General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

NOTICE OF SETTLEMENT**

TAKE NOTICE THAT THE DEPARTMENT OF ENVIRONMENTAL PROTECTION entered into a Settlement Agreement with the Borough of River Edge which permits the construction of a cell tower and associated structures in the delineated floodway of the Hackensack River. On March 9, 2006 a stream encroachment application was denied because the applicant failed to satisfy the hardship waiver requirements of NJAC 7:13-1.1. Since the regulations do not permit a structure to be placed in the stream's floodway a hardship waiver was requested. The applicant appealed the Department's decision. Based on a change in the proposed structure's alignment and a more detailed alternative site location analysis it is proposed the revised plans be approved.

The facility is permitted to accept solid waste types 10 (municipal waste), 13 (bulky waste), 13C (construction and demolition waste), 23 (vegetative waste), 25 (animal and food processing wastes) and 27 (dry industrial waste) and Class A recyclable materials (mixed paper and corrugated cardboard, glass and plastic containers, aluminum and steel cans) with a capacity of 500 tons maximum on any operating day with the exception that the facility may accept up to 600 tons of material on any one day within a week and not to exceed 3500 tons in a week (7 day operation). Under the solid waste facility permit renewal, the applicant has not requested any changes to the daily or weekly waste capacity and types of materials received, type of materials recovered and hours of operation at the facility. However, the application proposes minor modifications to the solid waste facility permit which include installation of a new scale in the transfer trailer loading ramp area, installation of a scale house, installation of a push wall above the loading ramp, installation of a new drainage system in the transfer trailer pit area, and reconstruction of the transfer trailer pit.

Hot Mix Asphalt Producers Stormwater GP NJ0132721	Statewide Statewide Statewide County	Louisa Lubiak Bureau of Nonpoint Pollution Control (609) 633-7021	Statewide	<p>The Hot Mix Asphalt Producers Stormwater General Permit ("permit") authorizes new and existing industrial stormwater discharges to the surface and/or ground waters of the State from facilities engaged in the manufacture of asphalt concrete.</p> <p>A draft renewal permit has been prepared and is based on the administrative record, which includes the name and address of the permittees authorized under the permit.</p> <p>As part of the renewal, the Department is proposing to modify certain conditions of the permit. A highlight of the changes include: no longer authorizing the discharge of process wastewater including air compressor condensate; monitoring for the parameter Oil and Grease will be replaced with the more appropriate parameter Total Petroleum Hydrocarbons; if the benchmark for Total Suspended Solids of 100 mg/L (monthly average) is exceeded twice in four consecutive quarters by more than 40% it will automatically become an effluent limitation for surface water discharges; modify monitoring for Total Dissolved Solids and Chemical Oxygen Demand to "report only" for surface water discharges; eliminate monitoring for Zinc and Copper for surface and groundwater discharges; eliminate monitoring for Total Suspended Solids, Total Dissolved Solids and surfactants for groundwater discharges; change monitoring report forms from WCRs to DMRs; eliminating the reporting of storm event data for surface water discharges ; modify definition of storm event and eliminate definition of asphalt millings; modify the design storm for discharges to groundwater from a 10 year- 24 hour storm to a 2 year – 24 hour storm; and eliminating the requirement to submit a renewal report. In addition the Department proposes significant formatting changes to further develop, simplify and refine certain aspects of the general permit.</p> <p>The draft renewal permit and the Fact Sheet can be viewed or downloaded on the Division of Water Quality website at http://www.state.nj.us/dep/dwq/hot.htm.</p>
