INTRODUCTION

The New Jersey Department of Environmental Protection ("Department") is responsible for administering the New Jersey Pollutant Discharge Elimination System ("NJPDES") program that regulates the discharge of pollutants to the surface and ground waters of the State. The Department's authority is derived from the New Jersey Water Pollution Control Act, N.J.S.A. 58:10A-1 et seq. ("State Act"), pursuant to which New Jersey qualifies for and has primary responsibility under the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.) for the administration of the NJPDES permitting program.

The NJPDES program rules are set forth at N.J.A.C. 7:14A. All persons who wish to discharge wastewater in the State are required to obtain a NJPDES discharge permit from the Department. Pursuant to Section 9 of the State Act, the Department is authorized to "establish and charge reasonable annual administrative fees, which fees shall be based upon, and shall not exceed, the estimated cost of processing, monitoring and administering the NJPDES permits." Fees are assessed to cover the Department's costs to issue and manage NJPDES permits. The NJPDES budget and fee schedule covers activities including the review of NJPDES permit applications, the development of specific permit terms and conditions, evaluating compliance with the terms and conditions of each NJPDES permit, conducting compliance inspections and providing for the general administrative costs of the NJPDES program including regulatory support, data processing, and budgeting. N.J.S.A. 58:10A-10 provides the Department with the authority to seek civil administrative penalties for failure to pay assessed NJPDES permit fees.

FY 2013 NJPDES BUDGET PROPOSAL

The NJPDES Program encompasses both permitting and enforcement activities. Permitting activities include developing, issuing, monitoring and administering NJPDES permits. Enforcement activities include inspections and, when appropriate, follow up activities to gain permit compliance. The total Water Pollution Control (WPC) budget consists of the NJPDES and Enforcement Services budgets that are funded by State appropriations given at the start of the State fiscal year. All fees collected are deposited directly into the General Fund within the Department of the Treasury. Similarly, all penalties collected are also deposited into the General Fund.

The total costs as they pertain to NJPDES permitted facilities in the workplan and the WPC program are presented in Appendix B and C respectively. For fiscal year (FY) 2013, the total costs for program activities are \$22.2 million, a decrease of \$0.7 million from the previous budget year. The portion of the NJPDES program that could be funded through NJPDES permit fees in FY2013 is \$19.7 million. The Department assessed \$11.9 million as fees for the Surface Water portion of the program; \$0.4 million for the Significant Indirect User portion; \$1.7 million for the Ground Water (including Landfills) portion; \$0.2 million for the Residuals portion and \$5.5 million for the Stormwater portion. This amounts to a total assessment of \$19.7 million. The NJPDES fees for FY2013 cover the period July 1, 2012 to June 30, 2013. There are no changes to the minimum fee schedule this year.

FY2013 WATER POLLUTION CONTROL ACT- BUDGET SUMMARY

	ENFORCEMENT SERVICES BUDGET (CWEA)	NJPDES SERVICES BUDGET	TOTAL WATER POLLUTION CONTROL PROGRAM
TOTAL WORK-YEARS	15.68	123.78	139.46
TOTAL PERSONNEL COSTS	\$2,268,701	\$17,909,425	\$20,178,126
TOTAL OPERATING COSTS	\$218,611	\$1,833,730	\$2,052,341
TOTAL PROGRAM COSTS	\$2,487,312	\$19,743,155	\$22,230,467

The FY2013 WPC Program Budget will provide funding for a total of 139.46 work years (a decrease of 18.49 work years from the previous budget cycle). The NJPDES portion of the Water Pollution Control Program budget is expected to cover the costs of 123.78 positions assigned to the NJPDES program (a decrease of 12.23 work years from the previous budget cycle). This includes 90.92 work years assigned to the Division of Water Quality, 19.36 assigned to the Water Compliance and Enforcement Element and 13.5 to other DEP units. An additional 15.68 work years (a decrease of 6.26 work years from the previous budget) will be funded from the Enforcement Water Pollution Control Appropriation. These 15.68 work years are assigned to the NJPDES Program for performance of additional NJPDES related functions and activities that historically have been deemed outside the scope of the NJPDES Fee Program. The Department has included detailed workplans for the various program categories in Appendix B. The expected outputs for FY2013 are based upon current staffing.

TOTAL	179.89	169.36	157.95	139.46

The current average salary cost for each position in the NJPDES program is \$82,754. The average salary cost for FY2013 has been determined based upon the anticipated salary costs as of January 1, 2013. The fringe benefit rate of 45.35 percent has been established by the Department of Treasury in its current OMB Circular Letter. The indirect rate of 20.29 percent, of salary plus fringe, has been established by the Department of Environmental Protection for FY2013.

