General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION
SOLID AND HAZARDOUS WASTE MANAGEMENT PROGRAM
NOTICE OF PUBLIC COMMENT PERIOD FOR REVISIONS
TO A HAZARDOUS WASTE FACILITY CLOSURE/POST- CLOSURE PLAN**

The New Jersey Department of Environmental Protection, Solid and Hazardous Waste Management Program, hereby gives notice that it has received a closure/post-closure plan addendum submitted by NL Industries, Inc. (aka National Smelting of New Jersey), Pedricktown, Salem County, for its closed hazardous waste disposal facility. This addendum was submitted in accordance with the Solid Waste Management Act (N.J.S.A. 13:1E-1 et seq.) on the State level and the Resource Conservation and Recovery Act (RCRA) on the Federal level.

The facility is located on Pennsgrove - Pedricktown Road, Pedricktown, New Jersey 08067. The landfill was used to dispose of waste generated by lead recycling operations which began in 1972 and ended in January 1984. Since the termination of its operations, the landfill has been closed in accordance with a closure/post-closure plan approved by the Department and is currently under post-closure care. The site (excluding the landfill) was incorporated into the Federal site clean up program as a Superfund site by the United States Environmental Protection Agency on April 25, 1986.

The facility is proposing to install a new drainage system in the landfill to alleviate the ongoing excessive leachate generation at the landfill.

All written comments must be submitted no later than 30 days from the date of publication of this notice to:

**NOTICE OF A PUBLIC COMMENT PERIOD
ON THE ISSUANCE OF A DELAY-OF-CLOSURE AND CONTINGENT POST-CLOSURE PLAN
APPROVAL UNDER
THE RESOURCE CONSERVATION AND RECOVERY ACT**

The New Jersey Department of Environmental Protection (NJDEP) is in receipt of an application for the approval of a Delay-of-Closure and Contingent Post-Closure Plan (hereinafter referred to as the Delay-of-Closure) for the Delay-of-Closure of an Explosive Ordnance Range Open Burning/Open Detonation (OB/OD) Unit submitted by:

EPA ID NO. NJ0170022172
Department of the Navy
Naval Weapons Station Earle (NWSE)
Pine Brook Road
Federal enclave located in Monmouth County, New Jersey

THE DRAFT DELAY-OF-CLOSURE PLAN

On April 15, 2011 NWSE withdrew its application for a hazardous waste treatment facility (herein after referred to as the permit) for the explosive ordnance range OB/OD unit because the function of the range has changed from the treatment of waste explosives and propellants classified as hazardous waste, which requires a permit, to emergency response, training, research, development, testing and evaluation of military munitions which are not classified as hazardous waste and therefore do not require a permit.

Facilities that are authorized to manage hazardous waste under interim status regulations at 40 C.F.R. 270 Subpart G, pending the issuance or denial of a permit and no longer manage hazardous waste must undergo closure in accordance with the procedures of 40 C.F.R. Part 265, Subpart G. The Delay-of-Closure plan describes the procedures NWSE will use to ensure that the closure performance standard at 40 C.F.R. 265.111 will be met. The Contingent Post-Closure plan describes the procedures that will be implemented if all hazardous waste and hazardous waste residues cannot be removed at the time of closure.

NWSE has requested the issuance of a Delay-of-Closure plan approval because the immediate closure of the range would be incompatible with its continued use for emergency response, training, research, development, testing and evaluation of military munitions. Closure of the range is not expected to take place until the range is no longer used for emergency response, training, research, development, testing and evaluation of military munitions.

Approval of the Delay-of-Closure plan will authorize NWSE to continue to operate the explosives ordnance range OB/OD unit for emergency response, training, research, development, testing and evaluation of military munitions.

HOW TO PROVIDE YOUR COMMENTS

The public comment period on the draft closure plan begins on June 29, 2011 and ends on July 29, 2011. Written comments must be submitted to the address listed below:
