## Permit Descriptions

---

**CAFRA** - A Coastal Area Facility Act permit is required to construct residential, commercial, public, transportation, utility and energy-related facilities in the coastal area as defined by the Act.

**Federal Consistency Activity:** Certain federal permits, not limited to the U.S. Army Corps of Engineers Dredge and Fill Permits, require certification by the DEP prior to the issuance of the permit by the federal agency.

**Freshwater Wetlands:** A Permit (Letters of Exemption, Letters of Interpretation, Statewide General Permit, Open Water Fill, Individual, Transition Area Waiver, Water Quality Certificate) is needed prior to engaging in a regulated activity in or around freshwater wetlands and associated transition areas. A Stream Encroachment Permit, an U.S. Army Corps of Engineers Dredge and Fill Permit, and a Water Quality Certification may also be required.

**General Groundwater Petroleum Products Cleanup:** This general permit authorizes the surface water discharge of treated groundwater previously contaminated with petroleum products.

**NJPDES permits:** A permit is required for the discharge of pollutants to surface and groundwater, a discharge from an indirect user or the land application of municipal and/or industrial residuals. (A more comprehensive definition of activities, which require a permit, may be found at N.J.A.C. 7:14A-2.4)

**Solid Waste Facility:** A permit is required to conduct or operate any solid waste facility as defined under the Solid Waste Management Act, N.J.S.A. 13:1E-1 et seq., and N.J.A.C. 7:26-1 et seq.

**Stream Encroachment:** Under the Flood Control Act DEP is empowered to require a permit to control construction within and proximate to flood hazard areas to reduce flood damage to and from new development and to protect the flood storage capacity and ecology of flood plains.

**Tidal Wetlands:** A Coastal Wetlands Permit is needed to excavate, dredge, fill or erect structures on coastal wetlands.

**Treatment Works Approval:** A TWA permit is required for the construction, modification or operation of a treatment works, including sanitary/industrial sewage pretreatment or treatment systems, sewage conveyance systems, sewer extensions and subsurface sewage disposal systems.

**Waterfront Development:** A permit is required for any project involving the development of waterfront near or upon any tidal or navigable waterway in the State.

## General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

**FRESHWATER WETLANDS TRANSITION AREA HARDSHIP WAIVER  
NOTICE OF SETTLEMENT**

Take notice that following a 30 day comment period the Department of Environmental Protection has settled this case for the issuance of Freshwater Wetland General Permits and Transition Area Waivers for the commercial development, known as Woodside at Washington. The applicant has revised the development plan to reduce disturbances to wetlands and transition areas, delineated wetlands surrounding the project and has agreed to conditions to protect the remaining wetlands and modified transition area. Therefore, the Department will issued of freshwater wetland transition area waiver since the proposed project and new information meet the standards of the Freshwater Wetlands Protection Act Rules.

**New Jersey Department of Environmental Protection  
DEP Bulletin Notice**

**Approval of the Borough of Rocky Hill's Article 11 Well Head Protection  
Pursuant to Underground Storage of Hazardous Substances Act (N.J.S.A. 58:10A-21. et.seq) and  
Implementing Regulations (N.J.A.C. 7:14B)**

On February 21, 2006, the Department received Borough of Rocky Hill's application requesting approval of the "*Ordinance to Amend the Development Regulations Ordinance of Rocky Hill Borough by adding a New Article, Article 11 Well Head Protection*" (Article 11) pursuant to the Underground Storage of Hazardous Substances Act (N.J.S.A. 58:10A-21. et.seq) and Implementing Regulations (N.J.A.C. 7:14B). By submitting this petition, Borough of Rocky Hill has requested the authority to enact and enforce Article 11 that is more environmentally protective than N.J.A.C. 7:14B.

As part of their application the Borough of Rocky Hill provided a copy of Article 11, the Designated Well Head Protection Area (WHPA) for Rocky Hill Well #2 and the New Jersey Department of Environmental Protection's December 2004 "Source Water Assessment Report for Rocky Hill Water Department" in support of their petition. Article 11 regulates the use of land, physical facilities and other activities within the three tiers of Well Head Protection Areas (WHPAs) delineated by the NJ Geological Survey based on time of travel. Article 11 prohibits the installation of new underground storage tanks (USTs) within WHPA tiers one and two and imposes the requirement to file an "Operations and Contingency Plan" and the application of best management practices requirements on USTs in all three WHPA tiers when triggered by the application for a change in land use or activity.