The Total Budget decreased from \$22.9 million in FY2012 to \$22.2 million in FY2013, mainly due to personnel reductions. The Department has included \$2.1 million for non-salary costs. This is a increase of \$0.2 million from the previous year. Routine operational costs for office supplies, printing, copiers, telephones, postage, vehicle rental and maintenance, legal advertising and professional services total \$1.5 million. Other major operational costs include the following:

Division of Law and Public Safety and Office of Administrative Law - A total of \$463,369 has been included in the NJPDES/Enforcement-Water Pollution Control program budget to cover the legal assistance provided by the Division of Law and Public Safety and the Office of Administrative Law. Activities to be funded include those related to permit adjudication, general legal assistance for rule making, and enforcement action adjudication. The Clean Water Enforcement Act provides a cost recovery mechanism for unsuccessful challenges to the Department's enforcement actions. The Department must also cover the costs incurred by the Office of Administrative Law (OAL) for any permit or enforcement cases which are sent to the OAL for processing. Although many cases are settled without a hearing, the OAL still incurs costs to process these cases.

Office of Information Technology (OIT) - A total of \$42,891 has been included for OIT in the NJPDES/Enforcement Water Pollution Control program budget for FY2013 to cover the cost of computer system operational support.

FY2013 NJPDES FEE ASSESSMENT METHODOLOGY

The Department first established a fee assessment program in 1981. Individual permit fees were based on the facility's potential environmental impact, the billing rate for the category of discharge, and the minimum fee for the category of discharge. The billing rate for each category of discharge is determined annually by subtracting the total minimum fees paid by the permittees in the category of discharge from the total budget for the category of discharge, and then dividing that value by the sum of the calculated environmental impact potentials for all of the dischargers within the category.

The fee schedule is assessed in accordance with current rules. A copy of the current fee regulations is included in Appendix A. This year the percentage of the NJPDES program budget derived from the assessment of minimum fees is 53% of the total program costs, which also includes fringe, indirect and operating costs. The remaining percentage of the NJPDES program costs will continue to be assessed in a manner proportionate to the relative environmental impact potential of the permittee's discharge, pursuant to the fee assessment formula at N.J.A.C. 7:14A-3.1(c) through (g). If a NJPDES permit identifies more than one discharge category, a fee is assessed for each category.

ADJUSTMENTS/CORRECTIONS TO MINIMUM FEE SCHEDULE

Minimum fees are calculated as specified in N.J.A.C. 7:14A-3.1(a)9iii. The following adjustments and/or corrections have been made to the minimum fee schedule to account for changes to the specific category of discharge:

SQAR General Permits - The Department administers a regulatory program for the use and management of residuals generated by domestic and industrial treatment works. Of fundamental importance is the need to control sludge quality. Under applicable laws, the Department is directed to issue permits to limit concentrations of heavy metals, pesticides, organic chemicals and other contaminants in sludge in conformance with land-based sludge management criteria. All treatment works which generate a sludge are required to comply with applicable technical standards for residuals management. These conditions are issued to the treatment works generating a residual and are intended to implement the provisions of the Sludge Quality Assurance Regulations (SQAR, N.J.A.C. 7:14C) for residual quality and quantity monitoring as well as other general conditions required by N.J.A.C. 7:14A-6. These conditions have historically been implemented through individual discharge to surface water, discharge to groundwater, or significant indirect user permits issued to applicable treatment works. However, the Department believes that these conditions are more appropriately controlled under a residual general permit than the individual permits for the following reasons:

1. The class of facilities covered by the general permit all have the same or similar operating conditions, standards for residual use or disposal, monitoring and reporting.
2. Sludge monitoring locations can change frequently. The Department can better accommodate sludge monitoring location changes and sludge monitoring report form changes through issuance of authorizations as opposed to individual permits which often address multiple discharge categories.
3. N.J.A.C. 7:14C-1.9(e) requires an industrial treatment works in Category 10 through 13 that has not received a NJPDES permit issued by the Department under N.J.A.C. 7:14A to sample and analyze its process wastewater sludge and submit the results of the analyses to the Department in accordance with the SQAR. Implementation of the general permit allows the Department to impose the same requirements on all sludge generators regardless as to whether another discharge permit under N.J.A.C. 7:14A has been issued.
4. Pursuant to N.J.A.C. 7:14C-1.12(b) out-of-state sludge generators are required to comply with the monitoring and reporting requirements of the SQAR when transporting sludge into the State of New Jersey. Implementation of the general permit will allow the Department to impose the same requirements on out-of-state facilities as are required by in-state facilities.

The following Residuals Sludge Quality General Permits have been issued or are intended to be issued within the next year:

