Monday through Friday from Jim Lunski, Bureau of Pretreatment and Residuals, at (609) 633-3823.
