

Rebuild by Design Drilling Schedule (updated 1/6/2020)

Fieldwork will be occurring in the area of Weehawken Cove near the 1600 Block of Willow Avenue. If you have any questions please contact [rbd-hudson@nj.gov](mailto:rbd-hudson@nj.gov)

***Rebuild by Design:***

*The Engineering Team for Rebuild by Design will be drilling one soil boring at the vacant lot north of Harborside Park, east of Park Avenue near 16th Street on Monday 1/6/2020 and Tuesday 1/7/2020. Minor noise will result from this work between 8 AM and 4 PM, in compliance with the City's noise ordinance. This geotechnical investigation is part of the engineering design analysis for the \$230 million federally-funded Rebuild by Design project, which will resist coastal flooding like occurred during Superstorm Sandy.*
