## General Information

---

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

McWilliams Forge NJ0127817	385 395 Franklin Ave. Rockaway Boro Morris County	Greg Chin Bureau of Nonpoint Pollution Control (609) 633-7021	II-A	<p>This is a renewal permit action for McWilliams Forge Company, Inc. The facility is an active steel forging facility adjacent to the Rockaway River in Rockaway Borough in north-central New Jersey. The facility consists of six buildings housing various metal forming processes and two buildings for administrative support. The facility withdraws water from the Rockaway River for use as contact and non-contact cooling water, and for steam to power the drop forge hammers. This permit regulates the discharge of boiler blowdown, contact and non-contact cooling water, and the drop hammer steam condensate through two lagoons.</p> <p>The facility discharges up to 0.785 million gallons per month of contact and non-contact cooling water, boiler blowdown, and drop hammer steam condensate. Steam is circulated through the drop hammers and then through an oil / water separator before being piped to the first of two lagoons with a combined area of 0.03 acres. Blowdown from the boiler room, non-contact cooling water from the circulation of water through the furnace doors, and contact cooling water from the cooling of metal products is piped directly to the first lagoon. Additionally, approximately half the site's stormwater is piped to the first lagoon. Adjacent the die storage area is a scrap steel area. Wastewater from the first lagoon flows to the second lagoon and is eventually discharged to the Rockaway River via a drainage ditch and unnamed tributary. The surface water discharge is regulated under NJPDES-DSW permit No. NJ0002496.</p> <p>The facility uses absorbent pads to soak up any residuals generated in the oil water separator(s). The used pads are then removed offsite for ultimate management. The used pads are considered a residual as defined in the New Jersey Pollutant Discharge Elimination System regulations (NJPDES, N.J.A.C. 7:14A) so general residuals conditions have been included in Part II of the permit. Since the used pads are not a sludge as defined in the Sludge Quality Assurance Regulations (SQAR, N.J.A.C. 7:14C), limits and monitoring requirements have not been included in the permit for this residual.</p>
