Subject [SRRA] Technical Guidance Subcommittees and Team Members

As mandated by the Site Remediation Reform Act, the Department is currently preparing numerous technical guidance documents to complement the Technical Requirements for Site Remediation, and assist responsible parties and licensed site remediation professionals in remediating contaminated sites. These guidance documents will form of the basis of the professional judgement to be used by LSRPs when remediating contaminated sites.

This effort involves both Department staff and outside stakeholders. The Site Remediation Program has posted the list of guidance teams and members at https://www.nj.gov/dep/srp/srra/stakeholder/tech_guidance_committee.pdf

Links to the document are available through the main SRP Web page (<https://www.nj.gov/dep/srp/>), the main SRRA Web page (<https://www.nj.gov/dep/srp/srra/>), and the "Stakeholder Process" Web page (<https://www.nj.gov/dep/srp/srra/stakeholder/>).