1. S4G: Residual Sludge Quality Category 4 General Permit for domestic treatment works with a permitted wastewater flow greater than or equal to 5 MGD was issued with an effective date of January 1, 2012. The total hours allocated by the Department for permit issuance, inspection and data management for a typical permit in this category is 66 hours over a five-year period. Based upon the average Department total personnel cost of \$100.48 per hour (including fringe benefits and indirect costs), the five-year cost of administration per facility is \$6,632. The annual cost would be \$1,350 when rounded to the nearest \$50 increment.
2. S3G: Residual Sludge Quality Category 3 General Permit for domestic treatment works with a permitted wastewater flow from 1 MGD to 4.999 MGD was issued with an effective date of January 1, 2013. The total hours allocated by the Department for permit issuance, inspection and data management for a typical permit in this category is 59 hours over a five-year period. Based upon the average Department total personnel cost of \$100.48 per hour (including fringe benefits and indirect costs), the five-year cost of administration per facility is \$5,928. The annual cost would be \$1,200 when rounded to the nearest \$50 increment.
3. S2G: Residual Sludge Quality Category 2 General Permit for domestic treatment works with a permitted wastewater flow from 0.1 MGD to 0.999 MGD is intended to be issued in calendar year 2013 with an effective start date of January 1, 2014. The total hours allocated by the Department for permit issuance, inspection and data management for a typical permit in this category is 53 hours over a five-year period. Based upon the average Department total personnel cost of \$100.48 per hour (including fringe benefits and indirect costs), the five-year cost of administration per facility is \$5,325. The annual cost would be \$1,050 when rounded to the nearest \$50 increment.
4. TBD: Residual Sludge Quality Category 10 through 13 General Permit for potable water treatment systems is intended to be issued either late calendar year 2012 or early calendar year 2013. The total hours allocated by the Department for permit issuance, inspection and data management for a typical permit in this group of categories is 57 hours over a five-year period. Based upon the average Department total personnel cost of \$100.48 per hour (including fringe

benefits and indirect costs), the five-year cost of administration per facility is \$5,727. The annual cost would be \$1,150 when rounded to the nearest \$50 increment.

Where a permittee already has a discharge permit issued under N.J.A.C. 7:14A, there is no additional fee for the Residual Quality General Permit, since the residual management program functions are already incorporated into the Discharge to Surface Water, Discharge to Groundwater, or Significant Indirect User Fee. However, for an in-state facility that does not otherwise have another New Jersey Pollutant Discharge Elimination System permit, or for an out-of-state facility that transfers sludge into the State of New Jersey, the following minimum fees will be charged to cover issuance of the Request for Authorization as well as program audits of sludge quality, quantity and management sites.

FY2013 PERMIT FEE SCHEDULE & ENVIRONMENTAL IMPACT CALCULATIONS

For FY2013, the total amount to be assessed through NJPDES permit fees is \$19.7 million. Fees are assessed based on the minimum fee for each facility and the facility's potential impact on the environment. The environmental impact fee component is calculated in accordance with the NJPDES regulations in N.J.A.C. 7:14A-3.1 (see Appendix A). The minimum fee is added to the fee calculated based on the environmental impact potential of the discharge. An analysis of the rate calculations is provided in Appendix D.

Municipal Surface Water Permit Fees – The total amount of fees to be assessed for municipal surface water permits is \$6,566,980. Minimum fees from 219 municipal facilities will generate \$1,698,700 (26%) of the total billings. This year's environmental impact portion of the fee is based on the loadings of BOD, COD or CBOD reported during the period January 1, 2011 through December 31, 2011.

Industrial Surface Water Permit Fees – The total amount of fees to be assessed for industrial surface water permits is \$5,333,520. Minimum fees from 320 industrial facilities will provide \$1,204,050 (23%) of the total billings. This year's fees are based on the loadings for all limited pollutants reported during the period January 1, 2011 through December 31, 2011 and the risk factor associated with each parameter. As in years past, where a facility's discharge is limited for BOD, COD and/or TOC, the Department is using the discharger's BOD loading for the pollutant loading calculation, rather than the oxygen demand parameter discharged in greatest quantity, provided the facility is meeting its whole effluent toxicity limits.

Significant Indirect Users (SIU's) – The total amount of fees to be assessed for significant indirect user permits is \$466,397. Minimum fees from 75 facilities will provide a total of \$431,250 (92%) of the total billings. The environmental impact calculation for SIU permits is based on the total weighted loading of all limited pollutants discharged during the period January 1, 2011 through December 31, 2011 and the risk categories for SIUs. These risk categories are specified in Table I of N.J.A.C. 7:14A-3.1 entitled, "Indirect Users".

Residuals - The Department will assess fees totaling \$165,450 to 59 facilities which handle, distribute and land apply sludge. These facilities are charged applicable minimum fees and are not subject to an environmental impact calculation.

Nonpoint Pollution Control Permit Fees - The total NJPDES Nonpoint Pollution Control program budget is \$7,293,533. The program issues permits for Operational Ground Water Discharges, Discharges from Landfills and for the Stormwater Permitting Program.

Operational Ground Water Permit Fees - The total amount of fees to be assessed for ground water discharge and operating landfill permits is \$1,737,058. Minimum fees from 1011 DGW permits and 23 landfill permits will provide \$1,430,450 (82%) of the total billings. In accordance with rule amendments adopted in January 2009, fees for operational groundwater permits are determined upon the facilities pollutant potential (for example, hazardous vs. non hazardous waste) and discharge control factors (for example, lined vs. non lined lagoons). The operational groundwater and landfill permits are now assessed together resulting in one rate to be used for both types of permits

Stormwater Permitting Program Fees - The total amount of stormwater fees to be assessed from 3311 stormwater permits is \$5,473,750. These facilities are not subject to an environmental impact calculation. Fees for Stormwater General and Individual Permits are set in the NJPDES Rules (N.J.A.C. 7:14A-3.1 - Table III.

