General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

Ewing-Lawrence SA WTP NJ0024759 DSW Major	600 Whitehead Rd. Lawrenceville, NJ 08648 Mercer	Margaret Elsishans Bureau of Surface Water Permitting (609) 633-3869	Assunpink Creek FW2-NT HUC 11: Assunpink Creek (below Shipetaukin Creek)	This application is for the renewal of a NJPDES permit to discharge an average of 16 MGD (design flow) of treated, domestic wastewater. This permit action proposes to revoke the permittee's general permit for Reclaimed Water for Beneficial Reuse (RWBR) and, incorporates the requirements of RWBR into this permit. This permit action also proposes to revoke the delegation status of the permittee's pretreatment program and reclassify the facility as a non-delegated local agency.
Citgo Linden Terminal NJ0002631 DSW Minor	4801 South Wood Avenue Linden, New Jersey 07036 Union	Ramanathan Asokan Bureau of Surface Water Permitting (609) 292-4860	Arthur Kill SE3 Arthur Kill	This application is for a renewal of a NJPDES permit. This existing facility discharges an average of 0.31 million gallons per day (MGD) of primarily stormwater runoff with some spill wash down water from the truck loading area. All sources of wastewater are treated with an API oil/water separator prior to discharge via outfall DSN 001A to the Arthur Kill. This permit also authorizes the permittee to discharge approximately 10 MGD of hydrostatic test water to DSN 001A on an intermittent basis.

Upper Pittsgrove Elementary School NJ100625 Ground Water	235 Pine Tavern Road Upper Pittsgrove Twp. Salem County	Brian Sage Bureau of Nonpoint Pollution Control (609) 633-7021	II-A	<p>The Upper Pittsgrove Township Elementary School is an existing 78,200 ft² elementary school consisting of grades K-8. The school has no cafeteria or science laboratories and a maximum population of 600 students and staff, resulting in the generation of daily design volume of sanitary sewage of 9,000 gallons per day.</p> <p>The existing elementary school generates a daily design volume of sanitary sewage of 9,000 gallons per day. The sanitary sewage is treated by an onsite advanced wastewater treatment system and the effluent is discharged into a series of subsurface disposal beds. Up to 14,688ft² of disposal area is provided with a maximum loading rate of 0.613 gpd/ft². Currently there are three (3) 51' * 72' subsurface disposal beds.</p> <p>The sanitary wastewater generated by the existing facility will be managed by an onsite advanced wastewater treatment system and will be treated to Ground Water Quality Standards (GWQS), N.J.A.C. 7:9-6, for all parameters of concern, except fecal coliform bacteria, prior to discharge. Although ultraviolet disinfection will be provided, final treatment to GWQS for fecal coliform bacteria will be provided by unsaturated soils within the disposal area. Therefore the Department is removing the requirement that the GWQS for fecal coliform bacteria be met in ground water monitoring wells. As such, the four (4) existing ground water monitoring wells can be abandoned pursuant to N.J.A.C. 7:9D.</p> <p>As part of the renewal application, the permittee requested a generic residual quality suitability determination. Please be advised, consistent with N.J.A.C. 7:14A-20.11, that it is the responsibility of the person who accepts residual from customers to ensure that all residual accepted for processing is compatible with the applicable residual quality limitations. Written Department approval is required for the person who accepts residual for blending from domestic treatment works sources not reported at the time of permit application where the median or mean pollutant concentration (based on a 12 month moving mean and median) exceeds the appropriate residual quality criteria at 40 CFR 503.13. In addition, if the residual is to be taken to a permitted land application site where the individual permit requires a suitability determination for new residual sources, the permittee of the land application site must submit a written request to the Department before accepting the residual.</p> <p>The Department has added a Discharge Monitoring Report (DMR) to Part III, Limits and Monitoring Requirements. Pursuant to the Sludge Quality Assurance Regulations N.J.A.C. 7:14C under 1.8(c), Category 1 domestic treatment works that do not qualify for the domestic septage exclusion are required to do an annual quality analysis of their sludge. Due to the advanced wastewater treatment system, it has been determined that this facility is not eligible for the domestic septage exclusion.</p>

Colts Neck High School NJ0109355 Ground Water	Five Points Rd. & Route 537 Colts Neck Twp. Monmouth County	Brian Sage Bureau of Nonpoint Pollution Control (609) 633-7021	II-A	<p>This is a renewal NJPDES--DGW permit for Colts Neck High School. Colts Neck High School is an existing high school serving grades 9 through 12. The functional capacity of the school, including students and staff is 1,390 people. However, the school utilizes a wastewater recycling and treatment system that recycles the majority of the wastewater through the school's toilets. Because the majority of the wastewater is recycled, the treatment system has been designed to discharge only 6,000 gpd of effluent to ground water. Two subsurface disposal beds totaling 13,600 square feet are utilized to dispose of the effluent. All residuals generated by the facility are managed off-site at an approved residuals management facility.</p>

The Newark Group NJ0106798 Storm Water	60 Lockwood St. - Newark Newark Essex County	John Ashton Bureau of Nonpoint Pollution Control (609) 633-7021	Passaic River SE3 02030103150050	This permit action is to issue a renewal individual NJPDES stormwater permit. The Newark Group, Inc. currently has two (2) divisions in operation: Newark Boxboard and Newark Recycled Fibers Division (Recycled Fibers). Sika Chemical Corp NJ0101389 Ground Water	201 Polito Ave Lyndhurst Twp. Bergen County	Greg Chin Bureau of Nonpoint Pollution Control (609) 633-7021	II-A	This is a renewal permit action for an industrial facility. Sika Corporation manufactures a variety of compounds used in the concrete industry. These include: admixtures (which alter the properties of a concrete batch), epoxy, sealants and mortars. Chemical compounds are stored and mixed on-site to prepare finished products. Any waste materials are incorrect mixtures which cannot be sold. Such wastes are stored in 55 gallon drums and sent to a landfill. An on-site well provides the facility with its industrial water supply. Approximately 285 chemicals are stored and used by the facility. Process wastes which are not hauled offsite are discharged into a sanitary sewer line. Non-contact cooling water and surface drainage for approximately half the property is discharged into storm drains and monitored by a DSW permit (NJ0002011). An unlined lagoon receives storm/surface run-off from the other half of the property and floor drainage from one storage warehouse. There are two influent pipes and one rock-cut ditch leading into the lagoon. A storm drain runs from the lagoon into Berrys Creek. Tidal influences from Newark Bay cause water to enter the lagoon through the storm drain. Run-off to the lagoon is estimated to be 13,930 gpd on an annual basis.

Ground water quality is assessed by both discharge sampling and the sampling of six (6) ground water monitoring wells. All residuals generated by the treatment and disposal system are required to be managed at an approved residuals management facility.