Based on the information provided, the Borough of Rocky Hill has initiated Article 11 as a preventative measure to reduce the probability of accidental spills or leaks which can be associated with hazardous substance storage and handling in environmentally critical WHPAs (as defined by N.J.A.C. 7:8-1.2). The Borough of Rocky Hill adopted Article 11 on October 17, 2005, with the following stated purposes:

“The purpose of this Article is to protect the public health, safety and welfare through the protection of the ground water resources underlying the Borough to ensure a supply of safe and healthful drinking water for present and future generations of local residents, employees and the general public in the Borough, as well as users of these water supplies outside the Borough. Areas of land surrounding each public community well, known as a Well Head Protection Area (WHPAs), from which contaminants may move through the ground water to be withdrawn in water taken from the well, have been delineated. Through the regulation of land use, physical facilities and other activities within these areas, the potential for ground water contamination can be reduced. The purpose of the regulation contained in this Article 11 is to prevent the migration of potential pollutants from areas within a WHPA into ground water that is withdrawn from a public community well.”

The Borough of Rocky Hill enacted Article 11 based upon findings that (1) the ground water underlying the Borough is a major source of existing and future water supplies and is part of a “sole source” aquifer system, (2) ground water is integrally connected with, and recharged by, and flow into surface waters...which constitutes a major source of water for drinking, commercial and industrial needs, (3) spills or discharges... may threaten ... these groundwater supplies, (4) contaminated water from any source is a detriment to the health, welfare and safety....., and (5) the proximity of hazardous substances to water supplies should be restricted to allow sufficient time to find and cleanup any spills or discharges.

The New Jersey Geological Survey (NJGS) established WHPA delineation as part of a requirement of the 1986 Federal Safe Drinking Water Act (FSDWA) to develop and implement a State program to protect wellhead areas within New Jersey from contaminants that may have any adverse effect on the health of persons. 42 U.S.C. § 300h 7. In response to this mandate, New Jersey drafted a Wellhead Protection Program Plan (“WHPP”), which was approved by EPA Region II by letter dated 6/19/1991. The WHPP stated that the most critical of its key concepts is the development of municipal and county controls of sources which remain unregulated by the Department and prevention of the development of new sources. 1991 WHPP, p v. The WHPP further stated that “municipal governments will be encouraged to make full use of these authorities to further the WHPP.” 1991 WHPP, p. 15. By prohibiting and regulating new and enlarged pollutant sources within WHPAs, the Borough of Rocky Hill has taken steps, to reduce the potential for contaminants to enter the Sole Source Aquifer System surrounding the Public Community Well and school wells (Public Non-Community Wells), which are consistent with the 1991 WHPP.

Subsequently, 1996 amendments to the FSDWA required states to implement a Source Water Assessment Program to predict potential threats to the quality of the drinking water sources in the State. As part of this program, states are required to define wellhead protection areas and identify all potential anthropogenic (caused by humans) sources of contaminants, which may have any adverse effect on the health of persons. Once these areas and contaminants have been identified, the state program is encouraged to provide “implementation of control measures” “to protect the water supply within wellhead protection areas from such contaminants.” New Jersey’s Source Water Assessment Program conducted an inventory of potential contaminant sources and a determination of the source waters’ susceptibility to regulated contaminants including volatile organics. Using past studies, water sample data and statistical models, the State determined vulnerability ratings and the environmental factors that have the potential to affect the source waters’ vulnerability. Point sources of contamination have been determined to be a significant factor for determining the vulnerability to contamination from volatile organic compounds. The density of underground storage tanks, when combined with the density of solid waste landfills and Known Contaminated Sites is a significant factor contributing to this class of contaminants. Sixty-one percent of unconfined community water systems wells were rated as highly vulnerable to volatile organic compounds.

New Jersey’s Safe Drinking Water Act (NJSDWA) sets forth a legislative determination that “it is a paramount policy of the State to protect the purity of the water we drink” and “that the maintenance of high-quality potable water is essential in order to safeguard the health and welfare of the people of the State.” N.J.S.A. 58:12A-2. Regarding contaminants, and the authority to address a potential threat to drinking water, such as that identified in the Source Water Assessments, the NJSDWA provides:

“The commissioner, upon receipt of information that a contaminant which is present in or is likely to enter a water system may present an imminent and substantial endangerment to the health of persons, may take such actions as he may deem necessary in order to protect the health of such persons. Such actions may include, but shall not be limited to: a. issuing such orders as may be necessary to protect the health of persons who are or may be users of such system, including travelers; and b. commencing a civil action for appropriate relief, including a restraining order or permanent or temporary injunction.” N.J.S.A. 58:12A-6.

