The facility proposes a 20-bed expansion (82 total beds) to the nursing home and an additional subsurface sewage disposal bed. The nursing home discharges sanitary wastewater to three subsurface disposal beds, with two septic tanks each, corresponding to the kitchen, the North Wing and the South Wing. The kitchen also uses a grease trap and the two wings have pump tanks. The South Wing's disposal bed was replaced through a NJDEP Treatment Works Approval issued on 8/26/92. The proposed expansion will include the construction of a West Wing, as well as, a mounded subsurface disposal bed fed by two septic tanks and a pump tank in series. The new fourth disposal bed will receive wastewater from 26 beds and laundry. In the last year, an average daily volume as high as 7,300 GPD of sanitary wastewater was generated by this facility and discharged by the septic system. This permit limits the quarterly calculated average daily discharge to 13,515 gpd.
