The North Jersey District Water Supply Commission is a 140 MGD regional surface Water Treatment Plant located in Wanaque, New Jersey. The facility supplies potable water to approximately two million people in northern New Jersey. The two sources of residual (sludge) are the settling basins and the backwashing of filters. Presently filter backwash water is recycled to the head of the Treatment Plant. Settling Basin sludge is moved to equalization tanks and then to a Residual Treatment Facility (RTF).</p> <p>The liquid extraction phase from the RTF is discharged into the lagoon. The lagoon is regulated by two NJPDES permits: NJPDES-DGW No. 0127990 and NJDEPS-DSW No. NJ0062111. The DGW permit has four discharge points (301 – 304). These points are: from the RTF (301), from an RTF by-pass main (303, 304) and from an Equalization Tank overflow (ET-3) (302). ET-3 overflow is currently part of daily operating processes. The solid phase is trucked to air drying beds. These include an Air Drying Facility (ADF) and Open Air Drying areas. This permit modification is to address the expansion of the open air drying areas. At present there are six open air drying areas, as identified on Attachment III, occupying about two acres. Open air drying area #5 is proposed to expand to 8.11 acres into the area delineated on Attachment III. The expanded drying area #5 will receive reclaimed material from the lagoon for drying, blending, mixing and transport offsite. Prior to conveyance to expanded area #5, this material will be centrifuged at a bankside staging area where the clear liquids will be discharged back to the lagoon.</p> <p>The solid phase is moved from the drying beds, after Laboratory characterization, to intermediate and ultimate Management dispositions. Depending on parameter levels of characterization, the solids can be used for a thermal dam blanket, lagoon land reclamation, agricultural blending with sub-soils or yard waste and movement off-site to a recycling center or landfill. Land application activities and solids monitoring are regulated under NJPDES Permit No. NJ0156141 by the Bureau of Pretreatment and Residuals (DEP), and a Certificate of Authority to Operate (CAO) (Dam 2 blanket) under the Bureau of Solid and Hazardous Waste.</p> |
