[SRRA]The Linear Construction Technical Guidance is now available

The Department would like to announce the availability of the Linear Construction Technical Guidance (version 1.0 dated January 2012). The Department would like to thank the Linear Construction Technical Guidance Committee Members for their hard work in completing this document. The guidance is designed to help the investigator to conduct linear construction project in a manner that is protective of human health and the environment.

This document is the culmination of a stakeholder process that started in January 2010. Posted along with this guidance document are responses to comments that were received on the Vapor Intrusion Guidance Committee's Final document.
