NOTICE INTENT TO SETTLE

Take notice that the Department of Environmental Protection (DEP) is proposing to enter into a settlement agreement with George Harms to resolve appeal of DEP's February 15, 2002 denial of a Waterfront Development Permit Application #1308-90-0009.6 The original application proposed the expansion of an existing 2 foot wide catwalk and legalization of an oversized dock in documented shellfish habitat off shore of block-87, lot-5 Borough of Brielle, Monmouth County. Through negotiations with the applicant, an alternative site plan was devised that reduced the amount of water coverage while still providing a viable project that also mitigated for occupation of shellfish habitat.

The work as authorized includes: payment to the shellfish mitigation fund of \$928.69; allows the existing catwalk to be widened to 3 feet; requires the petitioner to replace all existing creosote piles with poles constructed of non-polluting material; construct the catwalk and dock structures of non-polluting material; widen the existing dock to 8-feet in width and reduce the L portion of the existing dock to 8-feet in width.

All work as allowed by the proposed settlement is represented on a plan entitled "Plan to Accompany NJDEP Application, Lot-5, Block-87, Borough of Brielle, Monmouth County, New Jersey." Prepared by Michael B. Intile, dated August 24, 2001 and revised to October 10, 2003.

NOTICE OF INTENT TO AMEND SETTLEMENT OF APPEAL**

Notice is hereby given that the New Jersey Department of Environmental Protection ("NJDEP") intends to amend the November 17, 2003 Mediation and Settlement Agreement in Lieu of a Permit for LURP File #1503-03-0001.1 (CAF 030001 & FWW 030002). The site is known as block 188.02, lots 1.02 & 1.03 in Beach Haven Borough, Ocean County. The amended settlement will allow the applicant, Burris & Straus Beach Development, LLC, to reduce the number of new residential properties from 19 to 18. The amended development plan includes extension of the paved portion of 8th Street by 11 feet and slight reconfiguration of certain elements including the westerly access drive, one stormwater management swale, and sidewalks and vegetation in the vicinity of unit 18. installed in a trench 10 inches wide to a burial depth of 4 feet below the existing seabed outside navigation channels, 17 feet below the authorized depth within federal navigation channels and 12 feet below the seabed in an area near Sandy Hook. The cables will be installed using a water jetting technology. Cable installation and maintenance will be undertaken in accordance with New Jersey's submerged cable regulations.

The submarine transmission cable will connect two AC to DC conversion facilities, one to be constructed in Sayreville, Middlesex County, New Jersey and the other in North Hempstead, Long Island, New York; the facilities providing for interconnection with existing regional transmission networks. The Sayreville converter station is to be constructed on a parcel, adjacent to the Reliant Energy Generating Station, located at Block 175, Lot 12.02 in the Borough of Sayreville, Middlesex County.

In addition approximately 2,500 feet of alternating current (AC) cable will be installed via trenching within an existing right of way for a natural gas pipeline to connect the Sayreville converter station to a proposed 0.5 acre switchyard to be constructed at the Jersey Central Power and Light (JCP&L) Sayreville substation. Both the right of way and the substations are located at Block 174, Lot 1 in the Borough of Sayreville. The AC cable route will result in temporary disturbance of a tidal wetlands buffer.

Dredging of approximately 95,757 cy is proposed in areas of the cable route that transect federal navigation channels in the Raritan River and Raritan Bay—and in the trench box installation area in the Raritan River adjacent to the Sayreville property. The material will be removed using a combination of closed clamshell environmental bucket and hopper dredge, placed in dredge scows for transport to an upland beneficial use site in New Jersey.

Comments regarding the Waterfront Development Permit application, or requests for copies of the permit application, may be sent to Suzanne U. Dietrick, Chief, New Jersey Department of Environmental Protection, Office of Dredging and Sediment Technology, P.O. Box 028, Trenton, NJ 08625-028, telephone (609) 292-8838. **DEPARTMENT OF ENVIRONMENTAL PROTECTION
GREEN ACRES PROGRAM
NOTICE OF PUBLIC HEARINGS ON
PROPOSED LAND EXCHANGE WITH THE COUNTY OF MONMOUTH**

Take Notice that in accordance with *N.J.S.A. 13:1D-51* through –58, the State of New Jersey, Department of Environmental Protection, Green Acres Program, will hold two **public hearings** to seek comments on a proposed land exchange between the State of New Jersey and the County of Monmouth involving property located in the Township of Freehold, Monmouth County.

The Department of Environmental Protection (“Department”) and the County of Monmouth propose to enter into a land exchange in order to consolidate their respective landholdings and straighten out the ownership boundary between the State-owned 3600-acre Turkey Swamp Wildlife Management Area and Monmouth County’s 1168-acre Turkey Swamp Park in Freehold Township, Monmouth County. As part of this exchange, the Department proposes to convey 307 acres of property to Monmouth County (Block 93, portions of Lots 34, 50.02, 52, 75, 76 and 77 in Freehold Township). The State property, which is managed by the Division of Fish and Wildlife, is undeveloped open space in the vicinity of County Routes 527 and 537 and the boundary with Ocean County. The property to be conveyed to the County of Monmouth will be deed restricted for recreation and conservation purposes, including hunting.