Proposed fee schedules for each permitted facility under the various discharge categories are included in Appendix E. Any questions concerning fee assessments for individual facilities should be directed to the NJPDES Fee Management Unit within the Division of Water Quality at (609) 984-4428.

Delinquent Fee Collections

The Department continues to pursue remaining overdue fee balances from prior years. Current efforts are focused on the FY2005 and later delinquent fees. The Department sent second and third notices to all permittees with potentially overdue fees up through and including fiscal year 2012. Additionally, some of the delinquent facilities have been referred to a collection agency. Adjustments for calculation errors, overpayments, previously unposted payments, duplicate or erroneous bills, and uncollectable bills are accounted for. Following is a summary of the collection status for this effort:

NJPDES PERMIT PROGRAM

Through the NJPDES permitting program, the Division of Water Quality (Division) regulates all discharges of wastewater and stormwater to the surface and ground waters of the State and for residuals generated from treatment systems. This Program also regulates industrial wastewater discharges from Significant Indirect Users ("SIU") to Domestic Treatment Works. The permit process involves pre-application conferences, application tracking, administrative and technical review of the permit applications, preparation of a detailed fact sheet on the facility and the permitted discharge activities, the development of technology and water quality based effluent limitations for conventional, non-conventional and toxic pollutants (including whole effluent toxicity), applicable anti-degradation and anti-backsliding analyses, monitoring requirements, site inspections, permit coordination, public hearings, review of public comments and agency responses, permit issuance, and responses to requests for stay of permit conditions and adjudicatory hearings. In addition, the Division provides general information and assistance to all interested parties, reviews the toxicity testing results, utilizes computer models to calculate water quality based effluent limits, reviews sludge quality reports, oversees local pretreatment programs, oversees the installation of groundwater monitoring wells, and develops facility specific groundwater protection plans. Furthermore, the Division provides technical support on enforcement matters.

As part of the NJPDES program, the Division also implements the federally mandated Stormwater Permitting Program. The Stormwater Permitting Program is administered by the Division's Bureau of Nonpoint Pollution Control (BNPC) with the assistance of the State Soil Conservation Committee, New Jersey Department of Agriculture, and the 15 local Soil Conservation Districts.

The Division has developed and adopted a series of general permits to implement certain major aspects of the Stormwater Permitting Program. The Division also issues individual stormwater NJPDES permits. Where stormwater discharges are included in addition to wastewater, process water, and other non-stormwater discharges, individual NJPDES permits for Discharge to Surface Water are handled by the Bureau of Surface Water Permitting and are processed jointly with the BNPC.

NJPDES PERMIT PROGRAM SIGNIFICANT ACTIVITIES & ACCOMPLISHMENTS

NJPDES Permit Universe Status

The total universe of NJPDES issued permits as of September 30, 2012 is 7,805 permits. This is up from 7,062 permits as of September 30, 2011, a 0.1% increase. Of these 7,805 permits, 4,974 (64%) are current, while 2830 are beyond their renewal date. The Division is continuing its efforts to further reduce the number of facilities operating with such expired but administratively extended permits.

Issuance of Two New Surface Water General Permits

The Bureau of Surface Water Permitting (BSWP) finalized two new general permits. One permit serves to renew discharges from 25 schools that have domestic treatment plants and the second serves to renew discharges from 28 existing potable water treatment plants. Both general permits are tailored to these particular discharges, will provide consistency in effluent limitations, and will promote efficiency by consolidating existing individual permits. This effort will also reduce the backlog of expired permits.

Issuance of Oyster Creek permit

BSWP finalized the draft Oyster Creek NJPDES permit with an effective date of April 1, 2012. There was extensive public interest associated with this permit where lengthy comments were submitted by numerous interested parties. The permit incorporated requirements for shutdown of the facility in accordance with an Administrative Consent Order signed by all parties.

Renewal of Surface Water General Permits

Construction Dewatering BSWP finalized this General Permit with an effective date of January 1, 2012. This permit is designed for "clean" (de minimus of pollutants as per Appendix B limitations), short term discharges from construction dewatering operations. New to this renewal, this permit includes, on a case by case basis, other short term, "clean" discharges, such as pump test discharges from potable water well pump tests.

Reuse BSWP finalized this general permit with an effective date of May 1, 2012. This general permit authorizes distribution of Reclaimed Water for Beneficial Reuse (RWBR) for restricted access applications. Such applications include sanitary sewer jetting, street sweeping, sewage treatment plant washdown, fire protection, irrigation of landscaping within a secured perimeter and certain industrial processes. All facilities applying to distribute treated wastewater for restricted access RWBR must also have a valid NJPDES discharge permit to receive authorization.

