

# Arsenic Water Treatment Checklist

- ☐ The system treats both Arsenic 3 and Arsenic 5
- ☐ Other water quality issues besides arsenic (e.g. bacteria, iron, gross alpha) will be addressed
- ☐ System includes both pre and post-treatment sediment filters
- ☐ The system will process enough water to meet the household's needs
- ☐ Choose between Point-of-Entry (whole house) and Point-of-Use (single tap) systems
- ☐ Understand required maintenance
- ☐ After the system is installed test your water to make sure the system is working properly
- ☐ Once a year test your treated water

Notes:
