

# Salt Marsh Jewelry Workshop

\$225.00

August 5-6, 2023

Sedge Island Natural Resource Education Center  
Seaside Park, NJ

**About the Program:** Nature has inspired our creativity for centuries! Now you can join NJ Fish & Wildlife staff along with local artist, Hali, to explore the Barnegat Bay and let it inspire you to create your own piece of art in the form of a ring. This workshop is for participants 18 years and older, interested in learning about the importance of New Jersey's salt marshes through kayaking, clamming, fishing, and jewelry making! Participants should be prepared to be outside most of the day. At the end of this program, you will be leaving with a ring you created inspired by the salt marsh. (See image below)

**Facility:** The Sedge Island Natural Resource Education Center is a rustic, renovated duck hunting lodge situated on an island, a mile from Island Beach State Park, in Barnegat Bay. It is now used as a residential environmental education facility. There are amenities that will help make the overnight workshop comfortable – like composting toilets, running water, common room, dining room, and fans. There are bunk rooms that participants will be paired up to share. Please note there is no air conditioning but there are fans throughout the house.

**To Apply:** The workshop is limited to 10 participants. **To apply please complete this [Application](#).**

**Workshop Fee:** \$225.00, includes lodging, meals, and materials to craft your own original wetland ring (see image below for examples).