Issuance of New General Stormwater Permit for Vehicle Recycling Facilities

The Bureau of Nonpoint Pollution Control (BNPC) issued a new general stormwater permit for vehicle recycling facilities on August 1, 2012. These facilities were previously authorized under the Scrap Metal Processing and Recycling Permit but were renewed under this separate permit category to better represent the vehicle recycling industry. As part of the permit creation, extensive outreach sessions for the regulated community and municipalities were conducted in an effort to create pragmatic, cost-

effective permit conditions that are protective of stormwater quality. In addition, a web page was designed to assist facilities in understanding the permit conditions complete with inspection templates and frequently asked question documents (see http://www.state.nj.us/dep/dwq/auto_main.htm). This permit currently covers 117 facilities.

Basic Industrial General Permit – 5G2 (NJ0088315)

This general permit emphasizes pollution prevention utilizing best management practices (BMPs). It is available to regulated industrial facilities that have eliminated or can eliminate, within 18 months of permit authorization, all exposure of industrial materials or activities to stormwater (rainfall and snowmelt waters). Exposure may be eliminated by both covering or moving materials and activities associated with “industrial” indoors.

Presently, the 5G2 permit authorizes 1958 industrial facilities Statewide. It was last renewed and re-issued on 12/27/2012.

SQAR General Permits

The Department administers a regulatory program for the use and management of residuals generated by domestic and industrial treatment works. Of fundamental importance is the need to control sludge quality. Under applicable laws, the Department is directed to issue permits to limit concentrations of heavy metals, pesticides, organic chemicals and other contaminants in sludge in conformance with land-based sludge management criteria. All treatment works with a discharge regulated under N.J.A.C. 7:14A must have permits that implement applicable technical standards for residuals management. These conditions have been implemented through individual permits issued to applicable treatment works. However, the Department believes that these conditions are more appropriately controlled under a general permit than the individual permits.

The first phase of this conversion began when the largest domestic treatment works (that is, those domestic treatment works with a permitted flow equal to or greater than 5.0 mgd) were issued general permits with an effective date of January 1, 2012. A total of 41 facilities were covered under the phase one conversion. The second phase is currently underway for those domestic treatment works with a permitted flow equal to or greater than 1.0 mgd. These domestic treatment works are currently being issued general permits with an effective date of January 1, 2013. An additional 54 facilities are covered under the phase two conversion.

As part of a Department-wide initiative to mandate electronic reporting of all data submittals, the Sludge Quality Assurance Regulations require mandatory electronic submittal of monitoring report forms. The Department anticipates that mandating electronic reporting will improve reliability of data entry, and decrease the number of reports being submitted late or being lost. The Department’s web-based system streamlines reporting, which improves the quality of data flow, reduces reporting costs, offers on-line availability of reports and their processing status, and improves the Department’s efficiency in data analysis, compliance assessment, and decision-making.

The issuance of a notice of authorization under these general permits constitutes written notification that a permittee must enroll in the NJDEP Electronic Data Interchange (EDI) Online System to submit monitoring report forms electronically. Within 180 days after the effective date of a notice of authorization issued under the general permit, the permittee must enroll in the EDI Online.

New Jersey Sludge Sampling and Analytical Guidance Document

After several years in development, the final New Jersey Sludge Sampling and Analytical Guidance Document was made available in 2012. This Guidance Document was compiled for treatment plant operators, analysts, data users or other interested parties to assist in the collection of reliable and consistent sludge samples. The information contained in this Guidance Document may be employed for the sampling and analysis of sludge as required to be monitored under NJPDES permits. Thus, this Guidance Document is intended to be used by applicants to facilitate preparation or permit applications

as well as monitoring reports, and the review thereof by the Department. The Guidance Document may be found on the Department's website at <http://www.state.nj.us/dep/dwq/techman.htm>.

ENFORCEMENT ACTIVITIES

The Water Compliance and Enforcement Element monitors compliance with and enforces as necessary permits issued under the New Jersey Pollutant Discharge Elimination System (NJPDDES). In addition to the self monitoring reports submitted by the permittee, periodic on-site compliance evaluation inspections are carried out by enforcement staff as a means to evaluate the facilities compliance with all conditions of the permit. In addition, the compliance sampling inspections serve as a means of checking the validity of the self-monitoring data.

The Department publishes an annual report on the implementation and enforcement actions taken by the Department and delegated local agencies during the preceding year pursuant to the Clean Water Enforcement Act. The annual report is available on the Departments website at <http://www.nj.gov/dep/enforcement/report-cwea.html>.

The tables below summarize the results of the Department's inspections and the penalties collected during FY2012.

