## General Information

---

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

Sanitary wastewater will be generated by the existing facilities located at the Evergreen Road Educational Campus in Plumsted Township, Ocean County, NJ: The Plumsted Township High School, the Plumsted Township Middle School and the Plumsted Branch of the Ocean County Library. Wastewater generated by these facilities will be directed to an existing on-site sewage disposal system, known collectively as the New Egypt Middle School Waste Water Treatment Plant (NEMS WWTP). The treatment plant is owned and operated by the Plumsted Township Board of Education. The treatment system has a design capacity of 10,000 gpd.</p> <p>Treated sanitary wastewater will be directed to two existing (2) on-site disposal fields of approximately 19,250 square feet in area.</p> <p>The New Egypt Middle School (NEMS) WTP will receive wastewater generated by the above mentioned facilities within the Evergreen Road Education Campus as well as an existing, remotely located Elementary School. This system was designed to treat a flow of 10,000 gpd. The maximum permitted daily effluent discharge to the disposal fields is 10,000 gpd. It should be noted here that a value of 4.98 gallons per day per student was used to calculate the estimated daily flow. Although this number is less than the figure normally employed by the NJDEP, this number was obtained by dividing the daily high maximum of the 2000-2001 school year (7180 gallons) by the number of students during the same school year (1442 students). Wastewater flow projections indicate a maximum daily flow of 9,213 gpd at a build-out population of 1,850 students and staff. The projected flow number of 9,213 gpd is nearing the maximum allowable discharge of 10,000 gpd and it is for this reason that a 30,000 gallon equalization tank is to be constructed and installed at the head of the NEMS WTP which will accommodate the weekly high flow periods.</p> <p>Residuals generated in the treatment process shall be periodically removed from the sludge holding tank and managed at an approved residual management facility.</p>

The sump pump (DSN 001A) will be incorporated under a NJPDES Surface Water Permit while the facilities three stormwater outfalls (DSN 002A, 003A and 004A) will be covered by a NJPDES Individual Stormwater Permit.
