In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

Water Policy & Climate Change
An Informational Session and Public Hearing sponsored by the
Clean Water Council of New Jersey

Monday, December 7th, 2009, 9:00 am - 1:00 pm
NJ Department of Environmental Protection - Public Hearing Room
401 East State Street, Trenton, New Jersey

PURPOSE OF THE HEARING

The Clean Water Council of New Jersey seeks public testimony on the risks posed to water quality and water infrastructure by climate change and on effective means to adaptively manage the risks. Climate change is causing warmer air and surface water temperatures, more intense storms intermixed with longer periods of dry weather, and rising sea levels. While the contributory causes can be debated, the potential impacts of climate change on water resources and related infrastructure need to be identified and properly managed. The Council has formulated two questions for public consideration and response. Based upon the testimony at this hearing, the Council will develop a set of recommendations for the NJDEP Commissioner. Therefore, the members seek comments from interested persons so that they can recommend improvements to New Jersey's approach to water resource policy issues.

HOW TO TESTIFY

The Council will provide 5 minutes per oral presentation. The Council encourages the submittal of detailed written comments on disk or CD as well as paper, to augment your testimony. Written comments will be accepted until December 31, 2009, and can be sent to the Clean Water Council of New Jersey, c/o DEP - Division of Water Quality, 401 East State Street, P.O. Box 425, Trenton, New Jersey 08625-0425 or by fax at (609) 341-4518. If submitting on disk or CD, the preferred format is Microsoft Word 6.0 or above. Macintosh formats should not be used.

For more information, please contact Stanley Cach at stanley.cach@dep.state.nj.us or (609) 292-8961. To reserve a time period to testify in person, please contact Gerry Skrajewski at geraldine.skrajewski@dep.state.nj.us or (609) 292-8961.

BACKGROUND

Under New Jersey law, the Clean Water Council of New Jersey is required to hold a public hearing once a year regarding water pollution related issues and report its recommendations to the Commissioner of the Department of Environmental Protection.

Specifically the Council seeks input and examples that address the following questions:

What are the high priority risks to clean water posed by the increasing variability of climate and weather events?

What changes to water management policies are needed to increase flexibility and adaptive management, and how will NJ meet the cost?

Specific recommendations on the following issue areas, as well as others, are welcomed:

- STORMWATER
- WASTEWATER
- DRINKING WATER
- INSTREAM/PASS-BY FLOWS
- AGRICULTURE & GREEN INDUSTRY
- WATER INFRASTRUCTURE

The wastewater treatment system is designed to meet ground water quality standards for nitrogen prior to discharge to the disposal field. Flow from the facility shall be limited to 10,000 gallons per day (gpd), and an adjacent 5,040 ft2 reserve subsurface disposal area is available if needed. One monitoring well (MW-2) shall be used to monitor for ground water elevations only.</p> <p>The Department has reduced the number of parameters required to be reported on the Annual Residuals Waste Characterization Report (RWCR). Since the sample required to be obtained for the Annual Residuals Discharge Monitoring Report is a proportional sample, multiple total solids analyses on the RWCR was determined not to be necessary.