Documentation provided substantiates the geologic conditions, including but not limited to the bedrock aquifer (Triassic-Jurassic Passaic Formation) warranting Borough of Rocky Hill’s implementation of Article 11. Based on the loss of one of the two Rocky Hill Water Department wells due to contamination and the contamination impact seen at the remaining well (Well #2 - for which treatment is provided), Rocky Hill has historical experience that a discharge within the WHPA of Well #2 will migrate to this well. The Department recognizes that once ground water is impacted by hazardous substances (especially volatile organic compounds) in this type of hydrologic structure, it is difficult to investigate, contain and remediate the contamination given the inherent complexities of ground water flow along and within bedrock features. The common high capacity yields of Public Community and Public Non-Community Wells further influence and complicate contaminant transport and remediation. Under these conditions, accidental spills or leaks of hazardous substances are likely to enter the water system and will present an imminent and substantial endangerment to the health of persons upon entry into the water system.

In addition, the Borough of Rocky Hill is located in a designated Sole Source Aquifer, specifically the Northwest New Jersey Fifteen Basin Sole Source Aquifer. A Sole Source Aquifer is defined as those aquifers that contribute more than 50% of the drinking water to a specific area and the water would be impossible to replace if the aquifer were contaminated. Recharge is almost entirely from the precipitation that falls within the basin. Local flow systems typically recharge at topographic high areas and discharge at the streams found in the valleys. Any pollutant discharges within this recharge area are a threat to the drinking water supply. The US Environmental Protection Agency states,

“The Fifteen Basin Aquifer System of Northwest New Jersey is vulnerable to contamination from many sources. The thinness of the soils, the high permeability of the stratified glacial deposits and the fractured nature of the bedrock contribute to the vulnerability and spread of contamination.”

The Department regulates underground storage tanks (USTs) pursuant to the Water Pollution Control Act, N.J.S.A. 58:10A-21 through 37. The State’s regulation of USTs is intended to “provide for the registration and the systematic testing and monitoring of underground storage tanks to detect leaks and discharges as early as possible and thus minimize further degradation of potable water supplies.” N.J.S.A. 58:10A-21. The Department is authorized to review and approve municipal ordinances which are more stringent (i.e. more environmentally protective) than the state program. N.J.S.A. 58:10A-35(b), N.J.A.C. 7:14B-11.2. Pursuant to 7:14B-11.3(b), a municipal ordinance is approvable if it meets one of the following criteria:

1. The municipal ordinance provides greater environmental protection for unique hydrologic conditions;
2. The municipal ordinance provides greater protection against imminent threats to human health; or
3. The municipal ordinance provides greater environmental protection for wetlands or flood plains.

Article 11 has been drafted and submitted with the intent of providing “greater protection against imminent threats to human health.”

The Department has evaluated the application pursuant to N.J.A.C. 7:14B-11.3 and finds that Article 11 is more stringent than, and not in conflict with, N.J.A.C. 7:14B and warrants approval. Specifically, the Department has determined that Article 11 meets the criteria specified at N.J.A.C. 7:14B-11.3(b)2 by providing "greater protection against imminent threats to human health". Article 11 is deemed to meet the conditions required pursuant to N.J.S.A. 58:10A-35(b), has been deemed to be effective and not preempted and Borough of Rocky Hill has been given approval to enforce and administer its provisions.

The Department finds that Article 11 also furthers the goals of the Source Water Assessment Program, the 1986 Federal Safe Drinking Water Act and its amendments of 1996 and New Jersey's federally approved Well Head Protection Plan. The Department also finds that Article 11 is consistent with State policy contained in the Safe Drinking Water Act (N.J.S.A. 58:12A-2) to protect water purity and safeguard the health and welfare of the people of the State.

Borough of Rocky Hill has been advised that with the authority granted to implement Article 11, Borough of Rocky Hill is also obligated to insure that its provisions are carried out in a manner which is not inconsistent with N.J.A.C. 7:14B.

Since Borough of Rocky Hill enacted Article 11 ahead of Department approval, the Department has recommended that Borough of Rocky Hill readopt Article 11 and provide the Department a final copy as required pursuant to N.J.A.C. 7:14B-11.3(d).

Notice is hereby given that the New Jersey Department of Environmental Protection (Department), Site Remediation and Waste Management, proposes to issue the following New Jersey Pollutant Discharge Elimination System permit actions in accordance with N.J.S.A. 58:10A-1 et seq. and N.J.A.C. 7:14A-1 et seq.

