General Information

The DEP Bulletin is an information service provided by the New Jersey Department of Environmental Protection. In compliance with the Rules and Regulations Governing 90 Day Construction Permits (NJAC 7:1C-1.1 et seq.) this semi-monthly publication contains a list of construction permit applications recently filed or acted upon by the DEP. Using the Application Milestone Codes located on the inside front cover, interested persons can determine the status of Coastal Area Facility Review Act (CAFRA) permits, Federal Consistency Activity permits, Freshwater Wetlands Individual and Statewide General permits, General Groundwater Petroleum Products Cleanup permits, Open Water Fill permits, Solid Waste Facility permits (SWF), Flood Hazard Area (FHA) permits, Tidal Wetlands permits, Waterfront Development permits and Treatment Works Approvals (TWA).

In addition, a calendar of Events of Interest and a Schedule of Public Hearings is provided. The public hearings listed do not, however, constitute an official notice. Environmental Impact Statements acted upon during the period are also shown. Additional information concerning the permit applications can be obtained by calling the project manager at the appropriate office listed on the inside back cover.

Public Hearings are held for the purpose of obtaining input and reaction to a proposed rule, regulation, or new program. Some hearings may be mandated by law. Generally their scope of impact is statewide or of broad general interest and open to the public.

Contested Case Hearings are held between the State and a particular party involving an application, enforcement violation or an appeal. Interest in these hearings is generally limited to those directly involved.

DEP Events of Public Interest include public hearings, council meetings, workshops, public information meetings, and exams.

Narrative	<p>We submit that the onsite natural water's edge is situated significantly farther waterward than the existing bulkhead & that the marina basin was created 'by dredging and filling of wetlands, bay bottoms and other estuarine water areas' (def. Existing Lagoon Edge). A waiver is therefore requested from the definition of this site as a Filled Water's Edge. A waiver is also requested from the requirement of the FWE rule that an area equivalent to the area within 100 ft of the water's edge shall be used solely for water-dependent uses or remain undeveloped for future water-dependent use. The project site is a deteriorated marina, with no public access & inadequate boat mooring throughout the tide cycle. There are 2 houses & a pool on the site, with no significant marina support facilities. The bulkhead must be replaced. There is insufficient parking, no sidewalks & virtually no green space. The cost of repairing the marina cannot be justified without the benefit of a residential community. The proposed development is consistent with the surrounding neighborhood & as such will benefit the area, while preserving & enhancing the environment. The site is zoned residential & appropriate densities will be maintained. The water-dependent marina use will become user-friendly, consistent with DEP's goal to provide waterfront recreation. Sidewalks will be added on the side street, providing safe passage to Yacht Ave. The public good & environment will not be harmed by granting relief. The small, irregular site shape is not conducive to leaving so much contiguous open space. Roughly 1/3, however, will be open space, consistent with local zoning. A water's edge setback will provide public access. The marina-residence marriage is a combined water-dependent use. Residential development will be the driving force to clean up the site to current DEP standards. Strict compliance with the FWE rule in this instance creates undue hardship & the project's benefits are significant.</p>

Narrative	<p>The purpose of this waiver is to seek relief from certain land use regulation that is incompatible and inconsistent with remediating historic fill. The strict compliance with the Flood Hazard Area Control Act Rules, N.J.A.C. 7:13-1.1 et seq. (Flood Plain Rules), in the context of remediating historic fill results in an atypical, costly, and unduly burdensome remedy that achieves no environmental benefit. Daicolor is committed to the environment and has incurred significant costs investigating and remediating property associated with its operations pursuant to the Industrial Site Recovery Act, N.J.S.A. 13:1K-6 et seq. (ISRA). However, it is faced with an unnecessarily expanded scope of work to address contamination it never caused simply because the Flood Plain Rules impose compliance requirements incompatible with historic fill remediation. Therefore, Daicolor requests that NJDEP, through this Waiver Rule Application, grant the relief necessary to complete the remediation of historic fill in a practical manner. Specific Rule Provisions to which Waiver Applies Daicolor seeks a waiver from strict compliance with the Flood Hazard Area Control Act Rules, N.J.A.C. 7:13-1.1 et seq., including, but not limited to: N.J.A.C. 7:13-2.1 (obtaining a permit) N.J.A.C. 7:13-2.4 (regulated activities) N.J.A.C. 7:13-10.2 (requirements for a regulated activity in a riparian zone) N.J.A.C. 7:13-10.4 (requirements for a regulated activity in a flood fringe) N.J.A.C. 7:13-11.1 (requirements that apply to all regulated activities) N.J.A.C. 7:13-11.2 (requirements for stormwater management) N.J.A.C. 7:13-11.3 (requirements for excavation, fill and grading activities)</p>

The township have given me a variance to build 9 feet from my home and 1 foot from the property line. At this current location I am 20 feet from the center of the creek with your requirement being 25 feet. The money required for any additional changes will over take the funds that was save to complete the 24x24 garage. Narrative	<p>The DeNofa's have applied to the NJDEP-DLURP (file no. 0510-09-0038.1) to grandfather the dock as constructed and the application was denied on 6/14/2010. The existing dock maintains approximately 629 square feet of disturbance below the mean high water line. Historical aerials show a dock structure greater than 700 square feet of coverage below the mean high water line in 1963 and therefore the dock maintains the same environmental impact as historically shown. The owners continue to utilize the fixed pier and floating dock for water dependent, recreational purposes including mooring of boats and launching water vehicles such as kayaks. Existing construction minimizes environmental impact by implementing inert materials for surface decking and fencing for safety.</p>
