Freshwater Wetlands: A Permit (Letters of Exemption, Letters of Interpretation, Statewide General Permit, Open Water Fill, Individual, Transition Area Waiver, Water Quality Certificate) is needed prior to engaging in a regulated activity in or around freshwater wetlands and associated transition areas. A Stream Encroachment Permit, an U.S. Army Corps of Engineers Dredge and Fill Permit, and a Water Quality Certification may also be required.

General Groundwater Petroleum Products Cleanup: This general permit authorizes the surface water discharge of treated groundwater previously contaminated with petroleum products.

NJPDES permits: A permit is required for the discharge of pollutants to surface and groundwater, a discharge from an indirect user or the land application of municipal and/or industrial residuals. (A more comprehensive definition of activities, which require a permit, may be found at N.J.A.C. 7:14A-2.4)

Solid Waste Facility: A permit is required to conduct or operate any solid waste facility as defined under the Solid Waste Management Act, N.J.S.A. 13:1E-1 et seq., and N.J.A.C. 7:26-1 et seq.

Stream Encroachment: Under the Flood Control Act DEP is empowered to require a permit to control construction within and proximate to flood hazard areas to reduce flood damage to and from new development and to protect the flood storage capacity and ecology of flood plains.

Tidal Wetlands: A Coastal Wetlands Permit is needed to excavate, dredge, fill or erect structures on coastal wetlands.

Treatment Works Approval: A TWA permit is required for the construction, modification or operation of a treatment works, including sanitary/industrial sewage pretreatment or treatment systems, sewage conveyance systems, sewer extensions and subsurface sewage disposal systems.

General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Stream Encroachment (SE) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

As a result, a number of effluent limitations have been recalculated including those based on existing effluent quality and water quality. This modification also incorporates chlorine produced oxidants limits, removes the less sensitive species for whole effluent toxicity testing, corrects the units for two toxic parameters and incorporates Reclaimed Water for Beneficial Reuse (RWBR) conditions.

The DO monitoring is necessary to determine if an effluent limitation is necessary since DO is listed in the 2004 Integrated report as being impaired in the Atlantic Ocean. In addition, site-specific DO monitoring data is used to determine and assess the Ocean Discharge Criteria and future permit conditions, as well as for possible use in the Rutgers Benthic Indicator Study. The requirements for development of PCBs are determined necessary with an implementation of a Pollutant Minimization Plan (PMP) in Part IV of the permit. This requirement is applicable to this facility as the permittee discharges to a PCB impaired waterbody of the state in accordance with Sublist 5 of the New Jersey List of Water Quality Limited Waters (also known as the 303(d) List or as the Impaired Waterbodies List). The requirements are being incorporated into the permit in accordance with N. J. A. C. 7:14A- 11.13 and 14.4.

JCI intends to either sell the property or knock down the existing shell. Stormwater continues to be collected from approximately 9 acres of the site. The stormwater is diverted to an on-site treatment system before being discharged via storm sewer, from outfall DSN001A, to Mile Run Brook, classified as FW2-NT (C2). The stormwater treatment system is designed to treat the runoff from a 100 year 24 hour storm event (7.5inches/24-hours). The system has a holding capacity of 1,000,000 gallons. The treatment system is primarily for the removal of lead, and consists of pH adjustment, coagulation, clarification, and sand filtration. The existing permit regulates stormwater discharged via storm sewer, from outfall DSN001A, to Mile Run Brook, a tributary of the Raritan River, calssified as FW2-NT.</p> <p>After a review of correspondence with JCI, and a site visit conducted on September 11, 2007, a decision was reached to renew the existing Stormwater permit.
