Announces the Availability of Revised Technical Guidance:  
Historically Applied Pesticides Site Technical Guidance

[SRRA]: NJDEP Site Remediation & Waste Management Program Announces the  
Availability of Revised Technical Guidance: Historically Applied Pesticides Site  
Technical Guidance

The Department announces the availability of revised Technical Guidance:

The Historically Applied Pesticides Site Technical Guidance has been revised from  
Version 1.0 to Version 2.0. Revisions to the document included a revised definition  
for Historically Applied Pesticides (HAP) and added definitions for the terms  
"agriculture" and "golf course." A section was also added to allow the deferral of  
HAP remediation at active agricultural sites and active golf courses where  
sampling results indicate HAP are present at levels exceeding applicable  
standards. At these sites, remediation of the HAP-related contaminants can be  
deferred until the property is no longer used for agricultural purposes or as an  
active golf course. Remediation of all other contamination is still required in  
accordance with established regulatory and mandatory timeframes. As part of this  
technical guidance update, the Department is also making available a new  
Historically Applied Pesticides (HAP) Deferral Request Form.

Technical guidance documents can be accessed on the Site Remediation webpage  
in the Guidance Library ([www.nj.gov/dep/srp/guidance/](http://www.nj.gov/dep/srp/guidance/)). The new form is  
available on the SRRA Forms webpage ([www.nj.gov/dep/srp/srra/forms/](http://www.nj.gov/dep/srp/srra/forms/)).

Note: Technical guidance may be used immediately upon issuance. However, the  
Department recognizes the challenge of using newly issued or revised technical  
guidance when a remediation affected by the guidance may have already been  
conducted or is currently in progress. To provide for the reasonable  
implementation of new or revised technical guidance, the Department will allow a  
6-month "phase-in" period between the date the technical guidance is issued and  
the time it should be used.