In exchange, the County of Monmouth proposes to convey to the State its partial undivided interest in a 925.2-acre parcel in Freehold Township known as the West Turkey Swamp property. The parcels to be conveyed by Monmouth County are as follows:

Block 102, Lots 19.01-19.04, 32-34, 34.01, 35, 35.02, 36, 37, 41, 42, 76, 82, 84, 86, 92, 93.02, 95, 95.01, 95.04, 95.06, 96, 96.01, 96.02 and 98

Block 110, Lots 7, 10, 11, 13-18, 18.01-18.03, 19, 20-23, 23.01, 25.01, 26, 26.01, and 28

Block 111, Lots 7, 8, 12, 12.02, 14, 16, 25 and 12.01.2 (formerly 12.01)

The County's land was acquired to protect the headwaters of the Manasquan and Metedeconk Rivers, two potable water sources, as well as for open space preservation, natural resources conservation and public recreation. This exchange is proposed so the County and the State can consolidate their respective property interests, better manage their landholdings and straighten their mutual ownership boundary. There will be no net loss of public open space as a result of the proposed land exchange and no immediate change in use.

The **first public hearing** on the proposed land exchange will be held on:

Wednesday, October 20, 2004 at 7:00 PM
(to 9:00 PM or close of testimony, whichever comes first) at the
Freehold Township Municipal Building located at
1 Municipal Plaza
Freehold, New Jersey 07228
(732) 294-2000

The hearing record for the first public hearing will close on October 27, 2004. Interested persons may obtain information from David R. Smith in the Green Acres Program at the address below and may submit written comments to Mr. Smith until the close of business on October 27, 2004.

The **second public hearing** will be held on:

Wednesday, November 3, 2004 at 4 PM
(to 6:00 PM or close of testimony, whichever comes first) at the
Department of Environmental Protection
3rd floor large conference room located at

The permittee has proposed an additional outfall DSN002A to be permitted. The proposed outfall DSN002A will discharge treated industrial wastewater from the Phase 3A pond during heavy storm events. This permit action is a redraft of the draft permit that was noticed in the November 27, 2002 <i>DEP Bulletin</i> . The draft permit was not issued at that time due to the permittee's comments on the WET requirements imposed on the predraft permit as well as a request to include a second outfall. The Department has redrafted the permit to incorporate substantial changes, including requirements for the proposed outfall DSN002A due to additional information received by the Department. Therefore, the Department is re-opening the public comment period for this draft permit.

General Permit - Category R13 NJPDES Permit No. NJ0141950 Storm Water	Statewide All Municipalities Statewide	John Ashton Bureau of Nonpoint Pollution Control (609) 633-7021		<p>The permit is an industry specific general permit for the Mining and Quarrying Industry. Notice of this draft permit action originally appeared in the DEP Bulletin, Trenton Times, Star Ledger and the Atlantic City Press on March 24, 2004. During that 30-day public comment period the Department received significant comments that revealed a significant error for discharge limitations for total suspended solids as well as other deficiencies in the permit. In response, the Department has prepared this new draft permit and is reopening the public comment period in accordance with N.J.A.C. 7:14A-15.14. The new draft permit modifies the original draft permit by correcting the errant limit and addresses many of the significant comments received.</p> <p>Requirements for this permit include development and implementation of drainage control, downstream stabilization of outfalls, maintaining a Stormwater Pollution Prevention Plan (SPPP), and implementing Best Management Practices (BMPs) to meet numeric limits and discharge benchmarks. The permit includes quarries currently operating hot mix asphalt plants and/or concrete manufacturing product plants sharing common drainage area(s) and outfall(s). Permittees discharging to trout maintenance and trout production streams will be required to continuously monitor temperature during mine dewatering and will also conduct a stream temperature study to evaluate the thermal impact of all discharges to ambient stream temperatures.</p>

The wastewater will be treated and disinfected to ground water quality standards prior to discharge. The treated wastewater will be discharged to the ground via a 5,000ft2 onsite subsurface disposal field. An additional 5,000 ft2 area must be reserved for additional disposal area. The maintenance building and comfort stations will continue to be served by the existing septic systems.</p> <p>Sanitary wastewater generated by the facility will be treated and discharged into the ground water of the state via an onsite subsurface sewage disposal system. Drainage areas for outfalls 002, 003 and 004 have been sealed and are captured by the new system. Only Outfall 005 remains active. Sampling requirements will be reduced from effluent limits to monitor only. In the event of a storm event greater than the 10-year storm, plugs placed in pump sumps 1, 2 and 3 will be pulled, allowing the overflow to discharge to the Pine Alley Sewer.</p>
