[SRRA] Space still available for Technical Guidance Training - Nov 16th NJIT-Newark

Space is still available for training on two new Technical Guidance Documents: "Alternative and Clean Fill for SRP Sites" and "Historic Fill Material and DAP" scheduled for November 16th at New Jersey Institute of Technology, Newark.

Please note: Registration for the North Jersey sessions has been very light *THIS SESSION WILL BE CANCELED* if more people do not register. In addition, the Department is considering limiting future training on Technical Guidance documents to DEP headquarters in Trenton if registration for the Nov 16th session remains low.
