Spartech is involved with the custom compounding of purchased plastic resins under the Standard Industrial Classification (SIC) 3087. The existing permit regulates stormwater discharges to the Passaic River, classified as SE3. The Stormwater Pollution Prevention Plan dated November 11, 2005, provided by Spartech, stated that a large portion of offsite contaminated stormwater from surrounded properties enters Spartech's property during periods of heavy rainfall and negatively impact the site stormwater quality. Since the facility has no control over the event of receiving offsite contaminated stormwater, and there is no reasonably available remedy. Therefore, the NJDEP intends to modify the existing NJPDES permit NJ0130508 to eliminate numeric effluent limitations for Oil and Grease and to include ongoing monitoring requirements at the existing monitoring locations DSN002 and DSN003.</p>
