

Sewage Sludge Production by Management Mode - 2003

The following tables present data on sewage sludge removal for the calendar year 2003 in the State of New Jersey. This information is compiled from reports submitted by sewage sludge generators and includes only those facilities that reported removing sewage sludge in calendar year 2003.

Summary: The first table is one page long and presents the quantities of sewage sludge generated and modes of management in the state of New Jersey in the year 2003. The information is presented by county; subtotaled by county and mode; and totaled for the state. The percentage managed in each mode is also presented.

Detail: This table adds the detailed amount of sewage sludge reported removed by individual generators in the year 2003. The information is presented by county and then by municipality and then by generator. The information is subtotaled by county.

Please direct questions regarding this information to Residuals Management staff of the Bureau of Pretreatment and Residuals, DWQ-NJDEP, 609-633-3823.

Notes:

1. All sewage sludge values are presented in Dry Metric Tons/Year.
2. Management mode column headings are defined, as follows:

INCINERATOR CUSTOMER: Generator's sewage sludge is ultimately managed at a New Jersey sewage sludge incinerator owned and operated by another entity.

INCINERATOR OWNER: Generator incinerates sewage sludge in its own, permitted, on-site facility.

CLASS A BENEFICIAL USE: Generator's sewage sludge is ultimately processed in New Jersey by a system designed to prepare sewage sludge for beneficial use as a fertilizer or other soil amendment. The process must meet specific pathogen reduction, vector attraction reduction and pollutant standards.

CLASS B BENEFICIAL USE: Generator's sewage sludge is ultimately processed in New Jersey by a system designed to prepare sewage sludge for beneficial use as a fertilizer or other soil amendment. The process must meet specific but lesser pathogen reduction, vector attraction reduction and pollutant standards which, when combined with site restrictions and management practices, are equally protective of human health and the environment.

OUT-OF-STATE BENEFICIAL USE: Generator's sewage sludge is ultimately managed in a beneficial use system located in another state. Generator is required to demonstrate compliance with regulations applicable in the receiving jurisdiction.

OUT-OF-STATE DISPOSAL: Generator's sewage sludge is ultimately managed in another state. Generator is required to demonstrate compliance with regulations applicable in the receiving jurisdiction.

IN-STATE BENEFICIAL USE - LANDFILL COVER: Generator's sewage sludge is ultimately managed at a New Jersey landfill specifically permitted by the Department to utilize the material as a landfill cover component.

OTHER: Generator operates a system that warrants infrequent (less than once/year) removal of sewage sludge. The most common is the Phragmites Reed Bed system.

Summary of Existing Sewage Sludge Production by Management Modes - Calendar Year 2003