APPENDIX A

NJPDES REGULATIONS

N.J.A.C. 7:14A-3.1

SUBCHAPTER 3. DETERMINATION OF PERMIT FEES

7:14A-3.1 FEE SCHEDULE FOR NJPDES PERMITTEES AND APPLICANTS

- (a) Except as provided in (j) and (l) below, the general conditions and applicability of the fee schedule for NJPDES permittees and applicants are as follows:
1. Except as provided by (k) below, the Department shall collect an annual fee for the billing year July 1 to June 30 from all persons that are issued a NJPDES permit or authorization to discharge under a NJPDES general permit or submit a NJPDES permit application or request for authorization.
 2. The Department shall not assess any fee to public schools or religious or charitable institutions.
 3. All NJPDES permittees/applicants that are issued a draft or final NJPDES permit, or that are issued an authorization to discharge under a final NJPDES general permit, shall submit payment within 30 days of assessment of the fee by the Department.
 - i. Upon receipt of a completed application or request for authorization, the Department shall assess the minimum fee as set forth in Table III below.
 - ii. Upon issuance of the final permit or of an authorization to discharge under a final NJPDES general permit, the annual fee shall be calculated and pro-rated for the period of the fee year remaining. The minimum fee already paid shall then be subtracted from the pro-rated assessment. In no case, however, will such payment of a pro-rated fee result in a fee that is less than the minimum fee for the category of discharge. The permittee may request a fee recalculation as provided at (a)6 below, once the first required monitoring report has been completed.
 4. Payment of all fees shall be made by check or money order, payable to "Treasurer, State of New Jersey" and submitted to:

New Jersey Department of the Treasury

Division of Revenue

PO Box 417

Trenton, New Jersey 08625-0417

5. If the permittee/applicant fails to submit payment to the Department of the Treasury within 30 days of assessment of the fee, the Department may, in its discretion, take one or more of the following actions:
 - i. Return the NJPDES permit application or request for authorization to the applicant;
 - ii. Deny issuance of a final permit or authorization under a final general permit;
 - iii. Revoke a final permit (including revocation of a permittee's authorization to discharge under a general permit); and/or
 - iv. Assess penalties pursuant to N.J.S.A. 58:10A-10 and N.J.A.C. 7:14-8.
6. If the permittee objects to the assessment, the Department shall recalculate a permit fee upon receipt of a request from the permittee in writing within 30 days of assessment of the fee. The Department shall not recalculate a fee where the permittee has failed to submit information in compliance with its NJPDES permit.
 - i. A permittee may only contest a fee imposed pursuant to (k) below based on the following:
 - (1) The Department has no factual basis to sustain the charges assessed in the fee;
 - (2) The activities for which the fee was imposed did not occur;
 - (3) The charges are false or duplicative; or
 - (4) The charges were not properly incurred because they were not associated with the Department's oversight or remediation of the case.
 - ii. A permittee may not contest a fee imposed pursuant to (k) below if the challenge is based on the following:
 - (1) An employee's hourly salary rate;
 - (2) The Department's salary additive rate, indirect rate, or fringe benefit rate; or
 - (3) Management decisions of the Department, including decisions regarding who to assign to a case, how to oversee the case or how to allocate resources for case review.
 - iii. A permittee objecting to a fee imposed pursuant to (k) below shall

include the following in a request for a fee review:

- (1) A copy of the bill;
 - (2) Payment of all uncontested charges, if not previously paid;
 - (3) A list of specific fee charges contested;
 - (4) The factual questions at issue in each of the contested charges;
 - (5) The name, mailing address and telephone number of the person making the request;
 - (6) Information supporting the request or other written documents relied upon to support the request.
7. The Department, in calculating Environmental Impact, shall use information reported by the permittee on MRFs for the 12 month period for which data is available on the Department's computer. The selected 12 month monitoring period will be documented in the Annual NJPDES Fee Schedule Report. Where this information is not available, the Department shall use permit limitations, information submitted in permit applications, technical reports prepared by the Department or submitted by the permittee, or other permits issued by the Department.
8. Except as provided by (k) below, the Department, upon the revocation of a NJPDES permit, or revocation of a NJPDES/SIU permit in accordance with N.J.A.C. 7:14A-21.9, shall upon written request of the permittee prorate the fee for the number of days that the facility was in operation or was discharging under a valid NJPDES/SIU permit during the billing year and return to the permittee the amount that is in excess of the minimum annual fee for the specific category of discharge.
9. Except as provided by (k) below, the annual fee for all discharges is calculated by applying the formula:

Fee = (Environmental Impact x Rate) + Minimum Fee, where:

- i. Environmental Impact is the Department's assessment of potential risk of discharge to the environment as derived under (c) through (g) below.
- ii. Rate is the dollar cost for each weighted unit of Environmental Impact. Rate is calculated as follows:

Rate = (Budget-Sum of Minimum Fees)/Total Environmental Impact

- (1) Budget is the total budget for the category of Discharge.
 - (2) The Sum of Minimum Fees is the total amount of minimum fees to be paid by all dischargers in the category of discharge.
 - (3) Total Environmental Impact is the sum of environmental impact for all dischargers in the category.
 - (4) The budget and the total environmental impact shall be adjusted to reflect those facilities, if any, assessed a maximum permit fee.
- iii. The minimum fee is a base cost to which the product of the Environmental Impact and the Rate identified under (a)9i and ii above is added. The minimum fee for any permit category is calculated by using the following formula and rounding to the nearest \$50.00 increment:

$$\text{Minimum Fee} = \frac{\text{Hours} \times \text{Cost Per Hour}}{5}, \text{ where:}$$

Hours = Total hours allocated by the Department on the administration, including permit issuance, inspection and data management, of the permit per facility over a five year period in each category.

