[SRRA]: NJDEP Site Remediation & Waste Management Program (SRWMP) announces update of the Known Contaminated Sites in New Jersey (KCSNJ) reports

The KCSNJ reports (www.nj.gov/dep/srp/kcsnj/) available through the NJDEP's Data Miner have been updated to more accurately reflect the status of a contaminated site (i.e., Active, Pending, or Closed). Additionally, sites with remedial action permits are now included only in the active sites report.

Detailed information describing the case history at a site, including for active cases, is available through the Data Miner's Site Search Report or Active Case Report, by using the Site Remediation Program Interest (PI) Number, which is provided in the KCSNJ reports. The Data Miner reports will provide the data currently available in the database.
