Subject [SRRA]: New Notices available for Response Action Outcomes (RAOs)

[SRRA]: New Notices available for Response Action Outcomes (RAOs)

The Department is aware that the Model Response Action Outcome (RAO) Document promulgated as Appendix D in the Administrative Requirements for the Remediation for Contaminated Sites (ARRCS, N.J.A.C. 7:26C) does not address certain situations that may occur at sites where remediations are concluding. When appropriate, the Department works with remediating parties and LSRPs to ensure that RAOs accurately reflect site-specific conditions and implemented remedial actions. To that extent, the Department has created several new RAO Notices which are available to LSRPs for their use when writing RAOs (see list below). These Notices, as well as a description of the Department's approval process for other RAO modifications are posted on the Department's website at <https://www.nj.gov/dep/srp/guidance/>. New RAO Notices are available for the following situations:

- In-Service Railroad Lines, Spurs and Sidings Not Remediated
- Historic Fill Notice for Area of Concern RAO (RAO-A)
- Soil Contamination From an Off-Site Source Remains On-Site
- General
- Diffuse Anthropogenic Pollution

Downloadable versions of these RAO Notices are available at <https://www.nj.gov/dep/srp/regs/arrcs/index.html>.