The permit action prepared by the Department is based on the administrative record which is on file at the offices of the Department, Site Remediation Program, located at 401 East State Street in the City of Trenton, Mercer County, New Jersey. It is available for inspection, by appointment, Monday through Friday, between 8:30 A.M. and 4:00 P.M. Appointment for inspection may be requested through the Open Public Records Act. Details are online at [www.nj.gov/dep/opra](http://www.nj.gov/dep/opra), or call (609) 341-3121. Appointments for inspection of the NJPDES file only or requests for a copy of the draft document (at a nominal charge) may be made by calling Central File at (609) 292-0400.

Comments on the draft document or a request that the Department holds a non-adversarial public hearing must be submitted in writing to the person specified below and shall be postmarked within 30 days of the date of this public notice. All persons, including the applicant, who believe that any condition set forth in this document is inappropriate, must raise all reasonable issues and submit all arguments and factual materials supporting their position by the close of the public comment period. Any request for a hearing shall state the nature of the issues to be raised. A public hearing will be conducted whenever the Department determines that there is a significant degree of public interest in the permit decision. If a public hearing is held, the public comment period shall automatically be extended to the close of the public hearing.

The Department will consider and respond to all significant and timely comments. The applicant and each person who has submitted written comments will receive notice of Department's final decision.

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP) proposes to issue the following New Jersey Pollutant Discharge Elimination System (NJPDES) permit actions in accordance with N.J.A.C. 7:14A-1 et seq. and by authority of N.J.S.A. 58:10A-1 et seq. The description of each proposed permit action is contained in the accompanying table.

This public notice has been prepared for these facilities as part of the administrative record to be filed at NJDEP, 401 East State Street, Trenton. Copies of the draft document are obtainable, for a nominal charge, and the administrative record is available for inspection by appointment only, Monday through Friday, by contacting the NJDEP file room at (609) 292-0400. Additional information regarding the draft document may be obtained from the contact person listed in the accompanying table.

Comments on the draft document or a request that NJDEP hold a non-adversarial public hearing on the document must be submitted, in writing, to the individual specified below (refer to the accompanying table for the appropriate permitting bureau) during the public comment period, which closes either:

1. 30 calendar days after publication of the last newspaper notice when a notice is published in the DEP Bulletin *and* a newspaper(s); or
2. 30 calendar days after publication of the DEP Bulletin notice when a notice is published in the DEP Bulletin *only*.

All persons, including permittees who believe that any condition of NJDEP's tentative decision to issue these permit actions is inappropriate must raise all reasonable issues of concern and submit all arguments and factual materials supporting their position during the public comment period. Any request for a public hearing shall state the nature of the proposed issues to be raised in the hearing. A public hearing will be conducted if NJDEP determines there is a significant degree of public interest. If a public hearing is held, the public comment period is automatically extended through the close of the hearing.

NJDEP will consider and respond to all significant and timely submitted comments. The permittee and each person who submitted written comments, will receive notice of NJDEP's final decision to issue, revoke or redraft the document.

<p>US Pipe &amp; Foundry Co.</p> <p>NJPDES Permit No. NJ0078328</p> <p>SIU</p>	<p>1101 E Pearl St. Burlington, NJ 08016</p> <p>Burlington County</p>	<p>Gary Torres</p> <p>Bureau of Pretreatment and Residuals</p> <p>(609) 633-3823</p>	<p>Burlington City Sewage Treatment Plant (BCSTP)</p>	<p>This application is for a renewal NJPDES permit .</p> <p>The facility has been manufacturing cast pipe since 1866, SIC Code 3321. U.S. Pipe presently casts ductile pipe in centrifugal molds. Following casting, the pipe is lined with cement and painted in separate buildings, and stored outdoors prior to shipping. Existing NJPDES-Discharge to Ground Water permit NJ0081931 regulates potential discharge to groundwater from the site, which including discharge from an onsite landfill, a cement recycling basin which serves as a settling pond, and a "blackening pond." Existing NJPDES-Discharge to Surface Water Permit No. NJ0005266 regulates stormwater discharges to the Delaware River. Wastewaters covered under permits NJ0081931 and/or NJ0005266 are not addressed by this proposed action.</p> <p>The NJPDES-SIU permit proposed to be renewed covers approximately 100,000 gallons per day of wastewater which is pretreated by coagulation, flocculation, settling and pH adjustment before being discharged from the recycling basin to BCSTP. The wastewater consists of casting machine cooling water, trough blackening wastewater, hydraulic system leakage, backup plate cooling water, contaminated runoff and cement lining wastewater.</p> <p>Comment period ends 30 days after publication in the <i>Burlington County Times</i> newspaper.</p>

