"FCH2"= fuel cell consuming on-board stored hydrogen										
LiP= Lithium polymer battery										
Li+ =Lithium ion battery										
Type V Fuel Cell EV has a range of equal to or greater than 300 miles, must be capable of replacing 285 miles (UDDS ZEV range) in ≤ 15 minutes per section 1962.1(d)(5)(B)										
Type III Fuel Cell EV has a range of equal to or greater than 100 miles, must be capable of replacing 95% maximum rated energy capacity in <= 10 minutes.										
Type II ZEV are full function Electric Vehicles (EVs) that have a range of equal to or greater than 100 miles.										
NEV = Neighborhood Electric Vehicle										
<b>EPA SmartWay/SmartWay Elite</b>										
<a href="http://www.epa.gov/SmartwayLogistics/consumer/vehicles.htm">http://www.epa.gov/SmartwayLogistics/consumer/vehicles.htm</a>										
EPA SmartWay is a designation earned by those vehicles that score a 6 or better on each of the Air Pollution and Greenhouse Gas Scores and achieve a combined score of at least 13 when added together. Scores indicate vehicles with reduced levels of emissions that cause smog and health problems. Higher Greenhouse Gas Scores indicate vehicles with reduced levels of emissions that cause greenhouse gases and have improved fuel economy.										
EPA SmartWay Elite is a designation given to those vehicles that score 9 or better on each of the Greenhouse Gas and Air Pollution Scores.										
* EPA Size Class is preferred over EPA Market Class, wherever data is available.										
EPA Fuel Economy rating can be obtained from: <a href="http://www.epa.gov/greenvehicles/Download.do">http://www.epa.gov/greenvehicles/Download.do</a>