Cost Per Hour = Total personnel cost per hour, including fringe benefits and indirect costs.

The minimum fees are set forth in Table III below. For any new or revised category of discharge, the Department shall calculate a minimum fee and shall list it in the Annual NJPDES Fee Schedule Report for public comment under (b) below.

10. The maximum fee to be assessed for any category of discharge shall be 10 percent of the budget for the category of discharge.
 11. If a factual dispute involving a fee imposed pursuant to (k) below cannot be resolved informally, a permittee may request an adjudicatory hearing on the matter pursuant to N.J.A.C. 7:14A-17.2.
- (b) The Department shall prepare an Annual NJPDES Fee Schedule Report and provide for a public hearing on the Report.
1. The Annual NJPDES Fee Schedule Report shall include the following:
 - i. A detailed financial statement of the actual administrative cost of the NJPDES program by account title;

- ii. A detailed financial statement of the actual revenue collected, including any surplus which can be credited or any deficit to be assessed in determining the fee schedule;
 - iii. A detailed financial statement of the anticipated cost of the NJPDES program, including:
 - (1) A breakdown of the program by account title;
 - (2) An estimate of the amount of fees that will be collected; and
 - (3) The current year's fee schedule.
 - iv. A report of the NJPDES program activities, including:
 - (1) A list of permits issued;
 - (2) A list of facilities inspected;
 - (3) A list of administrative orders and administrative consent orders issued by the Department (by type of order and discharge involved); and
 - (4) A summary of variance request activities under Section 316 of the Federal Water Pollution Control Act (33 U.S.C. §§1251 et seq.).
 - v. A list of all minimum fees calculated in accordance with (a)9iii above, and the basis for any new or revised minimum fee.
2. The Department shall provide for a hearing on the Annual NJPDES Fee Schedule Report. The Department shall provide public notice of the hearing at least 30 days prior to the date of the hearing:
 - i. In the New Jersey Register and one newspaper of general circulation; and
 - ii. By mailing a notice of availability of the Fee Report to each NJPDES applicant/permittee the Department identifies as subject to a NJPDES annual fee. The complete Fee Report will be posted on the Department's website at <http://www.nj.gov/dep/dwq/njpdesfees.html>. The Department will provide, free of charge, a paper copy of the complete Fee Report to each applicant/permittee, or any other interested person, upon request.
 3. The Department shall publish a Notice of Adoption of the Annual NJPDES Fee Schedule Report, which shall include a summary of the public comments and Department responses. Upon publication of this

Notice of Adoption in the New Jersey Register, any adopted new or revised minimum fee(s) identified in the Notice of Adoption shall be incorporated into Table III as an administrative change.

(c) The annual fee for discharges to surface water is calculated by using the following Environmental Impact in the annual fee formula:

1. The Environmental Impact of a discharge to Surface Water from an industrial treatment works (ITW) regulated under an individual NJPDES permit is derived by applying the formula:

Environmental Impact = (Total Pollutant Load + Heat Load) where:

- i. Total Pollutant Load is the sum of each limited pollutant's average loading (in kilograms per day) for the selected 12-month period, as determined in accordance with N.J.A.C. 7:14A-3.1(a)7, multiplied by its associated risk factor as listed in Table I below.
 - (1) Net loadings will be used if a net limit has been established in the NJPDES permit. If a permittee reports a pollutant load less than zero, a zero will be used to calculate the Total Pollutant Load.
 - (2) Any pollutant listed in Table I will be deleted from the Total Pollutant Load, if reported as non-detectable in all samples for the monitoring period. When any of the pollutants listed in Table I is detected at least once in the monitoring period, the Department shall calculate the Total Pollutant Load using one-half the reported minimum detection limit for pollutant concentrations.
 - ii. Heat Load is the average mBTU's (million British Thermal Units) per hour of the effluent discharged. Where Heat Load is not reported in mBTU's per hour, the Department shall estimate the Heat Load using the calculated difference between the influent and effluent temperature (in degrees celsius) multiplied by the amount (in million gallons per day) of effluent discharged and a unit conversion factor of 0.6255. The Department shall use an average influent temperature of 5.57 degrees celsius during the period November to April and 18.87 degrees celsius during the period May to October.
2. The Department shall assess an additional fee to NJPDES permittees who request a variance under Section 316 of the Federal Water Pollution Control Act (33 U.S.C. §§1251 et seq.). The annual fee shall be assessed on the basis of the administrative cost that is incurred by the Department and the cost of the technical review performed by a consultant hired by the Department.
 3. The Environmental Impact of a discharge to surface water from a

domestic treatment works (DTW) regulated under an individual NJPDES permit is derived by applying the formula:

Environmental Impact = Average kilograms per day of oxygen demand discharged, as measured by Biochemical Oxygen Demand (BOD5), Carbonaceous Biochemical Oxygen Demand (CBOD5) or other oxygen demand parameter selected by the Department, as determined in accordance with (a)7 above.

