General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

Mannington Twp, NJ Salem County	Judy Majoras Bureau of Nonpoint Pollution Control (609) 633-7021		The NJPDES-DGW permit for Mannington Mills, Inc., is being renewed. The permit provides monitoring of possible discharges from a non-operating industrial landfill, only. Discharges of stormwater in other areas of the facility are not covered under this permit. General Permit - Category 5G3 NJPDES Permit No. NJ0088323 Storm Water	All Municipalities Statewide	Brian McLendon Bureau of Nonpoint Pollution Control	Statewide	The New Jersey Department of Environmental Protection (Department) currently regulates stormwater runoff statewide from certain construction, mining, or quarrying activities under its Construction Activity Stormwater General Permit (NJPDES Permit No. NJ0088323). This general permit controls discharges to surface water of stormwater from certain industrial activity and small construction activities as defined in N.J.A.C. 7:14A-1.2. Facilities where construction activities, including clearing, grading, and excavation, disturb five acres or more of land, or disturb less than five acres but are part of a larger plan of development or sale; and facilities engaged in certain kinds of mining or quarrying of sand, gravel, soil, shale, stone or clay, including crushing, grinding, pulverizing or washing, are classified as industrial activities. Facilities engaged in the same construction activities that disturb one acre or more of land, or disturb less than one acre but are part of a larger plan of development or sale are classified as small construction activities. The Department is now proposing to modify this permit (NJ0088323) to remove from permit eligibility mining or quarrying operations except those currently authorized under this general permit. Mining and quarrying operations currently authorized under this general permit will be directed by the Department to apply for either an individual NJPDES permit or seek authorization under the Mining and Quarry General Permit (NJ0141950). Individual home construction that meets the definition of industrial or small construction activities but are not within the definition of "project" under the Soil Erosion and Sediment Control Act, at N.J.S.A. 4:24-41g may now obtain permit authorization and must meet minimum soil erosion and sediment control requirements established in the permit. In addition, permit authorizations cannot be issued for major Highlands development within the boundaries of the Highlands Region Preservation Area, designated by the Highlands Water Protection and Planning Act, that does not have a Highlands Preservation Area Approval issued by the Department.

The facility conducts the transfer of product to trailers for intra- and interstate transport. The existing permit authorized the facility to discharge stormwater associated with the industrial activity to surface waters of the state. The Department has determined that this permittee is eligible for permit renewal. The Department is renewing the permit without change pursuant to N.J.A.C. 7:14A-15.6(d).
Orbel Corporation. The combined waste streams will be treated using a pretreatment system consisting of coagulation, flocculation, clarification and neutralization units. The treatment works has been tentatively identified as requiring an N-2 licensed operator, in accordance with N.J.A.C. 7:10A-1 <u>et seq.</u> Comment period ends 30 days after publication in the Express.