<p>Greenwich Twp. WTP Well 4A &amp; Well 6</p> <p>NJPDES Permit No. NJ0130273</p> <p>SIU</p>	<p>1200 Memorial Ave. Gibbstown, NJ 08027</p> <p>Gloucester County</p>	<p>Gary Torres</p> <p>Bureau of Pretreatment and Residuals</p> <p>(609) 633-3823</p>	<p>Greenwich Township Sewage Treatment Plant GTSTP</p>	<p>This application is for a renewal NJPDES permit.</p> <p>The applicant operates potable water treatment plants, SIC Code 4941. Potable water is treated to remove iron and manganese. The discharge to GTSTP consists of backwash, i.e. water used to clear solids from potable water treatment units along with the solids themselves. Each on-site plant alternates between production and backwash activities in cycles dependant on demand. About 123787 gallons of backwash wastewater per cycle is generated from treatment of 336541 gallons of water from Well #4A by a Greensand Filtration Plant to produce 212754 gallons of potable water. About 59085 gallons of backwash wastewater per cycle is generated from treatment of 468106 gallons of water from Well #6 by an Ion Exchange Plant to produce 409021 gallons of potable water. Cycles occur on an irregular schedule and produce a long term average flow to sewers of about 88,802 gallons from Well #4A and 9821 gallons daily from Well 6.</p> <p>Because groundwater in the area contains low levels of naturally occurring radionuclides which can become more concentrated in the filter backwash, the Department is proposing to continue monitoring and limitations for radionuclides present in the discharge.</p> <p>Comment period ends 30 days after publication in the <i>Gloucester County Times</i> newspaper.</p>
<p>ASCO Power Technologies LP</p> <p>NJPDES Permit No. NJ0103985</p> <p>SIU</p>	<p>7 Eastmans Rd. All facilities discharging into sanitary sewers of a Publicly Owned Treatment Works wastewater subject to FCPS are required to hold permits for these discharges. The subject discharge is about 1800 gallons daily from aqueous spray cleaning and steam cleaning, plus about 20 gallons from floor cleaning once per week.</p> <p>In addition, ASCO began discharge into sanitary sewers from groundwater remediation in 1996. An average of less than 620 gallons of groundwater was treated by air stripping and carbon adsorption prior to release to sewers. As decontamination has proceeded, the flow from this operation decreased, as did pollutant concentrations. The groundwater system has been shut down since the year 2000, but could conceivably need to be restarted. Therefore, relevant conditions for discharge into sanitary sewers from the groundwater remediation system are included in the permit in order to assure proper operations if the groundwater system has to be restarted.</p> <p>Comment period ends 30 days after publication in the <i>Daily Record</i> newspaper.</p>

Pfizer Inc. These conditions are generic and are included in all NJPDES permits that contain residuals monitoring.</p> <p>Part III, Limits and Monitoring Requirements, Table III-B-1 and Table III-B-3 were added to the permit because the facility no longer manages the sludge generated by the industrial treatment works as a hazardous waste and is now subject to the reporting requirements under the Sludge Quality Assurance Regulations (SQAR, N.J.A.C. 7:14C). At the time the original permit was issued in November 2005 the sludge was being manifested as a hazardous waste and was exempt from reporting under the SQAR</p>

**Notice of Public Comment Period Regarding Requests for Highlands Applicability and Water Quality  
Management Plan Consistency Determinations**

Notice is hereby given that the New Jersey Department of Environmental Protection (NJDEP), Bureau of Watershed Regulation, has received the following Highlands Applicability and Water Quality Management Plan Consistency Determination application(s) requesting the issuance of determinations in accordance with N.J.S.A. 13:20-30. Each application is described in the accompanying table.

All applications, prior to submittal for public notice, have been deemed administratively complete in accordance with N.J.A.C. 7:38-11.2(c)3 and the following agencies/persons have been notified by the applicant in accordance with the requirements under N.J.A.C. 7:38-9.2(b).

- i. The Municipal Clerk
- ii. The Highlands Council
- iii. The Municipal Environmental Commission (if one exists);
- iv. The Municipal Planning Board
- v. The Municipal Construction Official
- vi. The County Planning Board; and
- vii. The County Environmental Commission (if one exists)

The public notice has been prepared for these applications as part of the administrative record to be filed at NJDEP, 401 East State Street, Trenton. An appointment to review the file pertinent to the listed proposals may be requested through the Open Public Records Act. Details are online at [www.nj.gov/dep/opra](http://www.nj.gov/dep/opra), or call (609) 341-3121

The public comment period on these applications begins on the date of publication of this notice and will close thirty (30) calendar days later. Any interested person may raise all reasonable issues of concern and submit all arguments and factual materials supporting their position during the public comment period.

NJDEP will consider all timely submitted comments. The applicant and each person who submitted written comments will receive notice of NJDEP's final determination.
