Subject [SRRA]: Request for Public Input on the Draft Interim Ground Water Quality Criteria and the Draft Interim Practical Quantitation Levels for Ten Chemicals

[SRRA]: Request for Public Input on the Draft Interim Ground Water Quality Criteria and the Draft Interim Practical Quantitation Levels for Ten Chemicals

April 1, 2015

The New Jersey Department of Environmental Protection (Department) has developed and is requesting public input for draft Interim Ground Water Quality Criteria and analytical draft interim practical quantitation levels (PQLs) for several chemicals. The Department is publishing these proposed values and their technical basis and is soliciting public input in the interest of transparency and obtaining additional relevant information. The basis for the draft interim criteria for these chemicals was developed over the past several years, while the draft PQLs were developed more recently in response to requests from the Department's Site Remediation Program. Therefore, the Department is particularly interested in any new toxicity data or information relevant to the derivation of the draft interim criteria.
