General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

Atlantic County	Nilesh Naik Bureau of Pretreatment and Residuals (609) 633-3823	Atlantic County Utilities Authority's wastewater treatment plant (ACUA)	<p>This application is for a modification of NJPDES permit.</p> <p>Atlantic County Utilities Authority operates a sanitary landfill. The landfill has a double composite synthetic liner and leachate collection system. The landfill generates on average approximately 78,000 gallons per day of leachate. The leachate is stored in two 62,000 gallon equalization tanks. The leachate is pumped from the equalization tanks to Atlantic County Utilities Authority's wastewater treatment plant for treatment and disposal.</p> <p>A New Jersey Pollutant Discharge Elimination System/Significant Indirect User (NJPDES/SIU) permit was issued on June 2, 2003 for the said discharge. The current permit has a daily maximum flow limitation of 150,000 gallons per day (gpd). Due to a change in landfill operations and uncontrollable weather conditions, the permittee, once reached the daily maximum effluent limit for flow had to shut down the pumps and cease the discharge until the following day. To avoid such situation in future which could result in an overflow of untreated leachate to the groundwater, the Department, with consent of the wastewater treatment plant, is issuing a modification to the permit which, will allow the permittee to discharge up to 180,000 gpd.</p> <p>Comment period ends 30 days after publication in the Press of Atlantic City.</p>
