Harvested					

New Jersey Fish & Wildlife's Bureau of Wildlife Management has reviewed and analyzed harvest statistics for various upland species, including bobwhite quail and pheasant. A significant portion of the annual game harvest comes from the Commercial and Shooting Preserves.

Therefore, in addition to the normal annual report, and to further this research effort, NJFW is requesting all Commercial and Semi-Wild Shooting Preserve permit holders to complete this form at the end of each season. This information will be used to better estimate the harvest of native versus stocked game birds in the State. We strongly feel this is an important issue and the results will enable NJFW to better serve the citizens of our State. We strongly feel this is an important issue and the results will enable NJFW to better serve the citizens of our State.

Please note, failure to submit the Harvest Report with the Annual Report will delay the authorization and/or issuance of a Commercial and Semi-Wild Shooting Preserve Permit for the upcoming season.

Annual Reports may be emailed to: NJWildlifePermits@dep.nj.gov.