4. The Environmental Impact value for any type of discharge to surface water regulated under a general permit shall be zero.
- (d) Except as provided by (k) below, the annual fee for discharges to groundwater, except for residuals covered in (e) below, is calculated by using the following Environmental Impact in the annual fee formula:
 1. The Environmental Impact of a Discharge to Groundwater regulated by an individual NJPDES permit is derived by applying the formula:

Environmental Impact = (Pollution Potential Factor) x (Discharge Control Factor) where:

- i. For landfills and facilities discharging only sanitary sewage wastewater, the Pollution Potential Factor is the sum of the applicable Pollution Rating Factor set forth at (d)1iii below and the applicable Pollution Loading Factor set forth at (d)1iv below.
- ii. For facilities other than those identified in (d)1i above, the Pollution Potential Factors are set forth at (d)1v below.
- iii. The Pollution Rating Factor is a value that is a measure of the relative risk associated with the pollutant sources listed below. The Pollution Rating Factor is assigned as follows:

<u>Pollutant Source Description</u>	<u>Pollution Rating Factor</u>
Sanitary sewage wastewater	1
Sanitary landfills	20
Hazardous waste facilities including hazardous waste landfills	50

- iv. The Pollution Loading Factor is a value based on flow (Q) for a sanitary discharge, where Q is the NJPDES permitted flow limit or the facility design flow in the absence of a NJPDES permitted flow limit, or by the mass of solid waste annually deposited at a landfill. The Pollution Loading Factor is assigned as follows:

<u>Pollutant Source Description</u>	<u>Pollution Loading Factor</u>
Landfill Solid Waste	Annual Mass + 1 (where Annual Mass = Mass of solid waste annually deposited (in tons) / 400), with the result rounded to the nearest whole integer
Sanitary Waste Discharge where Q < 1.0 MGD	Q in MGD x 2000, with the result rounded to the nearest whole integer
Sanitary Waste Discharge where Q = > 1.0 MGD but < 3.0 MGD	2000
Sanitary Waste Discharge where Q = > 3.0 MGD but < 5.0 MGD	3000
Sanitary Waste Discharge where Q = > 5.0 MGD	4000

- v. The Pollution Potential Factor for facilities other than those identified in (d)1i above, is assigned as follows:

<u>Pollutant Source Description</u>	<u>Pollution Potential Factor</u>
Stormwater runoff	100
Non-contact cooling water	200
Potable water plant filter backwash	200
Food processing wastewater	250

Discharge from quarry operations including, sand and gravel operations 250

Industrial process wastewater (not otherwise specified) 300

- vi. The Discharge Control Factor is a measure of the potential of a discharge to affect groundwater and is based on whether a pollutant source passes through to a DSW or POTW, is designed to be discharged to the ground, or is a landfill. The Discharge Control Factor is assigned as follows:

<u>Discharge Control Scenario for Pollutant Source</u>	<u>Discharge Control Factor</u>
Permitted, but not being discharged (does not apply to landfills)	0
Pass-through wastewater to DSW or POTW, lined (surface impoundment with a liner having hydraulic conductivity of at least $<10^{-7}$ cm/sec)	1
Pass-through wastewater to DSW or POTW, unlined and/or partially lined (surface impoundment or infiltration/percolation lagoon that is unlined or partially lined)	10
Designed for discharge to the ground (sanitary wastewater with at least secondary treatment)	20
Designed for discharge to the ground (all other wastewater other than sanitary wastewater with at least secondary treatment)	25
Landfills, completely lined ($<10^{-7}$ cm/sec)	30
Landfills, unlined and/or partially lined	40

2. The Environmental Impact value of any type of discharge to ground water regulated under a general permit shall be zero.

(e) The Environmental Impact value for facilities which land apply, handle or distribute residuals listed in Table III below shall be zero.

(f) (Reserved)

(g) The annual fee for discharges by a significant indirect user to a domestic treatment works is calculated by using the following Environmental Impact in the annual fee formula:

1. The Environmental Impact of a discharge by a significant indirect user (SIU) to a domestic treatment works (DTW) is derived by applying the formula:

$$\text{Environmental Impact} = (\text{Total Pollutant Load})$$

- i. Total Pollutant Load is the sum of each limited pollutant's average loading (in kilograms per day) for the selected 12-month period, as determined in accordance with N.J.A.C. 7:14A-3.1(a)7, multiplied by its associated risk factor as listed in Table I below.

- (1) Any pollutant listed in Table I will be deleted from the Total Pollutant Load, if reported as non-detectable in all samples for the monitoring period. When any of the pollutants listed in Table I is detected at least once in the monitoring period, the Department shall calculate the Total Pollutant Load using one-half the reported minimum detection limit for pollutant concentrations.
