The facility has three (3) primary discharge outfalls to the Delaware River. DSN 001A discharges a long-term average flow of 3.47 MGD of wastewater (including process wastewater, cooling tower blowdown, remediation recovery well discharge, contaminated stormwater, intermittent ballast water discharge, and sanitary wastewater), treated and disinfected at an on-site wastewater treatment plant. These outfalls drain runoff from areas of the refinery that are exterior to bermed petroleum product/chemical storage tanks and curbed/graded production areas. Stormwater discharged from these outfalls does not come in contact with any raw materials, products or byproducts. Of the 13 stormwater outfalls, five (5) are monitored, namely, DSN 005A, DSN 013A, DSN 014A, DSN 016A and DSN 017A. The Newark Group, Inc. NJPDES Permit No. NJ0106798 Storm Water	60 Lockwood St Newark Essex County	John Ashton Bureau of Nonpoint Pollution Control (609) 633-7021	Passaic River SE3 02030103150	The Newark Group, Inc. is the property owner with several divisions operating on this property. Each division carries its own permit(s). Under this permit action, the Department is consolidating the permits to one facility-wide permit under The Newark Group, Inc. This enables the owner/operator to reduce the number of NJPDES permits required, to manage the permit(s) more efficiently and to create the flexibility needed to meet business demands without routinely modifying the NJPDES permit(s). The site currently has two (2) divisions in operation: Newark Paperboard Products and Newark Recycled Fibers Division. The Newark Boxboard operation ceased operations. Newark Paperboard receives materials for the operation and ships from one of several loading docks. Most of the activities for Newark Paperboard are indoors. The bulk of the outdoor industrial activity is performed by Recycled Fibers. Activities primarily involve the unloading, transferring and loading of recycled papers and cardboard using front-end loaders and forklifts. The industrial activities are concentrated in three (3) areas with some minor industrial activity in other areas of the facility. The three (3) primary areas of industrial activity are: 1. The Main Paper Yard 2. The loading dock area of Newark Recycled Fibers 3. The pad area under and around the roofed section near the Calpine, Inc. cogeneration plant. The applicant is involved with the collection, bailing and shipping of paper and cardboard for use as a recycled material in paper mills under the Standard Industrial Classification (SIC) 5093 (Recycled Fibers) and 2631 (Newark Paperboard). This permit action will regulate stormwater discharges to the Passaic River, classified as SE3(C2).
