General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

Only sanitary effluent is to be accepted and processed by Village Square's treatment system. Village Square is permitted to discharge a maximum flow of 15,600gpd of treated wastewater. Two disposal beds with a combined square footage of 39,295 feet will accommodate the treated effluent. Residuals generated in the treatment process are removed from the bioreactor and managed at an approved sludge management facility. The Department is granting a reduction in the number of parameters that must be reported on the annual residuals "production" Waste Characterization Report (WCR) at monitoring location SL1A, pursuant to N.J.A.C. 7:14C-1.13(c). The implementation of this change to the residuals "production" WCR is based upon the effective date of the permit renewal and will be activated at the beginning of the corresponding calendar year.</p>

Steimling & Son, Inc. NJ0106950 Storm Water	7 Nickel Avenue Sayreville Boro Middlesex County	Shashi Nayak Bureau of Nonpoint Pollution Control (609) 633-7021	South River SE1 02030105160070	Steimling & Son, Inc. has applied for a New Jersey Pollutant Discharge Elimination System (NJPDES) renewal permit to the New Jersey Department of Environmental Protection (NJDEP), Bureau of Nonpoint Pollution Control. The applicant is a precision conventional machine shop involved with the manufacture and repair of moderate to large components for the marine and industrial communities under the SIC code 3599. The proposed permit regulates stormwater discharges to the South River, classified as SE1(C2).
Geo Specialty Chemicals NJ0166626 Ground Water	50 North Market St Greenwich Twp. Gloucester County	John Gray Bureau of Nonpoint Pollution Control (609) 633-7021	II-A	This is a NJPDES-DGW new permit action. The existing facility manufactures organic chemicals including cumene hydroperoxide and dicumyl peroxide under the Standard Industrial Classification (SIC) Code 2865. A portion of the site, between the manufacturing plant and the Delaware River, is the location of a former solid waste landfill. In August 1982, following a USEPA report completed by the Department, the Hercules Inc. site (former owner) was placed on the United States Environmental Protection Agency (USEPA) National Priorities List (NPL). An Administrative Consent Order (ACO) was executed on June 1991 between the Department and Hercules, Inc. to address findings of contamination during replacement of the DSN002A effluent weir. To date, approximately 500,000 gallons of stormwater has been impounded in the infiltration/percolation lagoon to prevent discharge from DSN002A. Potentially contaminated stormwater from non-production areas is collected in an infiltration/percolation lagoon and, if necessary, will discharge through outfall DSN002A to Clonmell Creek via an unlined ditch (Authorized under NJPDES Permit No. NJ0005134). No stormwater has been discharged through outfall DSN002A since October 1991. This permit authorizes the discharge of stormwater to ground water via the infiltration/percolation lagoon located onsite. Effluent and groundwater monitoring is required under this permit to ensure compliance with the Ground Water Quality Standards (GWQS).
WAWA Food Store NJ0169030 Ground Water	2356 Route 206 Southampton Twp. Burlington County	keith howell Bureau of Nonpoint Pollution Control (609) 633-7021	II-A	The proposed new WAWA food store and 16 vehicle fueling station is applying for a NJPDES Discharge to Ground Water permit. The existing WAWA store, adjacent to the J&B Liquor store, is to be demolished as part of the proposed project. The J&B Liquor store is to remain until the expiration of their existing lease agreement in approximately 2016. At the expiration of J&B Liquor store's lease the store is to be scheduled for demolition. The septic system servicing the liquor store will be removed from service and disposed of following NJDEP guide lines. The area the liquor store occupied will be graded and landscaped. The proposed WAWA food store and 16 pump refueling station will have a design flow of 2,743 gallons per day (GPD). WAWA will incorporate a treatment system (Keppel Seghers system) which will meet Ground Water Quality Standards prior to discharge. The treated effluent will be directed to a subsurface drip dispersion field. Residuals generated at this facility will be managed off-site at an approved residuals management operation.
