Permit Descriptions

CAFRA - A Coastal Area Facility Act permit is required to construct residential, commercial, public, transportation, utility and energy-related facilities in the coastal area as defined by the Act.

Federal Consistency Activity: Certain federal permits, not limited to the U.S. Army Corps of Engineers Dredge and Fill Permits, require certification by the DEP prior to the issuance of the permit by the federal agency.

Freshwater Wetlands: A Permit (Letters of Exemption, Letters of Interpretation, Statewide General Permit, Open Water Fill, Individual, Transition Area Waiver, Water Quality Certificate) is needed prior to engaging in a regulated activity in or around freshwater wetlands and associated transition areas. A Flood Hazard Area Permit, an U.S. Army Corps of Engineers Dredge and Fill Permit, and a Water Quality Certification may also be required.

General Groundwater Petroleum Products Cleanup: This general permit authorizes the surface water discharge of treated groundwater previously contaminated with petroleum products.

NJPDES permits: A permit is required for the discharge of pollutants to surface and groundwater, a discharge from an indirect user or the land application of municipal and/or industrial residuals. (A more comprehensive definition of activities, which require a permit, may be found at N.J.A.C. 7:14A-2.4)

Solid Waste Facility: A permit is required to conduct or operate any solid waste facility as defined under the Solid Waste Management Act, N.J.S.A. 13:1E-1 et seq., and N.J.A.C. 7:26-1 et seq.

Coastal Wetlands: A permit authorizing disturbances to Mapped Tidal Wetlands under the Wetlands Act of 1970, N.J.S.A. 13:9A"

General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
NOTICE OF INTENT TO SETTLE
LETTER OF INTERPRETATION-LINE VERIFICATION**

TAKE NOTICE that following a 30 day comment period the Department of Environmental Protection has settled this case for a Freshwater Wetland Letter of Interpretation – Line Verification, authorized under the Freshwater Wetlands Protection Act Rules (N.J.A.C. 7: 7A-1.1 et seq.). The applicant has submitted information for a change of the resource value classification of a portion of the wetlands on the subject property, which is in compliance with the Freshwater Wetlands Protection Act Rules. The subject property is located on Block 18, Lot 25 in the Township of Wantage, Sussex County. The applicant is 80 Lewisburg Road, LLC c/o John Sarracco. Therefore, the Department has settled the Freshwater Wetland Letter of Interpretation – Line Verification changing a portion of the wetland line from exceptional resource value to intermediate resource value since new information regarding threatened and endangered species has been updated. This settlement will satisfy the appeal of File No. 1924-06-0009.1, FWW-FWLI4-060001.

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
NOTICE FINAL INTENT TO SETTLE
FRESHWATER WETLANDS PERMIT**

TAKE NOTICE THAT THE DEPARTMENT OF ENVIRONMENTAL PROTECTION intends to enter into a Settlement Agreement that would authorize the disturbance of 0.031 of an acre of a wetland swale through freshwater wetland general permit no. 7 and the disturbance of 0.123 acres of wetland transition area, all for the construction of parking spaces at the J.P. Stevens High School located at 855 Grove Road in Edison Township, Middlesex County. The 0.123 acres of disturbed wetland transition area will be compensated for by the addition of 0.123 acres of additional land area adjacent to an onsite transition area. The proposed project is shown on the plan, prepared by Omland Engineering Associates, Inc., entitled “J.P. Stevens High School Conceptual Parking Block 869 Lot 20-A Edison Township, Middlesex County, New Jersey”, dated June 4, 2008, unrevised. This settlement is being entered into based upon the project being revised to eliminate a proposal to fill 0.30 acres of a State open water under freshwater general permit no. 7 and an unspecified amount of non-isolated wetlands under freshwater general permit no. 6. The requests for these permits were denied because freshwater general permit no. 7 authorized activities in ditches or swales and does not authorize activities in State open waters, and freshwater general permit no. 6 authorizes activities in isolated wetlands. The project revisions eliminate these activities and are now limited to the disturbance of 0.031 acres of a swale and the disturbance of 0.123 acres of transition area through an averaging plan. These activities are consistent with the requirements set forth in the Freshwater Wetlands Protection Act Rules. Further, the Edison Township Board of Education has agreed to withdraw the appeal of the Department’s December 28, 2004 denial of their request for the freshwater wetlands general permit no. 6 and no. 7.

2008 NJ Clean Water Council’s Annual Public Hearing

Monday, December 8, 2008 @ 9:00 am in DEP Public Hearing Room

Sustainable Funding for New Jersey’s Water Infrastructure

Specific recommendations on the following topics are welcomed:

Funding for Urban Infrastructure

- What types of funding can be combined to address the multi-billion dollar investment needs of our urban places, without imposing an excessive fiscal burden on customers?

Sustainable Pricing and Management

- What improvements to pricing and cost analysis should be instituted?
- How can these practices be encouraged or required?

Maintenance of Adequate Local Reserves

- What legal and/or regulatory changes are needed to ensure that local utilities can maintain adequate capital and emergency reserves?
- What restrictions are necessary to ensure revenue use for water resource protection and improvement projects?

Financing Mechanisms for Stormwater Management

- What mechanisms could provide a financial structure for stormwater management and how could they be authorized?

Financial Incentives for Innovative Technologies

- How can financing tools encourage and/or require innovative technologies that conserve water, encourage water reuse, reduce loads to wastewater plants, and use energy efficiently?

A variety of activities at this 5000 plus acre facility has resulted in at least 24 areas of potential and actual groundwater, surface water, and soil contamination. These areas have the potential to impact the Atlantic City Reservoir and nearby municipal supply wells. As a result, the site was placed on the CERCLA National Priority List (NPL). The applicant has requested an emergency permit to discharge treated ground water to Atlantic County Utilities Authority's wastewater treatment plant. Approximately 0.10 million gallons per day of ground water will be treated using a granular activated carbon filter and pH will be adjusted prior to discharge. This will be a temporary discharge. Once the remediation system is fully functional the treated groundwater will be discharged back to the groundwater under a Discharge to Ground Water Permit Equivalent issued on February 28, 2008.
